Ratings / Theses

•	BYD	(OW)	Regional gaming revenue (~65% of BYD's EBITDAR) should recover quicker from COVID-19; well-positioned to benefit from sports betting; trading below historical multiple
•	DKNG	(OW)	Best-in-breed for US Sports Betting and iGaming; see mkt growing from <\$1.5B in 2019 to \$12B in 2025; COVID-19 likely to push states to legalize more, expect DKNG to achieve 20% share
•	ERI	(OW)	Regional casino markets should recover quicker from COVID-19; opp to monetize sports betting assets and sell a LV Strip asset; confident can achieve targeted CZR synergies
-	GLPI	(OW)	Regional casino markets should recover quicker from COVID-19 headwinds; attractive ~10% dividend yield; less cyclicality at tenants makes valuation attractive vs. peers
-	PENN	(OW)	Strongly-positioned for sports betting opp given Barstool partnership, market access partners, and additional skins; regionals should recover from COVID-19 quicker than other markets
-	VICI	(OW)	Regional casinos should recover quicker from COVID-19; largest, most visible growth pipeline (multiple ROFRs and options) of Gaming REITs, acquired 10 of last 15 assets in space
-	CZR	(EW)	Vegas likely have a slower recovery from COVID-19; stock driven by CZR-ERI deal close; while significant upside to implied deal price, also downside if deal falls apart
-	LVS	(EW)	Macau mass mkt gaming market play, supported by 44% hotel room share; Macau should recover quicker from COVID-19 but expect VIP/Premium Mass to lead the recovery
-	MGM	(EW)	Vegas casino market recovery from COVID-19 headwinds could take time; long-term MGM should benefit from Vegas tailwinds such as the Raiders moving in
•	MGP	(EW)	Strongest tenant liquidity; others sellers reluctant to sell to MGP given MGM ownership but BX JV to help; Vegas market recovery from COVID-19 may take some time, Regional recovery faster
٠	WYNN	(EW)	Macau and Vegas recoveries from COVID-19 likely to take time but VIP/Premium Mass focus makes better positioned than LVS DKNG rating as of April 30, 2020

What Is Macau? A Special Administrative Region (SAR) of China, similar to Hong Kong

Macau: Only Place in Greater China Legal to Gamble

Macau 2019 Gaming Revenue: \$38 billion; Las Vegas \$7 billion. Sands broke SJM monopoly in 2004, market peaked in 2013 at \$45 billion, then dropped to \$28 billion in 2016 on account of the China corruption crackdown. We expect minimal growth in 2019 because of China macro.

Macau Drivers / Headwinds

Fundamental drivers	1.	China macro / sentiment – Growing PCE, liquidity, and outbound tourism key positives
r unuamontar anvoio		Hotel room / gaming capacity – Significant new supply opened / opening in 2015-2021
		Infrastructure improvement – Ferry terminal expansion (May 2017), Macau-Zhuhai-HK bridge (Oct 2018), Hengqin train station (Nov 2019), and Cotai Light Rapid Transit (Dec 2019)
	4.	Junket liquidity and availability of capital
Regulatory Risk	1.	Anti-corruption campaign – Had a severe negative impact in 2014-2016
	2.	Cutback of China capital outflows / UnionPay card usage – Illegal devices were banned end of June 2014; Pawn shops were removed from casino floors in December 2014; ATM withdrawal limits enforced in December 2016; Ongoing risk of pawn shop monitoring and/or further restrictions
	3.	Transit visa restrictions – COVID-19 driven halt of two main Chinese visa programs to Macau, the Individual Visitor Scheme (~47% of Chinese visitation) and package tour program (~30% of visitation
	4.	Smoking ban – Partial ban effective Jan 1, 2013; Full ban on mass floors on Oct 6, 2014; Full smoking ban (including VIP areas) January 1, 2019 (but lounges allowed)
	5.	License renewal needed in 2022
	6.	Table cap – # of tables capped at ~6,500, growing at 3%. New Cotai projects have received 100 incremental tables initially and an extra 25 in year 2 and sometimes also year 3
Liquidity Risk	1.	Regulatory crackdown, increasing regulations, junket thefts, and weaker China macro trends all hurt junket liquidity
	2.	Limited visibility on junkets' balance sheets and velocity of payment
	3.	Junkets have consolidated, where the largest 3 have ~80% of market share
Competition	1.	New supply – LVS new rooms ('20), SJM Grand Lisboa Palace ('21) and Galaxy Phase III ('21-'22)
	2.	Potential competitive impact from casinos in Australia, Taiwan, Korea, Cambodia, Japan, Saipan, Vietnam, and Philippines

Macau: VIP Driven by China's Financial Liquidity

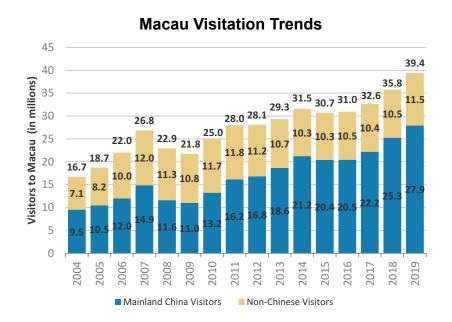

Total social financing leads Macau GGR by 9M

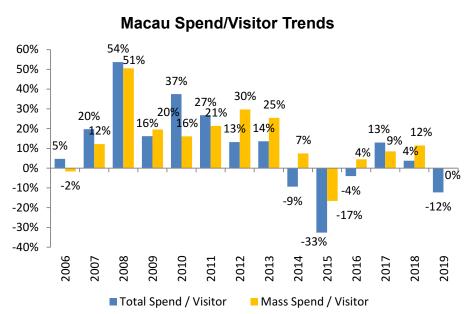

Macau: Spend per Visitor vs. Visitation

Visitation long-term driver, spend per visitor more volatile

- Since 2006, total GGR CAGR +15%, visitation +4%, spend/visitor +10%
- In 2015 (weakest year), visitation dropped 3% while spend/visitor declined 33%
- 2019 visitation +10%, and spend/visitor (12)%
- Mainland Chinese 71% of Macau visitors in 2019, with Chinese visitation +11%
- 53% of visitors are same-day, 47% of visitors stay overnight

Macau Debate #2: Will Expansion Keep Growing the Market?

Results so far have been promising, with gaming revenue growth up double digits y/y in 2017 and 2018 following the openings of Wynn Palace, Parisian, and MGM Cotai (openings August 2016 – February 2018)

Las Vegas (pre-great recession) a good precedent – 12% revenue CAGRs during supply booms vs. 4% long-term

HKZM bridge also showing infrastructure support – avg 8% visitation growth 5-months pre, 19% 5-months post

Macau Debate #3: What Will the Chinese Economy and Government Do?

Macau: COVID-19: Expect a Faster Recovery than Other Mkts

- TTM Macau GGR stalled in 2009 due to the Great Recession, and then accelerated quickly with new supply
- We forecast Macau GGR to decline 43% in 2020, and a recovery of up 53% in 2021 as Macau is feeling pressure from travel restraints now but likely has a stickier customer base (90% gambling)

Las Vegas: Understanding the Revenue Mix

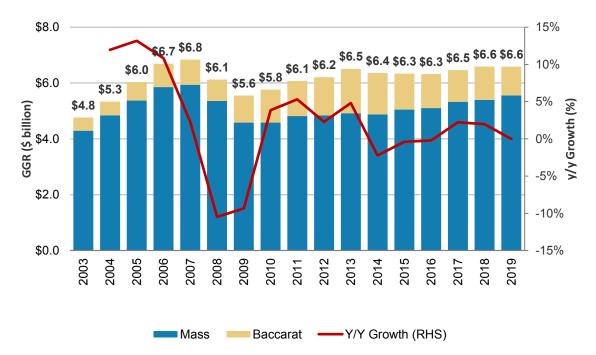

The Las Vegas market has become significantly less dependent on gaming over the last ~50 years

Las Vegas: Gaming Revenue: Slow Growth

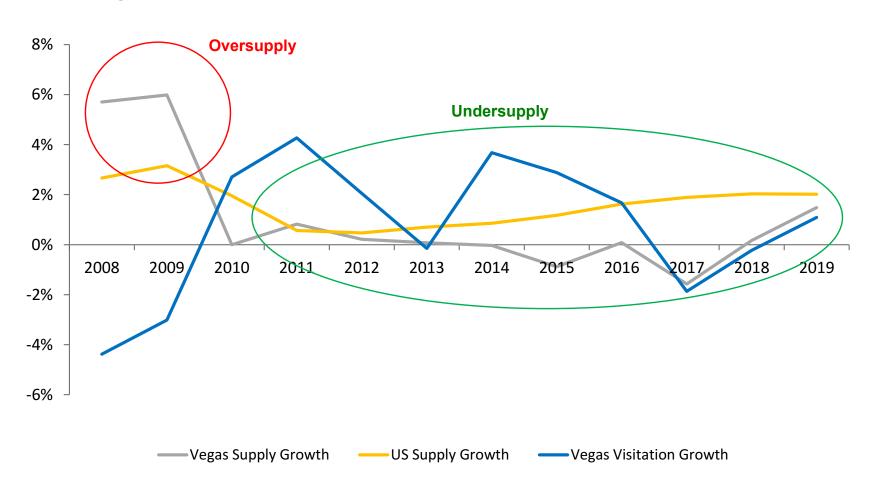

Las Vegas gaming revenue growth has been modest following the US recession, growing at just a 2% 10-yr CAGR

- From 2009-2013, market grew 4%/yr driven by baccarat (proxy for high-end Chinese play) growing at a 13% CAGR
- However, over the past 5 years, baccarat revenues have dropped 30% (incl. -13% in 2019 due to trade tensions)
 - Baccarat now 16% of gaming revenue vs. 25% in 2013
- Since 2009, non-baccarat revenue has grown at a 2% CAGR

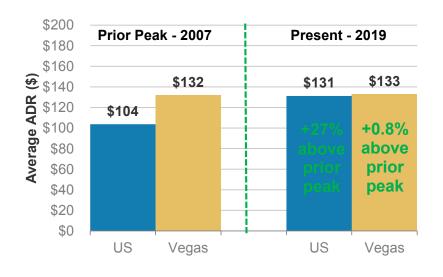

Consumer Spring Training Teach-In

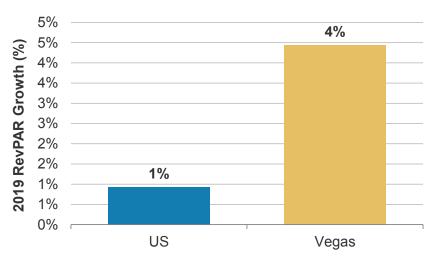

Las Vegas: Room Revenue: Lack of Supply Growth Positive and Negative

Las Vegas: RevPAR Below Peak but Not Telling Whole Story

- In 2019, overall US hotel RevPAR was +32.5% above prior peak
 - Average Vegas RevPAR was still ~1% below prior peak
- However not telling whole story as resort fees (often >\$30) and parking fees significantly higher than 2007
 - Las Vegas RevPAR growth was +4% in 2019, helped by a strong convention calendar

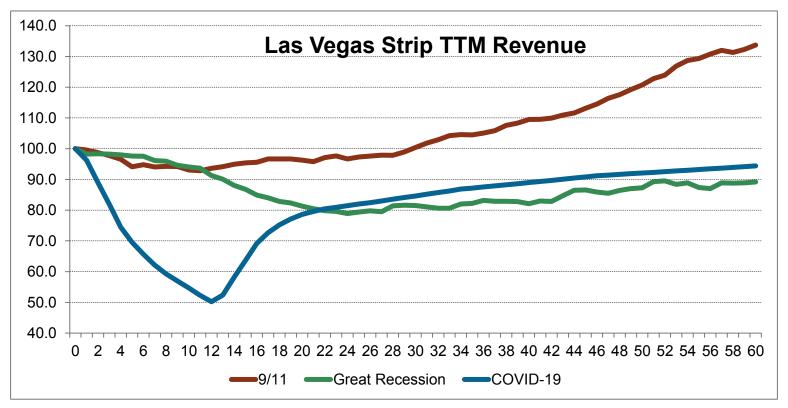

May 2020

Las Vegas: Expect a Slow Recovery from COVID-19

- TTM LV Strip gaming revenue troughed 7% lower post 9/11 and recovered to Aug 2001 levels in 30 months. Revenue during the Great Recession fell 21% at trough, and still has not recovered to peak
- We expect Vegas gaming revenue to decline 45% y/y in 2020 before increasing 47% y/y in 2021. However we don't expect it to return to 2019 levels until 2026 as social distancing measures and a weaker consumer for big ticket discretionary items are impacted

Regional Gaming: We Expect a Relatively Fast Recovery

- TTM US Regional gaming revenue continued to grow post 9/11, decelerating just ~3.5%. During the Great Recession, TTM revenues declined 4%. Both periods were during expansion phases, with more mature markets like MS and NJ seeing ~20% declines
- We forecast regional gaming GGR to decline 38% y/y in 2020 before rising 41% y/y in 2021. We expect a faster recovery than Vegas given stickier, more drive-to customers, but not to return to peak until 2023

Ratings / Theses

C-Corps	- CHH	(EW)	COVID-19 pressures RevPAR; better-positioned than peers due to almost purely franchise model and valuation less levered to unit growth / buybacks
	• н	(EW)	COVID-19 presents risks to asset-heavier model (~45% EBITDA owned), lower fin. leverage an offset
	• HLT	(EW)	Attractive asset-light growth model, but old growth model slowed and pressure from COVID-19
	- MAR	(EW)	COVID-19 headwinds pressure RevPAR and unit growth, but less expensive than HLT
	• STAY	(EW)	Strategic value in STAY's brand business & more immune to COVID-19 headwinds given extended stay, but own most of hotels so significant negative operating leverage
REITs	- DRH	(UW)	Higher leverage than peers a risk given spread of COVID-19 but lower multiple and valuable assets
	- HST	(UW)	Headwinds resulting from COVID-19; high gateway cities exposure a risk
	- SHO	(UW)	COVID-19 pressures RevPAR but least levered balance sheet
	- XHR	(UW)	COVID-19 leads to hotel closures; above average supply growth; asset sales at risk

What's the Dynamic Between Owners / Managers / Franchisers

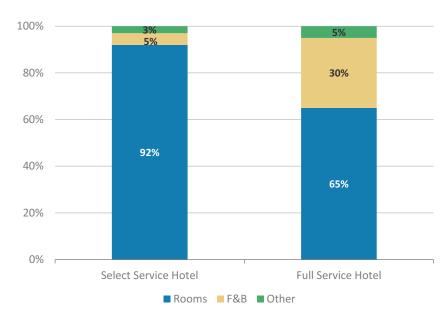

Owners	Typically REITs or private investment vehicles
	 Large brand companies still own / lease some hotels but have been moving away from the model because most cyclical / less scale advantage
	 Neither REITs nor C-corps are currently building new hotels, rely on developers
	Most operating leverage (attractive in an upcycle)
Managers	Manager runs hotel
	 Operating costs paid back by owner so runs through P&L as revenue offset by similar cost
	 Manager earns base fee of ~2% (in Emerging Markets) or 3% (in US / Europe) of hotel revenues
	 Also earns incentive management fees (IMF) of 10% of profit (in Emerging Markets) or 20-25% of profit in US / Europe (but after surpass owners' priority of ~10% of invested capital)
Franchisers	 Earns fee of ~5% of room revenue only (not incurred on Food & Beverage and other revenue)

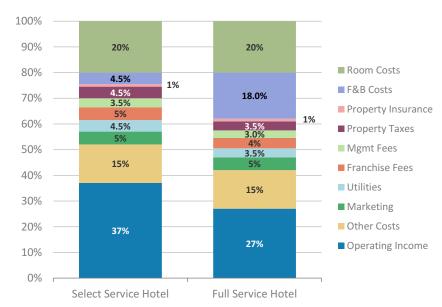

Typical Hotel Profit & Loss

- Select Service hotels have higher operating margins as they are smaller (more efficient to run) and have less Food & Beverage
- Operating leverage is with the hotel owners (including REITs) as pay managers / franchisors set fee %
- Labor is typically ~45% of expenses. When hotels are closed, can lower costs to 15-25% of typical

Stocks Have Typically Outperformed when RevPAR Accelerates

Key Debate #1: RevPAR growth outlook? COVID-19 impact

- We forecast US RevPAR declining 47% in 2020, primarily as a result of demand weakness due to the spread of COVID-19
- We expect a multi-year recovery, with US RevPAR rebounding 57% in 2021. Implies RevPAR is still 17% below 2019 levels in 2021 and doesn't return back to peak until 2025
- We see headwinds from less domestic business travel, int'l inbound, group (conferences / weddings), and a weaker consumer

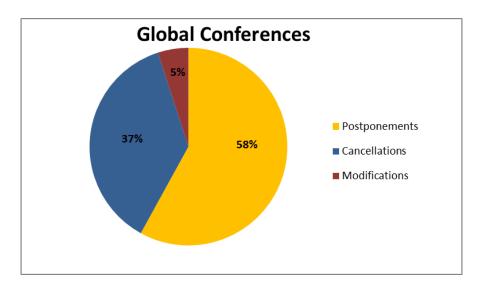

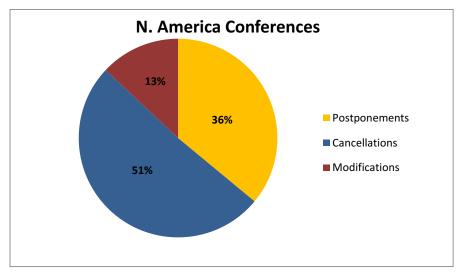

Source: STR, Morgan Stanley Research

Consumer Spring Training Teach-In

COVID Impact: Group (>10 rooms booked at once) will likely take longest to recover

- As of April 2, STR had tracked 431 global events that have been postponed (58%), cancelled (37%), or modified (5%) due to the coronavirus pandemic
- In N. America, 36% have been postponed / 51% cancelled / 13% modified, suggesting the spread of COVID-19 to N. America later is having a more meaningful impact on the conference outlook
- MSFT and FB both said they will not host any in-person large events until at least July 2021

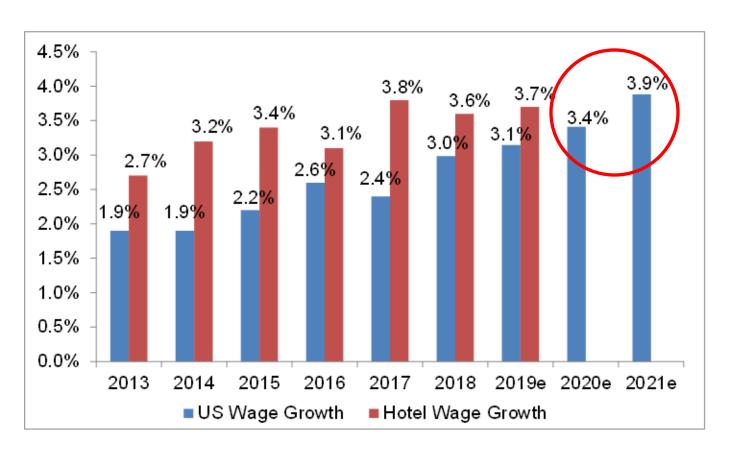

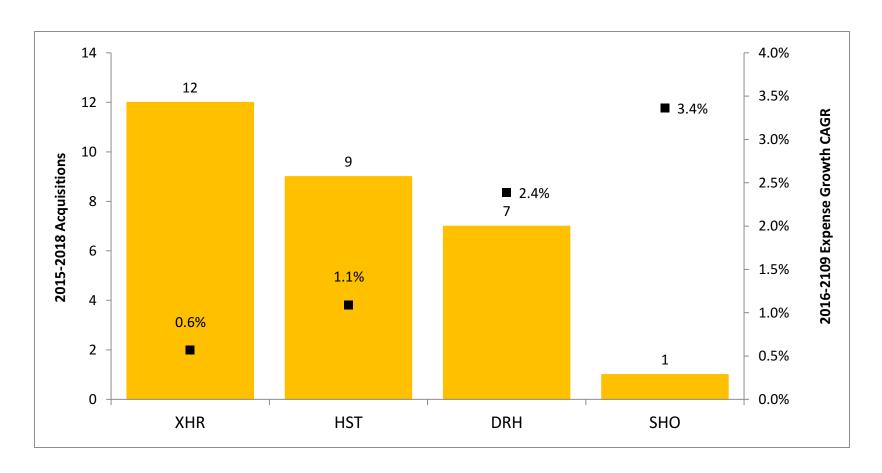

Consumer Spring Training Teach-In

Key Debate #2: Expense Growth Outlook? Macro Factors Suggest Expenses Will Be a Problem for Owners

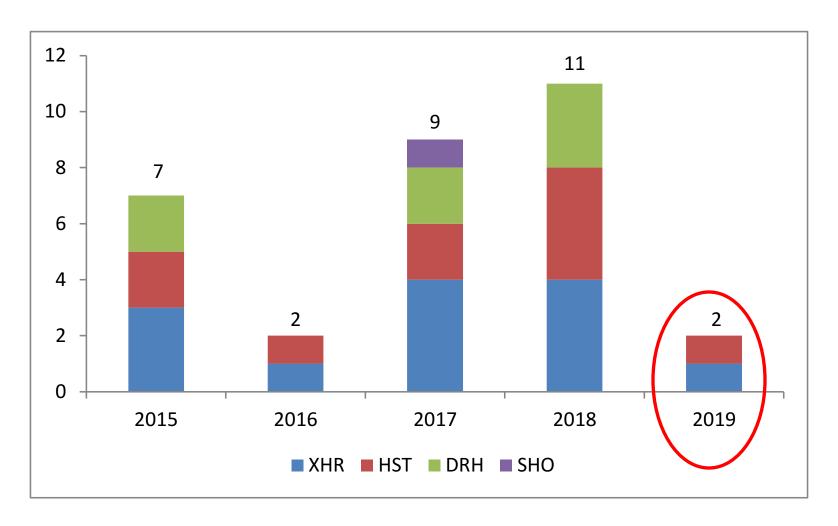

Hotel wage growth has consistently outpaced US wage growth since 2013

Lodging REITs have used new hotels in past to manage costs...

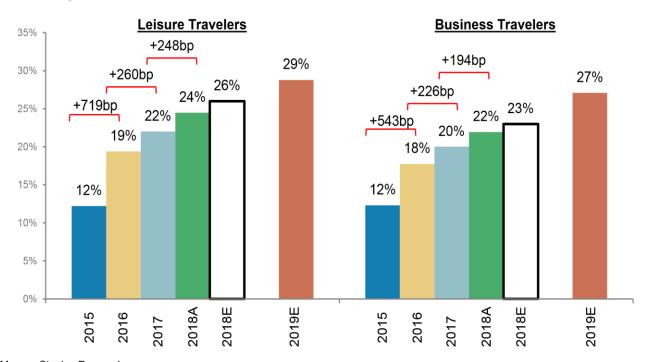

...But Lodging REITs were able to buy only 2 hotels in 2019

Key Debate #3: Threat of Alternative Accommodations

- We conducted a survey of 4,000 consumers in 4 countries (US, UK, France, Germany) to track adoption trends by country
- Alternative accommodation adoption in 2018 was ~200bps below last year's forward expectation for leisure travelers, ~100bps below for business travelers. Also slowing penetration

Consumer Spring Training Teach-In

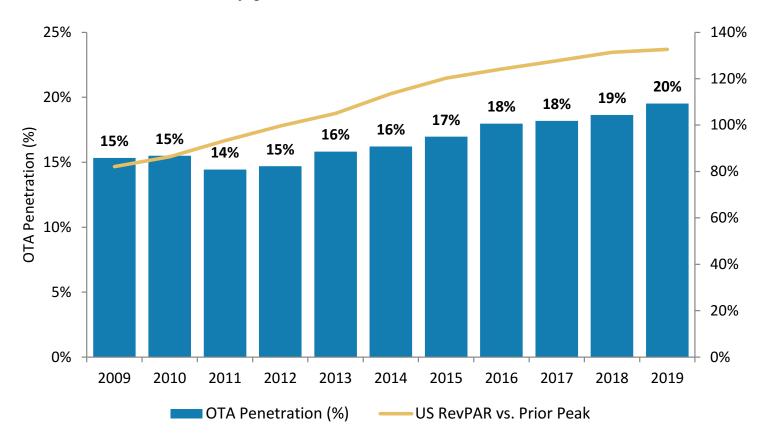

Key Debate #4: Threat of OTAs

 OTAs are the most expensive booking channel for hotels, so hotels try to minimize their distribution mix

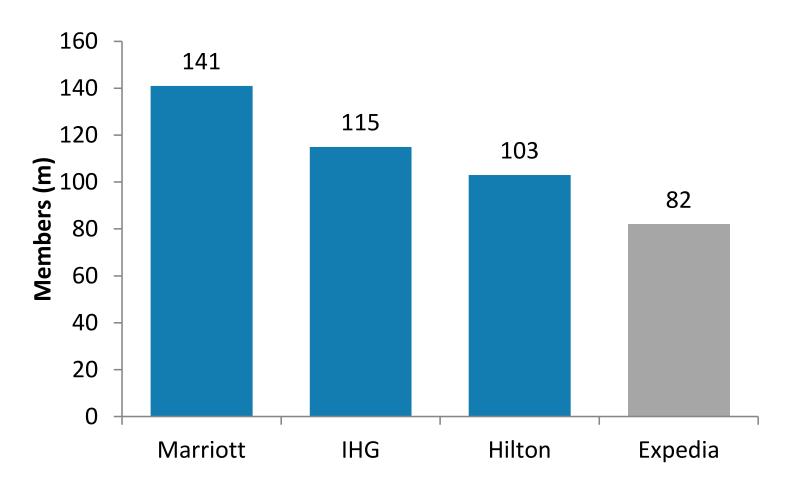

% of Rate	Cost to an Owner
Brand.com	1-4%
OTAs	10-20%+
Call centers	4-8%
GDS, etc.	8-10%
Property direct	3-5%

Threat of OTAs

OTAs continued to modestly gain share of distribution

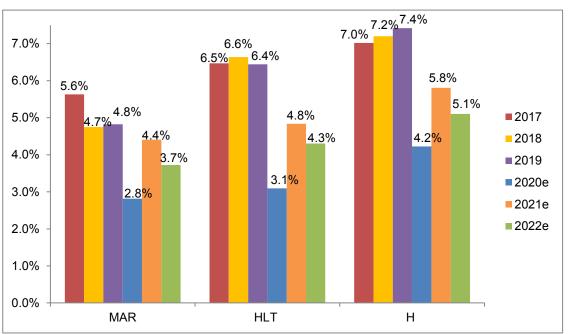

Threat of OTAs: Largest hotel brands have built loyalty programs to combat

Key Debate #5: Net Unit Growth Risk

- MAR, HLT, and H have been growing units between 5-7% the past few years, supported by a robust development environment and taking share of future rooms
 - MAR noted at YE19 it had 7% of existing US room supply and 19% of future rooms, while HLT is growing faster
- Due to COVID-19, we expect their unit growth to decelerate to 3-4% in '20, accelerate to 4-6% in '21 as delayed projects get finished, then decelerate in '22 to 4-5% as projects won't get started in '20

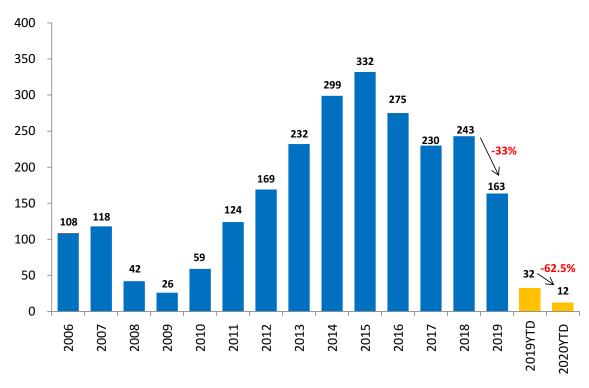

Source: Company reports, Morgan Stanley Research estimates

Consumer Spring Training Teach-In

Supply Risk: Compression Nights in Top 25 Markets

- We believe traditional supply and alternative accommodations have put pressure on the ability of hotels to charge premium rates on nights with close to full (>95%) occupancy
- 2019 compression nights (>95% occupancy) declined 33% y/y due to demand weakness and we expect this issue will persist into 2020 give the spread of coronavirus
- YTD compression nights have declined 62.5% y/y

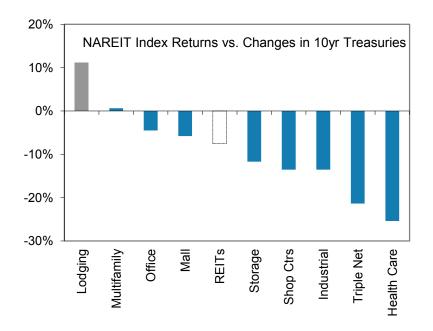

Consumer Spring Training Teach-In

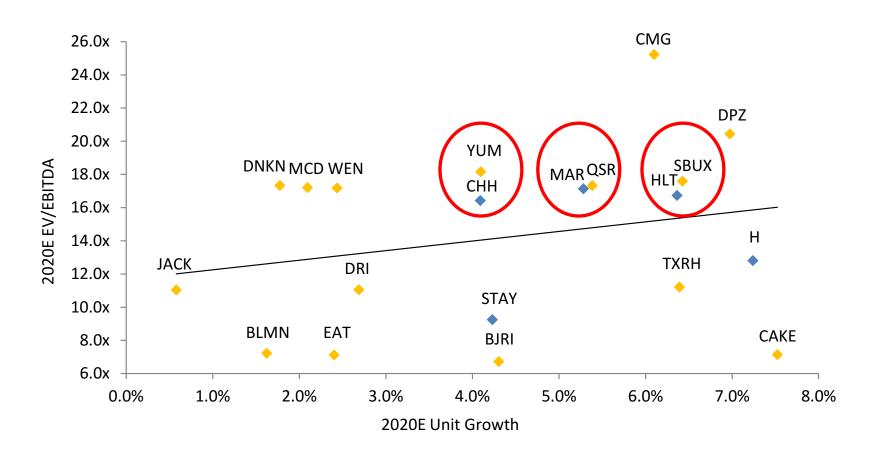

Key Debate #5: Interest Rates: Unlike Other REITs, Falling Rates Not Great for Lodging

- Lodging stock prices (including REITs) have historically had a positive correlation with interest rates
- Falling rates typically signal worsening economic conditions which bodes poorly for lodging cos
 - Hoteliers are unable to increase room rates on a daily basis as compared to office leases where rents are locked for longer periods of time

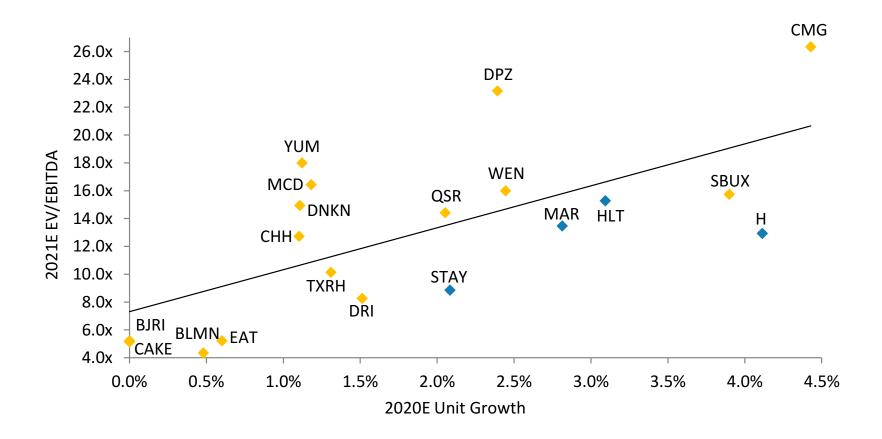

Lodging REITs have the opposite correlation to rate changes vs. other property types

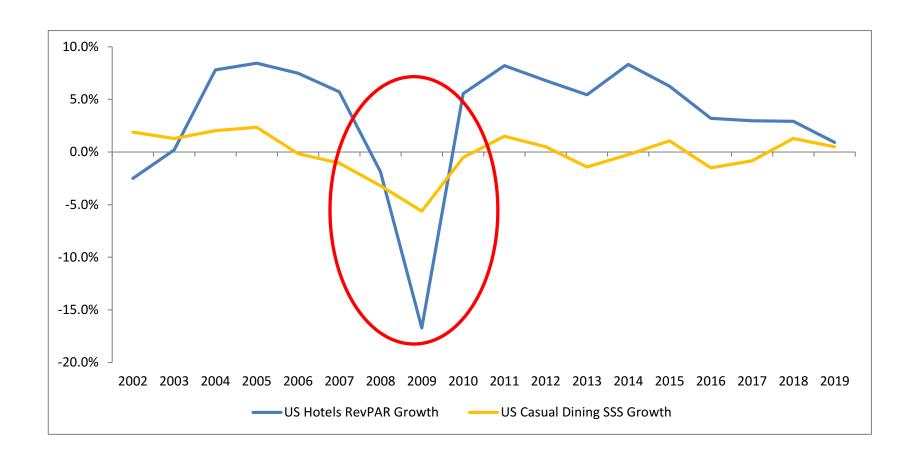

C-Corps and Restaurant Multiples Converged at the Start of '20

...But They Have Since Diverged...

... As Hotels are meaningfully more cyclical than Restaurants

The equity research analysts or strategists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality of research, investor client feedback, stock picking, competitive factors, firm revenues and overall investment banking revenues. Equity Research analysts' or strategists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

Morgan Stanley and its affiliates do business that relates to companies/instruments covered in Morgan Stanley Research, including market making, providing liquidity, fund management, commercial banking, extension of credit, investment services and investment banking. Morgan Stanley sells to and buys from customers the securities/instruments of companies covered in Morgan Stanley Research on a principal basis. Morgan Stanley may have a position in the debt of the Company or instruments discussed in this report. Morgan Stanley trades or may trade as principal in the debt securities (or in related derivatives) that are the subject of the debt research report.

Certain disclosures listed above are also for compliance with applicable regulations in non-US jurisdictions.

STOCK RATINGS

Morgan Stanley uses a relative rating system using terms such as Overweight, Equal-weight, Not-Rated or Underweight (see definitions below). Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold and sell. Investors should carefully read the definitions of all ratings used in Morgan Stanley Research. In addition, since Morgan Stanley Research contains more complete information concerning the analyst's views, investors should carefully read Morgan Stanley Research, in its entirety, and not infer the contents from the rating alone. In any case, ratings (or research) should not be used or relied upon as investment advice. An investor's decision to buy or sell a stock should depend on individual circumstances (such as the investor's existing holdings) and other considerations.

Global Stock Ratings Distribution

(as of April 30, 2020)

The Stock Ratings described below apply to Morgan Stanley's Fundamental Equity Research and do not apply to Debt Research produced by the Firm. For disclosure purposes only (in accordance with FINRA requirements), we include the category headings of Buy, Hold, and Sell alongside our ratings of Overweight, Equal-weight, Not-Rated and Underweight. Morgan Stanley does not assign ratings of Buy, Hold or Sell to the stocks we cover. Overweight, Equal-weight, Not-Rated and Underweight are not the equivalent of buy, hold, and sell but represent recommended relative weightings (see definitions below). To satisfy regulatory requirements, we correspond Overweight, our most positive stock rating, with a buy recommendation; we correspond Equal-weight and Not-Rated to hold and Underweight to sell recommendations, respectively.

Morgan Stanley Research does not provide individually tailored investment advice. Morgan Stanley Research has been prepared without regard to the circumstances and objectives of those who receive it. Morgan Stanley recommends that investors independently evaluate particular investments and strategies, and encourages investors to seek the advice of a financial adviser. The appropriateness of an investment or strategy will depend on an investor's circumstances and objectives. The securities, instruments, or strategies discussed in Morgan Stanley Research may not be suitable for all investors, and certain investors may not be eligible to purchase or participate in some or all of them. Morgan Stanley Research is not an offer to buy or sell or the solicitation of an offer to buy or sell any security/instrument or to participate in any particular trading strategy. The value of and income from your investments may vary because of changes in interest rates, foreign exchange rates, default rates, prepayment rates, securities/instruments prices, market indexes, operational or financial conditions of companies or other factors. There may be time limitations on the exercise of options or other rights in securities/instruments transactions. Past performance is not necessarily a guide to future performance. Estimates of future performance are based on assumptions that may not be realized. If provided, and unless otherwise stated, the closing price on the cover page is that of the primary exchange for the subject company's securities/instruments.

The fixed income research analysts, strategists or economists principally responsible for the preparation of Morgan Stanley Research have received compensation based upon various factors, including quality, accuracy and value of research, firm profitability or revenues (which include fixed income trading and capital markets profitability or revenues), client feedback and competitive factors. Fixed Income Research analysts', strategists' or economists' compensation is not linked to investment banking or capital markets transactions performed by Morgan Stanley or the profitability or revenues of particular trading desks.

The "Important Regulatory Disclosures on Subject Companies" section in Morgan Stanley Research lists all companies mentioned where Morgan Stanley owns 1% or more of a class of common equity securities of the companies. For all other companies mentioned in Morgan Stanley Research, Morgan Stanley may have an investment of less than 1% in securities/instruments or derivatives of securities/instruments of companies and may trade them in ways different from those discussed in Morgan Stanley Research. Employees of Morgan Stanley not involved in the preparation of Morgan Stanley Research may have investments in securities/instruments or derivatives of securities/instruments of companies mentioned and may trade them in ways different from those discussed in Morgan Stanley Research. Derivatives may be issued by Morgan Stanley or associated persons.

With the exception of information regarding Morgan Stanley, Morgan Stanley Research is based on public information. Morgan Stanley makes every effort to use reliable, comprehensive information, but we make no representation that it is accurate or complete. We have no obligation to tell you when opinions or information in Morgan Stanley Research change apart from when we intend to discontinue equity research coverage of a subject company. Facts and views presented in Morgan Stanley Research have not been reviewed by, and may not reflect information known to, professionals in other Morgan Stanley business areas, including investment banking personnel.

Morgan Stanley Research personnel may participate in company events such as site visits and are generally prohibited from accepting payment by the company of associated expenses unless pre-approved by authorized members of Research management.
