## How to troubleshoot Outlook on System?

The below techniques will help you troubleshoot Outlook not working issue:

### Try to disable add-ins

Having two add-ins can be conflicting for Outlook and may create a problem. Thus, try to disable all add-ins and check if helps in resolving the issue. Also try to open Outlook in safe mode and use this technique further.

- Begin Outlook in safe mode
- Choose File
- Then, select Options
- Next, choose Add-ins in the left-corner
- In Manage box located below Outlook options window choose COM Add-ins
- Then, choose Go
- Next, either take a screenshot or write down the add-ins list before you disable

- Delete all the selected checkboxes in COM Add-ins
- Then, choose Remove
- Thereafter, select File and then Exit
- Lastly, open the file and check if the problem is fixed. If not, go to another troubleshooting technique.

### **Try to restore Outlook**

- Firstly, close all applications of Outlook
- Search for Apps & Features
- Now, from the installed apps and features choose Microsoft office
- Then, choose 'Modify' option
- Next, click on Yes for 'Do you to allow this app to make changes to your device'
- Then, tap on Online repair and then the repair option
- Restart the Outlook after the process is finished
- In case, if Outlook doesn't work try to go for another solution

### **Repair in Windows 8 & 7**

- Close all MS Office applications
- Make a right-click on the 'Start' button
- Then, tap on control panel
- Ensure Category option is chosen in View by list
- Then, go to Programs and select Uninstall a program
- Thereafter, right-click on Microsoft Office and select Change
- Next, select 'Online repair'
- Then, tap 'Yes' for user account control window
- Restart Outlook and check whether the process is complete

### **Build a New Profile**

Outlook profile may have become corrupted, creating problems. Thus, creating a new profile and setting up with your email account can rectify the issue. Follow the steps given below:

- Choose file
- Then, select Account Settings
- Next, choose 'Manage profiles'
- Thereafter, select Show profiles
- Now, choose Add
- Next, create a new name in Profile name
- Then, go through prompts to setup your email account
- Now, Restart Outlook
- Choose File
- Then, select Account Settings
- Now, choose 'Change Profile'
- Thereafter, click OK for 'Outlook will close'
- Restart Outlook
- Then, choose the new profile name you created and tap OK

- And, open Outlook to check is it solved or not

## **Troubleshoot in Outlook 2016 and 2011 for Mac**

The following resolving techniques apply to Outlook:

- Open your Office application
- Then navigate to Help
- Choose 'Check for Updates'
- Then, choose Automatically Download and Install
- Lastly, again check for Updates

### **Recreate the Outlook Database**

- Close MS Office Application
- Press and hold the Option key and then choose Outlook icon
- Choose the identity of database you want to create
- Tap on Rebuild
- Lastly, restart Outlook when process is finished

### **Instant Help Desk**
