

BEAST TOKEN

WHY \$BEAST?

In an effort to be a philanthropic coin in the community, our primary goal is to give back.

More for the holders, more for people who support our project, and more for those we decide to help along the way.

Crypto is an incredible asset and our goal is to use the asset for good.

We have no doubt the benefits of BEAST TOKEN will be the NUMBER 1 asset used for generosity and good will in the alt space.

Not to mention we plan on primarily rewarding ALL of our holders with our marketing and increasingly focused efforts of maximizing exposure for the token.

This Cross-Chain token will be the most used of its kind...

Enter the world of the **\$BEAST**.

SAFE TO BUY?

BEAST TOKEN will be giving back, first and foremost, to its holders.

We also very much support the efforts of MrBeast and his generous nature, and want to follow suit by emulating his goals.

We don't want to own a **SINGLE TOKEN** of this project as developers, and

plan for the entire contract to be community owned and community driven.

Only people who market the coin may receive airdrops prior to presale, but everyone who gets that, will be announced and known as a doxxed individual throughout the community.

This keeps the integrity of the token safe and allows for this to grow massively.

We will renounce ownership immediately and let the community take over as stated.

HOLDER REWARDS

AirDrop

Each week, MrBeast releases a YT VIDEO on his main channel.

For every view that video gets in the first week, the developers will airdrop that many coins amongst ALL current holders.

The more you own, the more you get!

Distributions

MrBeast is famous for giving away MONEY every video!

Each video we will track the amount(s) of money given out, and randomly give that amount (10x) of tokens, to current Holders in the project.

If he gives out \$100,000- We will give out 1,000,000 tokens to a random holder.

This may be any amount!

UTILITY

Our goal is to have our token be fully supported anywhere that MrBeast products are sold.

Beast burger or MrBeast's website for example.

We want you to be able to buy food and products with our token.

Our main revenue sources will be generating giveaways,

lotteries, and raffles where a portion goes into the

project and a larger portion goes to helping those that

need it. In doing so, we will be able

to offer our holders the ability to buy these products at a discount by using the

\$BEAST token as payment.

DONATIONS

The giving *DOES NOT* stop there!

We will be using some of the marketing funds to further *GIVE* and donate and serve outside of the crypto space.

If we see a cause, as a community, that could benefit from our help and support, we will let the community decide if and where we send the funds. Crypto assets need to start being used for more good in the world, by us contributing to this good, we will grow more as a unit and a family.

Which is simply a pro from being able to help those who need it most.

TOKENOMICS

100B Supply

NO TEAM/DEV TOKENS

80% SUPPLY SENT TO UNICRYPT FOR LAUNCH

20% USED FOR GIVEAWAYS AND AIRDROPS

SELL TAX

13% TOTAL

(10%) BEAST FEE / (3%) HOLDERS

The sell tax is implemented in order to be able to give the community everything stated above.

Such as, buying MrBeast products at a lower cost, or the massive giveaways, etc.

Also, the sell tax is implemented so that the holders in the community are able to benefit.

This keeps holders from wanting to sell right away, as well as giving those who hold a reward for those who do choose to sell!

ROADMAP

Baby Cub Phase - Phase 1

Launch Website
Whitepaper
Contract Audit
KYC
CMC Listing
CG Listing

Teen Beast Phase - Phase 2

Minor CEX Listings
dApp/Store
3,000 Holders
NFT's
Foundation Setup for Donations
Weekly Distributions in full effect

Mr. Beast Phase - Phase 3

Larger CEX Listings
Giveaway raffles setup and integrated
10,000 Holders
Large Foundation Donations
Holder Spotlight charity

FULL BEAST MODE - Phase 4

Large Giveaways of the Token
MrBeast Support

CLOSING STATEMENT

A MESSAGE FROM THE DEVS

We designed this token with the vision that this space needed an asset that was able to be trusted and implemented as a utility immediately. With support from the MrBeast community, the moon is that absolute minimum for this token. We wanted this to be able to benefit ALL holders in every scenario possible when holding. With us not having any tokens ourselves, we are giving this project that ultimate opportunity to be larger than one may perceive. We present to you, **\$BEAST TOKEN**, and want to give you a warm welcome aboard!
