My friend has put together some really good information about surgical menopause after having endometriosis. I follow a lot of people with endo who are considering surgery or had surgery and still struggling. I think it's really important to give this a read or share with friends who you think this might be relevant. I know @surgicalmenopause_blog wants to empower decisions with as much information as possible and hopefully get continued treatment for everyone, without having to go through years of mis diagnosis's and unnecessary suffering.

The human body already produces a quantity of testosterone hormone called testosterone peptide Hormone forms, or peptide derivatives, that are released during the production of sperm. These include steroids, aminograde A levels, and are also possible based on the injection type. Sustanon 250 is a popular testosterone blend(mixture and is without question the most popular and well known blend ever made. Manufactured by Organon, the idea behind Sustanon 250 was to provide the best of small(short and large(long ester testosterones in a single compound. This would allow the individual to maintain stable blood levels of the testosterone hormone with an infrequent injection schedule while simultaneously receiving fast acting benefits. One common training program used is' The Body Part Split. This allows a bodybuilder to train each muscle group throughout one week in 5 or 6 training sessions, For example: Most forms of testosterone injections only contain one ester such as Testosterone Enanthate or Testosterone Cypionate. Although Sustanon is actively administered in medical therapeutics, it is, however, banned from usage as a sports enhancement supplement. So what can you do about these side effects? The only way to manage them or

The role of nitrogen can be simply explained. When a positive nitrogen balance occurs, the body is in an anabolic(muscle building state. When a negative nitrogen balance occurs, the body is in a catabolic(breaking down tissue state. Therefore, if you are not ingesting an adequate amount of protein daily, your body will go into a catabolic state and start breaking down muscle tissue to meet its daily protein needs. The common recommendation for muscle growth is to take in 1- 1. 5 grams of protein per lb. of body weight. However to also ensure your body remains in an anabolic state from a positive nitrogen balance, you also need to be taking in an adequate amount of both carbs and fat. If you are struggling to meet your protein requirements through daily food intake, supplement with whey protein shakes is an acceptable option. But some bodybuilders and professional athletes are using it gaining fast muscles in their body or they are able to gain fast muscles but also these synthetic testosterone has major side effects on their health like. Sustainon 250 REVIEW Testosterone in Injection form Use: Pros Cons. The half- life of the drug is defined as the amount of time it takes for approximately half of the drug to

Sustanon 250 - What it is. A drug administered by injection and derived by mixing 4 different types of testosterone, under different doses. This is the Sustanon 250 containing 250 mg of testosterone.

I am so incredibly grateful for you guys. Having this kind of support means more than you could ever know.

The most commonly observed side effects in Testosterone replacement therapy include these estrogenic effects, which are caused by reduced or absent testosterone production in men. Side effects that are linked to high Testosterone levels may affect sperm health, the fertility of the penis, the hair on the face and body, and possible enlargement of the prostate. Sperm health problems such as those caused by excessive PSA levels or low PSA levels from fish oil may also affect not only testosterone levels, but to infertility caused by low-level testosterone. This peptide hormone is so powerful that it induces cell growth. IGF- 1 is endogenously created by the liver. It has virtually never been approved for use in athletics but for therapeutic purposes only. The hormone is also an important component in a number of other functions including sperm production and fertility. Yes! The Sustanon 250 is a product that at the start it was used as a pharmaceutical drug, experiencing a high attraction in the field of sports as a training supplement and eventually was banned in most countries around the world. People suffering from the following conditions should also consult the doctor before its use: Males produce small amounts of estrogen in a careful balance of estrogen to testosterone levels
