

The best use of the rooster hackle feathers

While trying to figure out the feathers that can be used for making the different things and different item, one needs to understand the type of feathers that are comprised in the category of the hackle feathers and at the same time their texture and color as well.

Hackle feathers are usually the short feathers that are in the shape of a wavy structure. They are usually found on the crowning area of the roosters and are best suited for making something that can be used to adorn the hats and caps. The rooster feathers can be dyed in the different colors that can be used to put in the front of the caps that are basically used in the armies or during the defence trainings.

Here is a guide to make a hackle made out of the feathers of the wavy feathers of the rooster birds.

Materials Required

1. Hackle Feathers
2. Threads
3. Glue

Process-

Step 1:

Take a bunch of [Rooster feathers](#) and start sticking them together in a horizontal manner.

Step 2:

When a certain number of feathers have been stuck together, then roll it into a cylindrical form.

Step 3:

Secure it with more glue at the bottom and tie it up with the thread for extra security.

Step 4:

Start putting the next layer of feathers on top of the first layer of feathers.

Step 5:

Secure it with the glue and tie it up with the thread for extra security.

Step 6:

You can go on repeating the last two step for the required height that you want and then you can decide the height of the hackle that you want and go on till the requisite height.

Your [Hackle Feather For Sale](#) is ready to put on your cap! You can either stick it with the help of the permanent glue or you can use a thread to fasten it to the cap.
