Non-Furling Device Instructions

1. After assembling the flag pole slip Non-Furl Bushing (A) over top of pole, tab end first (see drawing).
2. Slip both shaft collars (B&C) over top of pole.
3. Slip second Non-Furl Bushing (D) with tab to tope of pole.
4. Position top Non-Furl Bushing (D) on the pole about 1/4" from end of pole or bottom of ornament. Slide the shaft collar (C) to 1 and 1 1/2" from the bottom of the bushing and secure screw with Allen wrench.
5. Gently pry apart the outer ring (E) on top of bushing and loop it through grommet on top of flag. Make sure the rings hang naturally and do not twist (see drawing).
6. In the same manner pry apart the outer ring on the lower bushing (F) and attach lower grommet of flag. Again, make sure that the rings hang naturally and do not twist.
7. **IMPORTANT:** When positioning the bottom bearing in place, be sure to leave 1 to 1/2" slack in the flag or banner before tightening the bottom collar. Tighten the bottom collar's set screw with the Allen wrench.

Family Owned. American Made.
