What is an insurance credit rating?

My partner contends because we ordered a brand new (used) auto and our son gets his own vehicle that people need to get insurance quotes. I believe we are receiving excellent rates today and dont think it'll make much difference-but he demands. Anyway the insurance agent I reached, who I've identified since 1st grade, asked for our license quantities to operate our driving history (which both should really be wonderful), state record (we've had one residence plus one wreck state in the past several years) and our insurance credit history. We've had problems financially recently and so our credit rating is not actually good. We are planning to file bankruptcy. I'm thinking exactly what the insurance credit rating is and can our recent financial situation trigger the prices to not become low. I really donot also need to mess with obtaining quotes since I do believe our charges have become affordable already but my man contends we need to look around. I recently don't see when our rates happen to be just a couple with full coverage of hundred how we are able to save something. And I hate the fact that you have to give so much personal information to somebody who you are just requesting a price (in my opinion an appraisal) from."
