# Solution To Troubleshoot MS Word Not Responding Issue: [office.com/setup](https://office.com/setup)

# 1. Disable all Add-ins:

To fix this issue, you should remove all the corrupted files and Add ins from your computer system for the better processing of the MS Word. For this, you should open the File. Then, you will get word options. After this, you should click on the Add-ins tab. Now, you have to click on the “Go” button which is closer to the drop-down box Manage Com-in Add. Here, you should click on the checkbox just to disable all the add-ins. Then, you should click on the okay button to continue.

## 2. Check Incompatible Device Drivers:

It is necessary that you should have the latest device drivers of Microsoft and Windows on your PC. For the latest updates, you should go to the settings and then just select update and security. After this, you should click on the automatic update and security. This will automatically update all the latest drivers of Microsoft and Windows on your PC.

### **3. Do Not Close the Word Document Without Saving Work:**

This is one of the silly mistakes which many people have done in their life. That is, they shut down the Microsoft Word without saving their work. This method affects the software of Microsoft Word. Hence, it is advised that you should always close the Microsoft word when you save all the data for the proper functioning of the Word application. If you apply this procedure then this error will not comes in future.

## 4. MS Office Recovery Application:

To fix this issue, you should go for the Microsoft Office Recovery Application feature. This feature will help you to bring back all the unsaved data.

For this, first you have to click on Start option. And then you should click on All Programs and then select Microsoft Office Tools. After this, you will find -MS Office Application Recovery. At this point, you have to select the document which is not responding from the list of recently running office applications. At last, you have to click on “Recover Application”. This will help you to recover all the lost documents.

The above method will help you to fix the MS Word Not Responding Issue. If you need assistance, then you should call the customer care of MS Office through [www.office.com/setup](http://www.office.com/setup).
