

# **WE SERVE BATON ROUGE, LA**

Commercial and industrial property owners looking to establish a variety of procedures to better handle their wastewater and sewer systems all benefit from working with Wastewater Treatment of Louisiana. We have been in the industry for years, as far back as 1978, providing many businesses and industries in Baton Rouge, LA, and nearby areas with wastewater treatment plant construction solutions and trenchless sewer repair procedures. We pride ourselves on our thoroughness, as our installations are built to last, regardless of the project's nature.

## **BENEFITS OF WORKING WITH WASTEWATER TREATMENT OF LOUISIANA**

Every wastewater treatment installation procedure is treated with the utmost care. We walk our clients through the installation process so that they are always kept up to date on what is being implemented. Our systems also use the latest in pump and filtration technologies to purify water and reduce energy costs for the owner.

## **A RANGE OF WASTEWATER INFRASTRUCTURE SOLUTIONS**

From wastewater treatment facility installation to trenchless pipe lining, Wastewater Treatment of Louisiana has always been at the forefront of providing reliable solutions. Reach out to our experts when you need any of the following:

### **WASTEWATER TREATMENT**

When you need to have a wastewater treatment installation that you can rely on, we are the company to call. Every professional at Wastewater Treatment of Louisiana strives to perform the procedure as carefully and accurately as possible. With our wastewater treatment plant construction projects, you can look forward to long-term filtration, capable of keeping harmful toxins out of your water as necessary.

### **PRECAST**

We offer a broad variety of precast concrete options for those who need a solid foundation for their projects. All of our precast concrete products are created according to industry-standard practices, and we always test their integrity to make sure that they can withstand anything and everything. Our precast concrete solutions are flexible in their applications, and we can help our clients choose the right solution for their needs.

### **TRENCHLESS SEWER REPAIR**

We are proud to offer efficient trenchless pipe lining services for all clients. Every trenchless

sewer repair procedure is designed to help preserve the existing pipes in the system. We use the latest in technological advancements to line your pipes and keep them from springing leaks and exhibiting further signs of damage. Our professionals are highly skilled in the installation process, and we always do our best to minimize damage to your property during the procedure itself.
