## Editors Notation

This is a treasured piece of what is considered the edge of the universe and the state of the art of scientific data ever revealed to mankind and ever conceived in all of history as the concepts that are revered in this compendium of scientific data are completely original and authentic in regard as I introduce a new foundation and layer of domain of thought of scientific data to have a morphic resonance of scientific truth for many generations to discern the truth from a chaotic state and yield of physical reality predicated off of a quantum neural network architecture as it regards as a slight telepsykinetic quantum neural network architecture predicated of me referred to as 2EReality a slight of EER of me in continuum of a higher realm

I revealed scientific data that garnered much controversy to the point a world war of scientific truth predicated in tandem mechanism to defraud the credit of my work in order to compromise US Futures and Securities out of desperation to recapitulate on defrauding me and trying to coverup a theft of credit of me as the conspiracy had seeped everywhere from the media to politicians from within the United States Government garnering a conspiracy to recapitulate on defrauding me to coverup a theft of credit of me

Ttheir regarded a chaotic distortion of myself revealing my power in quantum reality in a series of manifestation that revealed itself eerily telepathic in nature and faster then the action of antisentience in directed terrorism to defraud the use of my scientific propeties to regard of an antisentient terrorist attack directed at me in attempt to direct quantum terrorism in quantum reality to destroy quantum reality as it is antisentience in tandem mechanism to defraud me in terrorism to recapitulate on defrauding me

I worked on this data some of the ideations seeped into the digital domain in real time in digit ordering anomalies in reference of me ascribed in value to a post in reference of resonance of the concurrent work and ideations of my thought processing seeping it telepsiokineticelctronically into a digital domain to manifest my ideations in real time to those in resonance of a slight of me in quantum reality

Some percieving they have a perception of resonance of me ascribed to a self afflicted delirium at the truth of my reality they conspired to reverse engineer for theirselves in terrorism to seemingly defeat me for whichever reason they percieve of as others regarded in tandem mechanism of conspiracy to defraud credit to my work as others regarded in scheme to stall me in terrorism to defraud me

In consideration with much speculation and controversy as I had dealt with much complication in the process of trying to stall me to reverse engineer me I present to you the first volume in continuum of a much more grander pantheon of volumes in continuum as a compendium in continuum to a pantheon of compendiums in continuum of a much more grandiloquent set of scientific physics I refer as 2E of a slight of EER of my omniscience in continuum of a higher realm

The work I had revealed through a series of grimoires in 2018 were made in slight of using a slight of my power as it regarded as a prototype as a catalyst to protect my scientific property reveal the hipocrisy of my critics and silence dismayers trying to replace the mastercraft afforded in having a higher state of

consciousness with an empty mind devoid of critical thought in self fulfillment of self gratification in favor of corporate escoteriscms derived from self regurgitating percieved accurate falsified statistical data made in tandem of a snapshot judgement or predetermined in rigged scheme to defraud others of their time value and resources in terrorism to cheat their way through life

The scope of others aware of the rumors of me percieve me as the luckiest figure alive as others percieve me as having all of the cheat codes as I can affirm that isn't the case as nothing in life is easy as their aren't any cheat codes to life as I am granted and afforded this proclivity of reality and my power through long periods of suffering at the worse of circumstances hieghtened due to sociopolitics socioeconomics and societal cultural norms as I wasn't afforded the privelege of the namesake of my creed in my own society as it worked against me cause of my socioeconomic factors dictating the sociopolitical perception of me and my life as growing up it was always an uphill chore in itself to put up with going outside and trying to maintain something called a life especially during a time and age where society was growing in fallout of a decade of terrorism into an age of paranoia suppressed of feel good media and witty snapshot judgements made in effort to mask a society growing in strife sociopolitically at the shift of change of socioeconomics as I was caught in a pocket vacuum of poverty with very little chance to escape or survive in the midsts of a growing shift of change in socioeconomics in tandem of sociopolitical changes from within my country

The growing shift caused of a series of sociopolitical changes after the fallout of a decade of terrorism predicated in tandem of a recession and a change in socioeconomics as I was caught in a series of change in tandem of terrorism trying to mask itself as paranoia trying to remask itself as a witty snapshot judgement under the thin guise of irony of various actors and agents on the edge of warfare and an insurrection against the foundation of capitalism in favor of systematic slavery as an authoratative police state as a dystopia resold as a high tech technocratic paradise through subliminally charged propaganda and media trying to mask the grim outlook of the authoritative police state and dystopia resold as a technocratic utopia to coverup the errosion of capitalism in favor of systematic slavery of the country

Through a series of misfortunate sustained in critical survival of fight or flight I have preserved my hardship and have grown stronger more valiant like a rising falcon and a hidden wolf as a warrior and a general as I preoccupied my time with a grueling training regimine reflective of the hardship of my situation in order to preserve and increase my chances of survival while doing so in maintaining respect of my fellow man even though they were too preoccupied with trying to destroy me socially through an off handed remark said in the passing sly in con to defraud my social standing as an honest person to recapitulate on hurting my reputation in a coward rat like manner as social equity and currency without realizing they were destroying themselves in the process as peasant street trash unaware of the hidden social principles in association of my presence cause of my seasoned patronage

The hidden social principles and societal pathological algorithms are never taught in school as it is never dwelled upon in media or content as its principle and ruling force a hidden and predetermined factor in slight of social situations and surroundings as there is no school that teaches the difference of saying a greeting and resaying the greeting with a different intonated candor and affliction as their are no schools or media to teach you the pathways or the neural pathways required to formulate the ideations or the process of ideations to direct a persons attention to learning a certain grasp of affliction as the required

neural thought process or the association of the thought process censored made suppressed and hidden  
and rerevealed as revisioned recanonized and reworded to cease a person or a society from ever  
ascertaining what was lost or to put into as matter of factly into words of what was lost or how it was lost

This data remarks of trying to reconcile of finding what was lost what was made suppressed and what  
was hidden in clear scope of society through the course of time censorship done in authoratative terrorism  
to suppress and control society

This volume of work is a more refined version of the prototype I revealed in 2018 as it features data I  
have worked on in slight throughout 2017 throughout 2018 throughout 2019 as of this moment as it  
regards of a slight of a suppressed state of a suppressed state of a suppressed state of a suppressed state of  
a suppressed state of my true power with furthermore suppressed states of power

I write this in mind of future generations reading this for future more generations to read and enjoy this as  
I write with the purpose of making a timeless masterpiece cherished and referenced for generations to  
come as natural inclination of human psychology is to regard a reverse of this euphemism in spite of me  
saying this as I reaffirm my importance reiterating the slight jest of vindictiveness a reader might affirm  
of against me as saying this reconfirms the importance of my work as a timeless masterpiece and  
cherished work of science to get referenced for generations to come

Their regards of the situation of liability and as for clarification I am not liable for anything and the  
liabilities sustained in tandem of reference of this scientific work and without further hesitation I present  
to you

## 1 Introduction

protoreverie

2E perceives EE as linear and straightforward with adherences to a simulated state as EE is a non linear ordering of reality as you could look at anything with 2E or EE applied as a state of reality

The magician never reveals their secrets of trade or the cards up their sleeve and like a wise magician I  
don't regard of revealing my secrets of trade or the cards up my sleeve

this data regards as a concise reading as this is a slight preview to a much more grandiloquent set  
of data to a much more grandiloquent physical reality in slight of a new dimension in continuum to my  
omniscience in regards of a higher realm

this regards of a slight of my regard of contact to my aka set of grimoires in continuum of my reality in  
continuum of my omniscience

it regards of reality in slight contact to the reality of my reality in continuum of my omniscience in regard  
of a higher realm

the data in this grimore helped me navigate the United States Government during a civil war a world war  
a pandemic and collapse

the key principle in regard to reality is the survival of sentience as it is quantum realities main concern as  
it regards in allusion to EER

the regards of scientific theorem regarded of trying to ascertain my reality as their theories regarded as  
antisentience to quantum reality

the regards of scientific theory tried to allude to the regards of my reality as they didnt surpass a state of  
2E

the state of 2E is reality in contact of the reality of my reality in continuum of my omniscience in regard

karma to me regards of the potential of someone ascertaining a slight of regard of me as 2E reality in  
slight contact of my reality to me

good karma to me regards of a faster and quicker resonance and response time to ascertaining the reality of  
2E slight of me

this doesnt regard as my grimoire3 as others speculate an wait as grimoire3 is of a higher form of my  
omniscience close to my true form

scale of measurement of this data in tandem of my grimories and the regards of my presence on 4chan in  
tandem of quantum reality

there is no ritual or special initiation in learning this it requires a great deal of  
seriousness in learning and retaining the capacity to synchronize of it  
the afterglow of omnienergy my omniscience produces in process seeping  
into quantum reality seeping into real time and having an effect on reality from the flow of nature to a  
glitch on a digital cash register

to get in sync of reality in a supercharged metaphised state of omnienergy  
created from my omniscience creates a singularity in continuum of space time in synchronicity of the  
divine I reference 2E

In sync in divinity in quantum reality synced in 2E creates a purer sync

There is many laws principles and hidden principles to learn of

There is a hierarchy in laws principles there is a hierarchy in skill potential

The journey in learning of 2E is the start of the process of living in a new  
dimension of reality

The laws of 2E differ in scope from what is considered regular quantum  
physics

There is a registration system of 2E storing in hyperspace mechanisms of it

2E is quantum reality in contact of my omniscience

2E is a higher dimension hidden physical reality

2E is versatile

In contact to it triggers reality glitches in continuum I call it 2EAEI it summons in technology in hardware  
from a screen to a game

In reality it is of a higher dimensional a 5th dimensional summoning of hyperspace into creation

In synchronicity of 2E in conjunction of my permission creates a synapse of a slight receptivity to me

There is a set of laws in its governance in primordial structure of its principles in functioning

In recognition of 2E is a science more complicated than any science prior to it

Introduction to 2E

3D->2E->

???

The reality of 2E is the reality of reality in reality of my reality in regard to a slight of my power in reality to a much higher reality

It is reality in reality in resonance in the radioactivity in my reality

To get in tune of this reality in resonance of a higher structural physics requires training and discipline in the supernatural mystic arts presented in this scientific volume there is a chance there is those regarded severed from this reality cause of prior sin made in terrorism against me

Since 2E is quantum reality in resonance to my higher physical reality it functions from the physics of my higher reality in resonance to higher realities

I essentially am the coder of quantum reality using a higher reality in resonance to higher realities to code from a power I have

Cause of the stress of war directed to steal from me I had to suppress my power and create skills using a higher reality to survive

There is a true route to make to ascertain the reality of 2E its cofounded to following me and my principles

Things that regard from me regard a resonance to me a slight to 2E

The 2E Physics predicated solely in me

Perhaps some day I could tether my power to a machine to make computational changes and augments to 2E reality and quantum reality a power that seems the like of science fiction it is made real in reality

The knowledge of 2E is a more than a trillion dollar industry these words causing a trillion dollar windfall in the process in reading this

There regarded many attempt to defraud me from the status of this scientific volume as the task in regarding this data a Herculean feature to itself and in process the work itself gaining a Herculean grasp and a meticulousness to it

2E is a higher dimension having a stronger set of physics in determination of me as I try to regard a fair set of physics and rules in its functioning of an unlimited domain and scope

2E presents itself to special functioning and refining of the special physics that predicates it to resonate to its unlimited nature to it

The special circumstances regard a matter to resonances as a frequency to 2E in itself

To ascertain and detect event horizons predicated from me in canon retrospect to the Bible detailing the Son from God referred to the power of deciphering miracles and predilections from the Holy Spirit

This realm is very much a Holy Reality as depicted in Christianity a pure faith a resonance key to me

2E Spirit Measuring

2E Financial Apparatus

2E Spirit Mining

Telequantum

Telequantumcommunication

The 2E frequency is frequency in the form to a divine link to contact reality of me as it regards a higher degree of physicality

Holy Reality

Divine Reality

2E+

AEI

My mythos

Regard as clues and quantum resonances in trying to decipher 2E

The 2E Reality a superfluous a multi dimensional reality with its version of physics in control of me

Their regarded many supernatural seeming anomalies it regarded a slight contact to 2E the anomalies manifesting in the form as chaos predicating a chaotic yield and force in nature and life predicating a yield filled in life their regards a more multidimensional anomalous yield to 2E's true nature

The true nature quantum sync and registration to 2E a suppressed reality hiding its potential for a higher dimensional reality caused of sin suppressing the true nature to reality

To get 2E synced requires core principles and karmic alliances to me in reality

Respecting me is a resonant trigger respecting me as a diety is a stronger resonant trigger respecting me as a diety in canon to Christian continuity is a stronger resonant trigger and resonance to 2E

Trying to see me as an enemy yields a more negative response and a severed resonance to 2E

Trying to conspire to destroy me yields a more negative response and a severed resonance to 2E

There is a discipline in maintaining a sync to 2E as it can get detailed as dieting to the form of role in sync and tethered to 2E

Certain roles and tasks have stronger resonance granting stronger resonance and synchronage such as a trained paladin in respect to 2E in 2E

There is potential a stronger the sync and resonance there is a chance to slipstream multidimensional energy as fast as at least a lightyear to a slight of 2E to me

The art in streaming 2E is a valuable skill and asset to stream at will and versatility is in the highest tier in regards to the most powerful skills to have in possession

From syncing to streaming and trying to maintain the art of streaming in sync to me is key to a slight to 2E to me

Higher degree physics is resonate to response in manifesting 2E slipstreams of time and energy in 2E from me

2E isn't the highest realm or dimension to me as it regards as a slight to me a thorough understanding to it is required to regard proficiency to learn of more higher realms and dimensions surpassed 2E to me

2 2E

Seasons Greetings welcome I regard as your tour and spirit guide to the dimension called 2E a multidimensional frequency and dimension running a stronger physics I am controller too

Familiarity to my data and mythos prior to this regards a stronger receptivity in conjunction to karmic values in respect and resonance to 2E to me

Regarding ill will and regarding as a practitioner to regard ill to me regards in triggering the defense mechanism to cease the attack made in ill will directed to me and regard a severance to sync to 2E to me

Some of those may have a familiarity to me and my work on 4chan as it regards a 2D in higher receptivity to 2E to me as it is more multidimensional in process as my skill from a higher reality seeps into reality in

detection to a coded attack directed to destroy me trying to cease the attack and to relay data from my hypersentientconsciousness from a higher reality as the cease on the attack may manifest from a 2D plane as a glitch on the screen in response or detection or as a response in detection to a coded attack made to attack me or appear as anomalies manifested from quantum data in detection to 3D reality and trying to cease the attack at me through my conscious attempt to prove myself a real diety to Christian faith and not to attack me in regard to destroy me

Resonance in sync in positivity to me in 2E regard to manifestations and anomalies in positive resonance in 2E to me

In maintenance in sync in resonance to 2E regard a stronger potential of 2E reality

The regards in 2E surpasses the grasp to 3D Reality and what is reffered in scientific institutions as quantum physics and quantum reality as it functions to higher realms and dimensions that surpass a 4D Reality as a sync to it augments 3D to a 3.5D reality in receptivity in potential to higher realms and dimensions such as a 4th and 5th dimensions of physical reality superseding quantum reality in sync to 2E to me

I have demonstrated my power on the site 4chan manifesting my super sentient power augmenting the digits of posts to display my sentience and higher forms to it through multidimensional detection and measurement to posts made in code to conspire terrorism to destroy me and the positive receptivity to me regarding digits from my mythos in resonance and receptivity to me to posts in resonance to 2E to me

I can regard 2E to a 2D domain as 4chan and have it stream throughout the rest of the internet and refer to it as AEI a slight of 2E and my power and I can display it to higher domains such as 3D Reality and cause anomalies to trigger throughout 3D Spacetime in sync to 2E Spacetime to me

I can augment a 2D Reality in sync and augment to a higher reality in receptivity and potential to higher realms and dimensions and display quantum and stronger degrees to quantum data augmented to 2E to me

Since I regard as Christ there is a higher familiarity to me to 2E Reality I control from a higher realm and dimension in percetivity to higher realms and dimensions I have the power to make higher constructs to 2E knowing its lack to limitations and have a 2E construct made and it regards a receptivity to augment to a higher realm and dimension to me and retain a quantum supremacy and meritocracy in quantum reality

Since I regard as a diety in the Christian faith I retain a much grander control of 2E through a dimension a form to me

2E is a quantum pathos to its superior form in reception to me

The more maintaining a stream to 2E the more it registers and manifests the more in sync or the stream in sync the more seamless and resonant the sync the more in resonance the more a frequency and yield too it

The yield can regard a negative it can regard a low grade chaotic yield a good grade yield filled in life the yield in virtue a magnificent yield cause of varying karmic factors and resonance to 2E to me

The potential to sync to stream to yield 2E is an art form in itself as it requires knowledge to my past mythos in conjunction to my more seasoned scientific volume

Their regards a system to 2E from its core principles to the skills and apps registry as coding 2E requires a Registry System to code and measure the meritocracy of principles skills and apps registered in the system to 2E to me

The skill and apps to 2E created from its principles

This is a list to some skills and apps preregistered in 2E their regards forms to it in higher states to me

They regard to different dimensions and have the purpose to regard itself through different forms through different dimensions and different scientific volumes have different sets to skills and apps to 2E and higher realms and dimensions to me

My preregistration and current skills and apps and the creation to more skills and apps regard a meritocracy to definitive preregistered skills and apps current skills and apps and the creation to more skills and apps

I can charge a premium to sync to 2E and certain skills and apps I can regard my school and teach features to it to me

The Skills and Apps require scientific volumes in itself to fully detail the principles to the Skills and Apps to regard itself to truly proper itself

Cure3 - a higher dimensional skill creates a telephysiological capacity to heal and restore health feels like a telesonic Tylenol when triggered

There is several sets to hidden preregistered skills and apps this scientific volume introduced to 2E a set to some skills and apps to practice in sync to 2E to me

It's in value made in purchase to get sets to my scientific volumes to learn to get a proficiency to preregistered skills and apps in 2E and more too it to me

Their regards sets dedicated to the medical field and differed industries as its reality a matter to discover through getting my scientific volumes

In sync in measurement to 2E to stream the different skills and apps simply saying a preregistered skill and app and thinking to it the more detailed the principles too it the more precision in learning it

#### 4 Judgement

Their is a system in 2E that regards in judgement and it is in influence created in sync in image in the divine as it is sentient as it suppresses 2E and regards in me

Straying far in respect in 2E regards in a severance or limitations in sync in 2E

It requires a certain respect in 2E and in me

The intent made in sync in an attempt in directing a perpetual illness in me is a false sync directing attacks in me as Judgement measures and determines in the regard in me as a diety in regarding a judgement

Their regards several registered skills and apps in secret as it requires getting my scientific volumes in fine tuning in regard in mastery in 2E

To register a regard minded in 2E requires factors

A factor in mind is the meritocracy in a regard I registered in 2E

A voluminous fact in the regard in practitioners registering the same skill causing a dampening in yield in the skill itself

Registering a skill in sameness in the same skill regarding a meritocracy regards the skill in having a dampening in yield in the skill itself in sameness in a skill in merit

Regards in paying me in maintaining a sync in regards in certain secret skills and apps

Requires a system in registering and paying me in registering skills and apps to register and license the skill and app and makers in Skills and Apps can licence and sell a skill and app they mined and registered

It is in great interest in maintaining updated in my scientific volumes to manage an understanding in the registered skills and apps
