# Adobe® Creative Cloud™ for teams

## You're all on the same team. Start creating that way.

Welcome to Creative Cloud for teams. Keep your team on the same page with the entire collection of Creative Cloud desktop apps, services, and business features. Share files and capture feedback—all in one place. Creative Cloud for teams offers two plans—complete and single-app. Opt for a complete plan that includes all Creative Cloud desktop apps and services, or a single-app plan that gives you access to one Creative Cloud app (such as Adobe Photoshop CC or Illustrator CC) and select services. With both plans, you can maximize your budget and leverage centralized administrative tools that make it easy for IT to purchase, deploy, and manage Creative Cloud along with meeting the changing needs of your team.

**All the tools you love. Totally re-imagined.** Get all-new desktop versions of your favorite creative tools and services. Immediate access to new features and updates. And that's just the beginning. Because now, your favorite applications, including Photoshop CC, have been rebuilt to support a seamless creative process. With Creative Cloud for teams, everything you need to create intuitively and collaboratively is included.

**Simplified license management.** Creative Cloud for teams makes it fast, simple, and affordable to add or reassign licenses and manage all complete and single-app seats together under one membership agreement. So you can scale with your workload while keeping everyone in sync. Plus use administrative tools to centrally deploy, and simplify how you manage creative tools across your organization.

**Cloud storage.** You get 100GB with the Creative Cloud for teams complete plan and 20GB with the single-app plan. Save to the cloud right from your tools, or drag and drop to your Creative Cloud folder. Every layer is maintained. Make edits, capture feedback, and collaborate better.

**Connect your work and your creative community.** With Behance® now integrated with Creative Cloud, you can find inspiration, showcase your work, get feedback, and gain global exposure for your portfolio.

**One-stop publishing.** With the Creative Cloud for teams complete plan, creating is just the beginning because your membership includes everything you need to publish your work in immersive and engaging new ways. You can build and publish websites, mobile sites, iPad apps, and other content for any medium or device.

**Expert training and support.** Sharpen your skills and master new tools with a growing library of exclusive video tutorials from experts at Adobe and leading partner companies. The Creative Cloud for teams complete plan includes exclusive expert support—each member of your team gets two one-on-one sessions with an Adobe product expert per year.

**Lower costs.** You get the entire collection of Creative Cloud tools or a single application of your choice, plus all feature updates at no additional cost.

**Hassle-free compliance.** Your teams have immediate access to creative tools and can maximize their productivity at home and at work by being able to install their software on two machines. At the same time, reduce the risk of compliance and maintain complete IT control.

---
