In 2022, many had to switch to paying for their transactions with cryptocurrency.

This was the best option to continue working on old projects.

And in order to withdraw my money, I had to look for an exchanger, so I met Paytiz

Before working with him, I read reviews and checked the time of their collaboration, and found out that they have been working for 6 long years.

At first I made several transactions and everything was fine, I created an account on their website to make it more convenient

The screenshot shows the BestChange website interface. On the left is a search table for various cryptocurrencies. On the right, the main content area displays the exchange rate for Tether ERC20 (USDT) to Visa/MasterCard USD, along with a table of exchange points.

When exchanging small amounts (up to \$400-600 presumably), you are unlikely to encounter this. That is why my first transactions on the site went without a hitch. By the way, this was not the only exchanger I worked with, so it did not arouse any suspicions until it was time to order serious services in the IT market of NYC, US. The amount of \$ 1600 flew to the exchanger how good day.

The fraud scheme is simple, they invest the client's money in the exchange, and wait for the profits to grow, and then, if everything is fine, they give your amount back.

At the time of this writing, I have not received a refund of my money, nor the execution of the USDT exchange contract.

Be careful and remember that they will steal your money
