

# After the Demand is strong, You May always find right Resources online for Virtually Any task

Hello and happy to return. Today I would love to inform you quite quick story about my attempts at greatness. No, none of that stuff today, because most of recent attempts have failed. I must say, do not try to make something which others have many times more than created and perfected.

Always work to strive for your own, even if it is a really popular and beaten up concept - to succeed with this, you always need to incorporate your own, introduce a few (item ) special that is you and the thing. . You understand what I mean? It's creative and hard process occasionally forgets that imagination comes from inside, that y'all endeavors will sooner or later start copying parts of each other, integrating, inter-looping and inter-connecting to become one authentic good organism of your conscious attempts at greatness. .

Did I attempt? I truly gave it my best!

That's what I say after my recent effort to create my own location to upload and download and save youtube videos to your laptop and upload them to other networks and societal video platforms such as Aparat, FC2, Weibo, Odnoklassniki, etc.. Cause video should circulate the Earth, you know? It requires to immediately cross platforms without boundaries flow into all the net connected entities and libraries, platforms and storage archives... It has to be maintained for the future generations. .

In any case, my attempts... Well... I had to drop them... There's too much work inside, an excessive amount of support required. I did look to it, I must be honest. . And besides big number of servers and proxies involved, this will have to be profitable, so after few months trying and losing a few thousands of dollars on infrastructure, this part of my life is over.

Therefore I use "their" Youtube downloader

Of course "their own" in this case means "somebody else, not mine". . I really don't understand them, they don't know me. My favorite these days is Youtube downloader - it's super quick, it works good with Youtube and 100s of other sites, and it's just the nicest strangest portal site to download online videos. There is no API, therefore my private project of movie exchange between programs is postponed until I see a fantastic enough support system. Nothing in the works at the moment, and after seeing how it all turned out, I realized better leave this to people who know what they're doing. .

It is pretty cool, I like the darkness. . Try enter some search words - it provides popular localized search tags, so pops out distinct hints so you don't have to keep typing...

Conclusion

From now I just try to stick to my strengths, that will be many things but making such sites...

Making one is half of the work - the key is the support day in, day out...
