Host A Minecraft Server On Repl.it!

Host A Minecraft Server on Repl.it!

be aware: the free plan has 500mb ram which isn't enough for a minecraft server

On this tutorial we will be leaning learn how to create a Minecraft Java server hosted on repl.it.

Many individuals have needed a Minecraft server before but they do not wish to play expensive fees to host one. On server stat will be displaying you how to create a Minecraft server in repl.it totally free.

You will want

1. a repl.it account
2. hacker plan (optional if you want your server to be on 24/7)

How you can do it

1. first fork the challenge
2. run the venture
3. It'll ask for an ngrok token
4. to seek out your ngrok token click on right here
5. it's possible you'll must create an account if you haven't already
6. you ngrok token will be the text covered in red on this image Don't SHARE YOUR NGROK TOKEN WITH Anyone
7. follow the steps in the terminal when working this system

How to affix the server

1. load minecraft
2. click multiplayer
3. enter the ip from ip.txt
4. benefit from the world

Learn how to replace the server to the newest version

1. go to https://www.minecraft.web/en-us/obtain/server/
2. click the button as proven on this image
3. exchange the server.jar file on the repl.it mission with the server.jar file you created
4. your Minecraft Server is now up to date and ready.

Host the server 24/7
sorry however that is for folks with the repl.it hacker plan. You probably have it great!
