I think that what you said was actually very reasonable. But, what about this? what if you were to create a awesome post title? I ain't suggesting your information isn't good, but suppose you added a headline that grabbed a person's attention? I mean Cash App Login | Cash App Sign in Help is a little plain. You might glance at Yahoo's home page and see how they create news headlines to get viewers interested. You might add a related video or a picture or two to grab readers interested about everything've written. In my opinion, it might make your posts a little bit more interesting.
