Number of Dogs Graduated from Canine College Training Class	70
Number of Behavior Assistance Calls	94

Spruce St. & Northwest Farmers Market

An initiative of our Community Outreach Team, this year we participated in the Spruce St and Northwest Farmers Market this summer in Manchester! A team of staff and volunteers were able to introduce Our Companions to the community, as well as detailing our Sanctuary and all of our amazing programs that we offer. Canine College Manager, Deanna, set up a fun enrichment obstacle course for our four-legged friends to enjoy- though many two-legged friends enjoyed it too! It was a great experience to meet the community, businesses, and other organizations in our local area. We look forward to next year!

Dog Food Days of Summer

Our Companions came across several bags of unopened dog food, therefore we held an event to distribute dog food to our community for those in need! Anyone that needed dog food could come and receive as much as they needed for their pets. Staff and volunteers took record of each bag given and gracefully loaded the cars of many people who were very appreciative of the free food! Overall, we were able to give over 115 bags of food, totaling over 3,295lbs!

Brooklyn TNR Colony

Beth in her new role as Community Outreach Manager now manages our TNR (Trap, Neuter, and Return) program and recently helped out a colony of community cats. She was able to capture herself returning a colony of cats back to their original habitat! You'll see Kit Kat, TubeSocks, and three kittens being returned after being neutered/spayed. There's one last cat named Lil One that still needs to be trapped and spayed for the whole colony to be managed, but this was still certainly a successful TNR case! Hopefully we'll see Lil One soon!
Great work, Beth!
