The maximum dose of Anavar for female bodybuilders is 20mg, anything more than that and you will develop male characteristic. Those who need it just for gym, find 10-15mg more than enough. Anavar's adverse reactions are dictated by the ability of the anabolic to drown out the production of personal testosterone, although to a small extent. And here is what you may encounter: Whether or not Anavar directly causes lipolysis is a matter of debate. What is known is that being a powerful androgen, it increases metabolism which can accelerate the rate of fat loss. Club that with the added vascularity and muscle hardness and you automatically begin to look shredded and leaner. Also, if you're an athlete and don't need those big muscles but only a little push forward, Anavar is a fantastic option. You won't really see many changes in your body, you won't bulk up and lose your flexibility, and your strength will increase exponentially. Oxandrolone was first synthesized at the Searle Laboratories in 1962. Two years later it became available as a pharmaceutical drug in the United States. Whether you are underweight

So as far as the above conditioned is concerned, Anavar is your safest bet. The dosage for women is 5-10 mg of Oxandrolone per day for ideally 4-5 weeks. Women may even go for the dose of 20 mg but it will greatly increase their rate of Virilization, hence it's recommended not to consume more than 10 mg maximum. How it affects women experience?

For most athletes, it is important to have a good understanding of how their body reacts during and after use. Anabolic steroids, like oxandrolone, cost between 25-50\$. While it is possible to buy this drug for less than a 2€ discount, the risk of side effects is greater than that of many other analogues. Anavar (oxandrolone) is one of the most popular oral steroids today, mainly because of being well tolerated by men and women. Since it is a female-only cycle, there is no chance you'll see your hair fall out if you skip the in-fact female phases. Let's face it, one of the biggest fears people have when it comes to steroids is the side effects. A baritone voice and a hairy chest are not endearing feminine features. The risk of these things happening due to Anavar is less than with most other steroids, but it still exists. To put it into perspective, a vial of Testosterone Enanthate 300 from a German brand commonly sold in UG labs costs approximately \$55. That's a 12-week supply for you.
