About us:

Biobritte Agro Solutions Pvt. Ltd. has been established as a major mushroom research and training company in western Maharashtra with primary objective “to produce, promote, trading, marketing, developing agriculture produce includes Mushrooms and its cultivation and other ancillary processes.”

One of our Company's objectives is to foster confidence, assistance and instruction through the likelihood of foreign trade opportunities and creating export base for mushrooms and other agriculture produce.

Please note, the products listed below are produced without use of Bavistin and Formalin or any other fertilizers or chemicals.

(We use heat sterilization for destroying microbes present in mushroom growing substrates. Due to the energy costs, product costs are also increase which makes our products slightly costly.)
