

Kamagra 100mg:

A Generic Pill to Treat Erectile Dysfunction

About Kamagra 100mg

- Kamagra 100 mg is a powerful drug that treats erectile dysfunction in men.
- Sildenafil Citrate is the active compound in the tablet, which helps to control the enzyme activity of PDE5.
- This drug is FDA approved; thus, this drug is safe to take.
- Besides, It is available at a cheaper price.

How do Kamagra 100mg Acts to Combat Erectile Dysfunction?

- Kamagra 100mg works as a PDE5 inhibitor medicine, which mainly acts to boost blood flow to the male organ.
- This drug works to inhibit the PDE5 enzyme and inhibit the degradation of cGMP, which is an important vasodilator.
- The muscles in the male organ get relaxed and blood vessels get dilated because of vasodilators.
- Increased blood flow to the male organ cause collection of blood in the male organ, which results in an erection.
- Effect of this medicine lasts up to four to five years.

How to Take Kamagra 100mg Tablets Accurately?

- Kamagra 100mg pills are the standard dose, you must take this medicine under supervision.
- Take a pill of Kamagra 100mg once a day when you want to indulge in sexual activity.
- Do not consume alcohol, fatty-meal, and grapefruit before or after taking Kamagra 100mg dose.
- Also, do not break or crush the pill.

Safety Measures of Kamagra 100mg

- Stick to the prescribed dosage and do not change the advised dosage.
- Do not take the Kamagra 100mg dosage if you are allergic to PDE5 inhibitor medicines
- If you are taking nitrates or alpha-blockers, avoid taking Kamagra 100mg.
- Women must avoid taking [Kamagra 100mg pill](#). Keep it away from the reach of children.
