Dear sir or Madam,

Thank you for your message.

We value your input and question raised on this issue. As with all relevant questions that are submitted to us by external sources, we have taken note of the points raised and are consulting internally as well as with the relevant ESMA committees to assess whether further public guidance is needed. Please refer to <https://www.esma.europa.eu/questions-and-answers> for information on criteria followed by ESMA to accept and prioritise questions.

Please note that ESMA endeavours to reply within two months to factual questions received and within four to six months to policy questions that raise new points of interpretation.

Please also note that a question is much more useful when submitted together with a proposed answer. We would therefore be grateful if you could suggest possible answers should you need guidance on other issues in the future.

Finally, please note that this inbox only handles general enquiries. If you are contacting us to make a complaint, you should first refer to the complaints section of the ESMA website. There you will find information on how ESMA can help and who you should contact to make your complaint.

Regards,

ESMA
