Dear Lenín Moreno, new General Secretary of UNASUR

I, Gottwald Peter, King of the Government Imperium of the Diamond, I want to congratulate You for Your successful election, which is surely a good step for You and an excellent motivation for Your own political interests, which will certainly be peaceful.

I congratulate You on Your success among the States of South America and I wish that Your political activities were full of joy and good success for You and for UNASUR, and I believe that Your success will also be celebrated by many peoples of South America and the interest of all states.

It is very beautiful and amazing to be able to support the growth of states over the fundamentals of UNASUR's constitution, and I believe that Your political ambitions can still grow and reach important horizons that open up UNASUR's visions to You as a gathering of South American states and establish a real friendship States that can therefore grow and grow in true friendship.

I wish for Your vision to be full of energy and victory and certainty of success, and I wish for You that Your development could be really strong enough and motivating for friendship between all the states of South America, America, but also all the countries of the world.

I wish You a lot of joy and good encouraging results every day, and I wish for Your UNASUR countries to make a significant encouragement as well as the genuine interest in the prosperity of the friendship that UNASUR is establishing here and the nature of such a meaning of organized coordination.

The nations of South America are often beautiful countries full of happy people and many people with very positive political baseness and I therefore wish Your visions to be strong and winning so that Your nations could enjoy great enjoyment and good welfare from Your The development of political activities, and therefore life in countries full of peace and friendship of peoples, as well as beautiful countries full of people with good life goals and for the purpose of the common prosperity of society.

UNASUR is based on the beautiful principles of a good civilization goal, and I am therefore always fully willing to support Your country in enabling a full partnership and truly good interests for Your countries, peoples, and civilizations. Today it is important that countries in all countries of the world can be inspired by a peace policy and a peaceful ideology that can grow openly to the prosperity of all peoples in the partnership and in peaceful co-operation, giving the world the possibility of a new vision and success of our nations as the unity of our entire humanity.

In my interests, it is still a goal to support Your South American countries, and it is in my interest to give You the potential for significant growth, which is why it also allows for good business success and economic growth but also the modernity of civilizations and also the welfare and quality of life of Your

nations.

My own ideology of personal and political interest is always intended for the same purpose of organization as ideology as the UNASUR Charter, and I therefore believe that our common interests can always be truly common and intended for the same goals of our nation's development. It is important to promote good quality of life for nations, as well as maintain good relations between states.

It is in my own interest to support the growth of the countries of Your countries and to benefit from new opportunities for the development of prosperity, as well as allowing the maturity of growth.

My goal is to support the steady growth of Your countries' economies, as well as the security of Your countries in the development of armaments and international cooperation strategies, new technologies, and new resources for military forces.

It is in my interests to also support the stabilization of Your states and stop the radicalization of the protests if I can be able to do so but it is also my goal to ensure my own stabilization which is also a good step for You and my ability to achieve success in Your development States.

I want to support the growth of Your states and the successful vision of the development of Your civilizations, I want to support the modernization of Your cities, but also the creation of new urbanization projects for improving education, state prosperity, improving social qualities, developing economic networks and business project capacities, The growth of both industrial infrastructure and agriculture, for every one of Your countries consistent with full tolerance and the same purpose of achieving the maturity of Your states.

Today in a light stability I develop my legal communication to defend my rights in political activities and my goals are also full independence from the European blockages, which also cause severe damage to the activities of my government and centralization, and my own peace development, and I am also forced to apply And Your UNASUR side, for Your support, which opens up opportunities for us to develop together and take new steps to achieve the results of greater momentum for our states.

It is in my interest to ask Your UNASUR countries for Your support and information to the Seminars and Conferences of South American Lawyers who therefore have the opportunity to fully activate themselves in the interest of our common political partnership and steady growth without the infiltration and disinformation practices of European criminal politicians Our communications may still be under the control of legal guarantees with full powers of guaranty on legal function, legal application, discipline, and also the ability to use co-operation with legal assets of ID's government property that can therefore be activated.

My Advocacy Office offer is based on the IAIC, the International Advocacy Intelligence Council, which is designed to create a provisional office for the use of stable archive activation, a notary, ID's asset management, as well as international interaction on legal affairs matters. And mobilizing the growth of friendly communication between UNASUR governments and thereby achieving

the full function of our friendship, which can therefore be developed for the growth of our common multilateral and bilateral trade agreements, politics, security, civil education and health, science, but also many new interesting projects Will greatly please Your countries for the potential of new development.

Today, because of the need for my own stabilization, it is in my interests also surely it is my request to Your states, my request for ID's support official and civilization stabilization using communication between American communities for independence, for the purpose of notifying ID's federalization and using ID's soil for Joint development as a united political subject of federalization consolidation, and thus also the establishment of a common consulate that will better facilitate our joint steps towards the growth of common logistics, also signifying our ability to share our prosperity and success with our support.

America's Independence Forces have the right to establish their office with a consulate, thus extending to the obligation of friendship to prevent radicalism and the growth of organized crime. Independent communities can communicate with the legitimate interest among the policies of Your countries, and thus create much better friendships that will bring our peoples closer together. Your South American peoples have the opportunity to expand Your culture abroad, and the relations of the South American race between the cultures of foreign states, so it is always beneficial to support these opportunities, which are why they give You that benefit.

It is also in my interests to ensure the separation of criminal actors in the network of independent communities and, therefore, I also want to promote good security, so I naturally allow Your states to agree on cooperative investigations and opening up the possibility of criminal activities, Legalizing peace and moral rules, stopping the ability to grow armed conflicts. But if any movement is active in crime, then I fully respect my duty to stop support and cooperation for communities of this interest, with my full respect and without interest in asking for Your support.

It is also beneficial for us to start our cooperation with our nation's banks to open a new prosperous opportunity for our joint growth of economic co-operation, which is also an open opportunity to create steps that mean the growth of full co-operation between our banks and the creation of ID's plan activity for our own economic Stabilizing the function, making for each of Your states significant gains of € 1,000,000,000,000 in DMD currency.

The project is simple and designed only for ID-level consumer spending to be used to buy goods in Your countries and thus also to maintain the ability to stabilize my own country and civilization.

The function of this primacy as an ID's spending plan is based on the principle of the business logistics office's role in hiring business actors and logistics operators from Your countries and therefore the ability to achieve, above all, a step towards the official co-operation of the banks of Your countries which therefore have the right to fund the fund Control legal use.

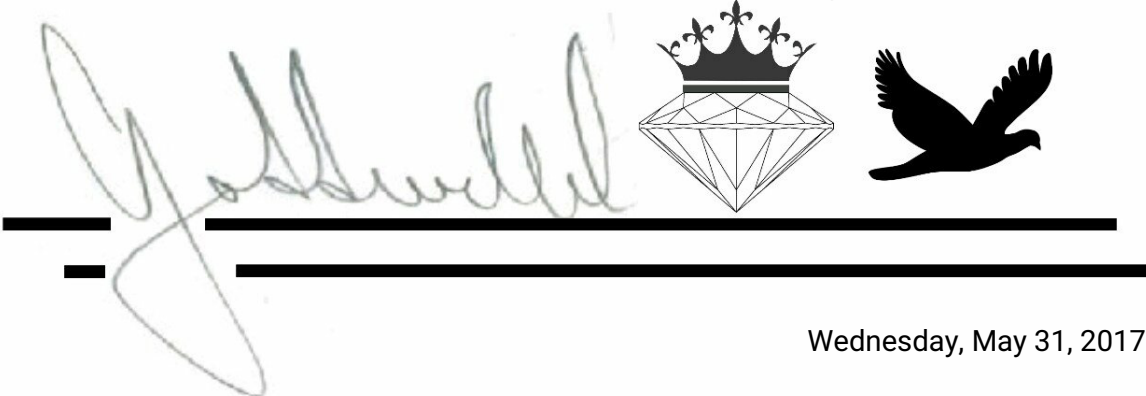

My offers for our cooperation are numerous, and they are also meant to grow a common friendship that I want to support and expand, maintain and

dynamize. I appreciate the potential of our cooperation and also the achievement of the successes of our civilizations, the goals of peace-sharing at international level, and also for the well-being and prosperity of all the states of our world.

Dear Mr. Lenin Moreno, the new General Secretary of UNASUR, I Thank You very much for Your time and I hope in understanding it is in my interests to cooperate in good and friendly development for the purpose of common good.

King Gottwald Peter, ID's
