SHIFTING TIMELINES

There are many subtle force reconfigurations occurring at the quantum level of the planetary mainframe that are changing the way the external and collective energy fields organize and manifest into the world.

We have to move through the series of Timelines in each dimensional octave and reclaim our identity while recoding and changing the obsolete or false reality from interfering with our continued spiritual growth.

[More on Timeline Mechanics](#)

LAW OF GENDER

March 2018

Law of Gender

Dear Ascending Family,

With the shifts into the next Harmonic Universe there are some changes happening in the light body, which are affecting merkaba mechanics and how the **gender** fins of the light body operate. With these changes come new opportunities to uncover and heal any **gender** distortions we may be carrying. These changes also deepen our understanding of how **Gender** Principles are part of the Natural Laws, and how unifying **gender** principles manifests as the diamond sun Krystallah orb body. With the Paliadorian Activations there are new mathematical proportions of the diamond sun 12 Tree Grid pattern being embodied, including the reclamation of Adamic lines. In contrast there is an aggressive form of **gender** confusion being amplified, which is linked with the Transhumanist agenda. We observe what is happening in the promotion of **gender** reassignment surgeries and discuss some of the impacts Trans**gender**ism may have on the soul and lightbody.

All things exist within the **Gender** Principle of Creation, everything has its masculine and feminine principle, which produce metaphysical forces. These forces arrange within the spiritual blueprints that translate into the **gender** principle that manifests itself upon all dimensional planes. There is not one aspect of life, consciousness and creation where the masculine and feminine principles remain non-existent or absent, it is an absolute truth that the **Law of Gender** is manifested within everything. It is impossible for creation to take place without this Universal Law in action at some level, even when the **gender** principles have been replicated, reversed, or manipulated through artificial technology. Whether organic or inorganic the **Law of Gender** will always apply to what has been manifested. **Gender** principle is intrinsic to every form in existence including the human body, which is designed in a **gender** principle biology. It is important to be aware that the **Law of Gender** is intentionally violated, damaged and distorted by the NAA upon the earth, as they learned that through splitting the **gender** principle into grotesque mutations, it further served their enslavement agenda.

Although the Law of Gender and the Law of Polarity are intimately intertwined, it is important to realize that either gender contains both polarities simultaneously, with the circuitry flowing in magnetic north to magnetic south, which moves in different or opposing directions in a male and female body. The male and female body on the physical plane mirror each other through vibrational correspondence that occurs during interaction between the positive and negative polarity that runs through what could be referred to as magnetic north to magnetic south pole positions. The main circuitry of the magnetic pole positions is held in the horizontal plane of the lightbody architecture in the heart complex and sacral complex, which governs the consciousness-energy movement throughout the lightbody, via the meridians, axialtonal lines, dimensional spheres and chakra centers. However, once we unify the horizontal and vertical planes of polarity within the gender principle of our lightbody, we develop the neutral point in all energy centers, merging gender principles, which manifests as the eternal life body or diamond sun Krystallah orb body.

To begin to unify the masculine and feminine within, we must understand that whether a man or woman we hold both gender principles, as well as positive and negative poles inside our body and consciousness. There is no way to change the Law of Gender inside a human body, although it can be distorted through misinterpretation and harmful behaviors, such as believing gender is to be equated with the common understanding of sexuality and sexual preferences. Every male has the components of female energy within his body and specific feminine principles in his lightbody, and every female has the components of male energy in her body with specific male principles in her lightbody. No matter how small the element in creation, from the microscopic levels of subatomic particles moving up the scale all the way to the planets, stars and solar systems, everything is created from the Law of Gender.

As we bring energetic synthesis between the gender principles, we also synthesize the forces of polarity present into neutral or zero point, and this is the evolutionary journey of the ascension process that merges our physical self with our spiritual bodies and ultimately, God source. In order to achieve

self-mastery in our life, it is necessary to understand the Law of Gender that exists within all things, and seek the natural energetic balance that exists between these pairs of opposites. When we live in harmony with the Law of Gender, it catalyzes profound spiritual healing that neutralizes karmic burdens and miasmatic patterns, allowing us to be unified and live in increasing harmony with the forces in the external world. Esoterically, to truly comprehend the Law of Gender is to perceive it far beyond the physical classifications and biological limitations to know that the highest nature of the gender principle is Unity consciousness. Unity consciousness is intrinsically integrated with the Cosmic Sovereign Law of God, or the Law of One and Unity consciousness is the first practice of the Law. This informs us that in order to be in harmony with the Law of One and experience unity consciousness, we must seek to understand the principles of gender in our personal consciousness, and intend to unify all of its aspects and the archetypal forces that operate in our gender based identity.

Healing Separation in Gender

In order to evolve and manifest our spiritual purpose, we must study the masculine and feminine principles that exist within our being, in order to heal their separation from each other that reveals through the inner relationship we have with ourselves. Once we recognize that we are both inherently male and female and that this fact is unchangeable, we can experience how our relationship to our inner male and female influences every external relationship that we experience in the world. Many times, the answers we are seeking about resolving recurring patterns or conflicts that we have in our life and personal relationships go back to the causal seed of how we feel about our Mother and Father. The quality of our relationships, whether they are healthy and balanced or unhealthy and abusive will always return to the links in the Parent-Child bond, in this life and other lifetimes.

This gender pattern will reflect outwardly to others how we unconsciously feel about ourselves, until we become aware of the influence these archetypes have upon us, and we do the inner work to transcend and heal these painful patterns. Taking care to build a strong inner core self, always includes an

emotional and spiritual exploration into the nature of **gender** separation, reviewing our beliefs that formed our conscious identity surrounding the masculine and feminine.

If we give more value to one **gender** over the other, subconsciously or consciously, and this is reflected in how we treat others, we increase division, disharmony and power conflicts in all of our outer manifestations. If we hold levels of contempt or think one **gender** is more important, smarter or superior, we set up failure in our life and personal relationships by projecting this disdain upon the same **gender** principle that exists inside ourselves. Men that project harm or hatred towards women, destroy their inner female. Women that project harm or hatred towards men, destroy their inner male. As a result, both men and women descend into sexual misery programming as a result of inner **gender** separation. In this example, the very thing each person needs to find wholeness, fulfillment and completion within themselves, is being destroyed by their own unconscious actions through the choices they make on the external to further separate **gender**.

During the ascension process, we start returning to our memories in childhood to observe how that experience formed into our belief systems in adulthood, so that we can unravel our deeper feelings and perceptions surrounding the male and female archetypes within. Many times, this means we will need to address places where we hold painful conflict or emotional trauma that has been recorded in the physical body. Once we are aware of the archetypal influences that surround our lifetime of experiences and beliefs that were gathered around the male-female, then we can begin to decode the painful **gender** patterns in our own behaviors that we had buried and begin to change them. We uncover these **gender** patterns and attitudes by paying attention to what shows up in our relationships with others, especially any destructive patterns that surface in emotionally intimate and sexual relationships.

If we pay attention to what these **gender** patterns mean to us as value systems and we choose to free ourselves of dogma and static roles by letting them go, we can experience profound spiritual healing. One important

constant is to know that any relationship that comes together based upon deception, is being played out by the false identity or mind controlled **gender** roles, will never be based in a healthy foundation that builds trust. Without unconditional love, honesty, full disclosure and trust earned between the people involved in any kind of interpersonal relationship, that relationship is doomed to fail through the destructive patterns that started it. We can choose to develop deeply meaningful connections with others or become an actor with a face on a stick, for the people that only care about us when we show up in the archetype that makes them feel the most comfortable. In western society, the False King of Tyranny or the Emasculated Male matches the polarity with the Dark Mother, Princess Code or Femme Fatale, and as long as people play out these superficial victimizer archetypes with each other, never bothering to truly look within, the karmic situation that connects them is built on shifting sands with a house of cards.

Gender does not have inherently fixed roles or sexual expectations, all of this can be decided upon as what is most healthy and balanced for supporting our inner male and female. This revolutionary action of becoming more consciously authentic, can radically shift all outer relationships we have into much greater harmony, by changing the relationship we have with the **gender** principle that exists inside us. When living in harmony with the Law of **Gender**, life becomes simpler, easier, and flows more harmoniously, allowing healthy and balanced relationships with each **gender** to further blossom and develop into deeply meaningful connections. Superficiality falls by the wayside when we decide to love ourselves unconditionally and give ourselves permission to live as authentically as possible, even when our choices are judged or criticized by others.

Damaging the Parent-Child Bond

However, there are destructive **gender** patterns that we have inherited in the 3D world that were socially engineered by the controller system. Thus, we all have a responsibility to our body, mind and spirit to commit to do the inner emotional work, in order to move out of the confusion and return to clarity about **gender**. The mind control set up by the NAA is to damage the Parent-

Child relationship in order to destroy the potential of the male-female sacred marriage later in adulthood, which has been described as the distortion of the False Parent archetype in victim-victimizer programming. Thus, this is another key to comprehending the Law of **Gender**, knowing that we unlock unity consciousness within us as a result of healing our inner **gender** patterns that are connected to our Mother and Father.

The False Parent is the set up for interfering with the spiritual bond made between Mother and child at birth, and then destroying the spiritual bond made between the Father and Child. This harmful pattern many times results in disconnecting the physical body from the soul connection and spiritual parents, the real Mother and Father Principle we call God Source. This is the set up to deeply reject our inner spiritual parent, and to set up abusive conditioning as acceptable behaviors in the Mother-Father archetypal patterns played out in society. Mother and Father archetypes tend to unconsciously play out in the authoritative roles in our psyche, so the programming intends to equate government, religion and military authority roles to usurp our bond to our parents. Honor the False Parent by not questioning their authority credo, applies to all Controller Pillars of Society. The patriarchal domination set up in the NAA death culture was intended to run subconscious and conscious mind programming directing male and female self-hatred along with broad cultural misogyny, which radically harms both men and women through the promotion of these spiritually abusive behaviors. This is a strategy to split **gender** by distorting and reversing the Mother and Father archetypes in our society.

The False Parent is what sets up the sexual misery program later in adulthood, attracting couples with the extreme opposing polarities of shared karmic burdens that continue to split the **gender** principle between them apart. If we do not know how to heal or unify our inner **gender** principle, the chasm of belief between the male and female roles in the outer world continues to widen, increasing the feelings of separation and other distortions. With a disconnected and unhappy ego, this also makes for unhappy marriages and promiscuous sex, when the personality believes the grass is always greener somewhere else, through the missing pieces of their

own internal gender split.

As we study our motivations, perceptions and belief systems about the masculine and feminine, and all of the gender roles imposed upon us, we can choose to unite their qualities when noticing how their aspects are expressing themselves. As we intend to unify and harmonize our inner masculine and feminine, we synthesize the polarities of these forces back into neutral or unity. This process unleashes the highest spiritual potential of our Krystic being fulfilling our divine purpose of completion, which multiplies its sustainable source of eternal living light, within and without.

Law of Polarity or Pair of Opposites

The natural Law of Polarity, also referred to as the Pair of Opposites is intertwined with the Law of Gender but is not to be confused as the same thing. Essentially, it means that things that may appear as opposites are actually varying degrees of positive and negative poles or one of the two sides of the same thing. There are two sides of polarity that exists within everything. Everything is dual; everything has poles, everything has its pair of opposites, and the opposites are identical in nature but exist in different degrees. When we can see both sides of these polarities operating in the world, we can elevate above the opposing energies and the issues they may generate, by observing them from the neutral state. We can transform our thoughts and transform the situation by simply raising our vibration from out of the polarized state, by holding neutral or compassionate witnessing.

One will notice the same repeated polarity patterns appearing in some configuration that is in absolutely every energetic force or matter form and that this pattern repeats itself throughout multiple dimensional layers. As an example, all dimensional layers in the Harmonic Universes have interconnected building blocks of matter and anti-matter that are created from positive charge, negative charge, and neutral or zero point energy potential.

To create circuits of feedback loops for multiplying open source energy

supply, or for directing the finite energy supply to something or somewhere, these charges must attract, link and bond together. The positive or negative charge in the energies are inherent in the forces that are governed by the Law of **Gender** and the Law of Polarity, and this is the architecture which everything is created from in this Universe. Through the Law of Polarity, there are many soul formation groups on evolution journeys that are primarily weighted in the negative or positive polarity, which can also describe the Service to Self and Service to Others orientation in a specific group consciousness. Let's look at how the Law of Polarity is working in the building blocks of matter.

The main three layers of the building blocks of all matter in the Universe include:

1. Electron, Proton and Neutron as positive, negative or neutral charged consciousness units.
2. Math, as the language of code for setting blueprints and architecture.
3. Forces and Energy which include spectrums of color frequency, oscillation and vibration.

The atom is a basic unit of particle matter that consists of a dense central nucleus, surrounded by a cloud of negatively charged electrons. Here, the protons have a positive electric charge, the electrons have a negative electric charge, and the neutrons have no electric charge. An atom containing an equal number of protons and electrons is electrically neutral. Atoms are extremely small and every solid, liquid, gas, and plasma is composed of neutral or ionized atoms, which describes the gain or loss of electrons that happens in an atom. So even in an atom, the Law of Polarity and the Law of **Gender** are at work. It is wise to consider that if our biology is made of atoms that obey the natural laws of **gender**, and we decide to ignore that truth, we will greatly increase the disconnection between our physical perception and higher spiritual consciousness. When we make choices that violate the laws of nature, we disconnect from our spirit and thus, we suffer.

To better understand the model being used below to describe the positive and

negative charge in the Law of Polarity, we consider both the particle and anti-particle building blocks of matter. Our primary focus is within the blueprint of the instruction set made in the electromagnetic field, thus our model will tend to use the anti-particle setting which is the counterpart to particle mass. To better clarify, as a result the information below will be opposite to the current mainstream scientific consensus for assigning positive or negative charge to electrons and protons, in relationship to the atomic theory of matter.

Particle Matter Building Blocks - Electron (negative or -ve), Proton (positive or +ve) and Neutron 0.

Anti-Particle Matter Building Blocks - Electron (positive or +ve), Proton (negative or -ve) and Neutron 0.

So, taking in this information every person, place or thing will have an energetic polarity in particle matter and its double in anti-particle matter, and that combination is balanced or weighted in one form of energetic polarity or its opposite. Ultimately our spiritual goal is to unify and link up the particle matter and anti-particle matter of our consciousness and body via the process of polarity integration. Polarity integration is identifying and locating that consciousness content we have which may be unable to link and bond together, and then intending to unify them through the witness in the neutral point. This is also represented within our physical **gender** bodies, which express as a polarity in matter form, when incarnated in a male or female body. While our physical body may appear to exist in one polarity form in matter, our internal and external energies exist in both male and female principles simultaneously. As an example, on the vertical plane bring to mind a physical human body from top to bottom, the male and female human body is divided into a right side male and a left side female by the central vertical channel. There are many natural characteristics of the male and female principle that we all share in the human species, yet we must identify that which is unnatural and alien to our male and female, and cast it out of our consciousness.

The right side of our human body is the male **gender** pattern, which is the active force principle with internal circuitry that works as the electrical transmitter of positive charged electrons. The male spin in this configuration in the 3D architecture tends to spiral current in a clockwise rotation. When moving to another location in the harmonic universe, the male spin may reverse its position to counterclockwise rotation.

The left side of our human body is the female **gender** pattern, which is the passive force principle with internal circuitry that works as the magnetic receiver of negative charged protons. The female spin in this configuration in the 3D architecture tends to spiral current in a counter-clockwise rotation. When moving to another location in the harmonic universe, the female spin may reverse its position to a clockwise rotation.

Therefore, in the anti-particle setting considering that our male principle electrons are positively charged which interact with the female principle proton which are negatively charged, that interaction will default its spin in the male clockwise motion. In considering the counterpart female, also in the anti-particle setting, considering that our female principle protons are negatively charged which interact with the male principle electrons, and that interaction will default its spin in the female counter clockwise motion. These two male and female principles in the energetic forces come together to create the ranges of electromagnetism and other forces that we experience on the planet. At a certain rotation of spin as the male and female come into unification the negative and positive cancel out and go into the neutral charge, which is the zero point or open source energy supply.

According to the Guardian system, to break free of the bi-wave structure which forces a closed loop energetic supply and perpetuates reversal current and dead light energy, we can alter the anti-particle blueprint layers with our higher consciousness to activate the electrically neutral state which allows the neutral forces to emit feedback loops of natural living light. This principle applies to the structure of the soul anatomy in the human lightbody, as well as the planetary systems in the search for free and renewable energy. The same energy potential is related to the concept of free energy systems that

are open sourced and self-sustaining, however this has been hidden from humanity to prevent access to it. When we understand how access to self-sustaining source light as open source energy is available to us all, this is essentially activating the higher spiritual knowledge to obey the Law of Polarity. Once the masses can understand this Law and the reasons the Controllers have chosen to violate the laws of nature, to amplify the gender splitting and reversals in the forces of polarity, we can finally evolve to a future that opens access to free open source energy for all inhabitants.

In order to be energetically balanced, harmonized and peaceful with ourselves, we must acknowledge the inner and outer polarity. By acknowledging the value and necessity of how the Law of Polarity and the Law of Gender rules our life, we can truly know thyself.

State of Merkaba Fields

More earth inhabitants are entering the state of merkaba building as a result of the ascension cycle and the shift to the next harmonic universe, that activates the fourth DNA layer frequencies. This means that the planetary body and the physical body is transmuting into less dense states of light by shifting the angle on which the particles have been rotating. Merkaba fields are pairs of electromagnetic fields based on the Law of Gender, which are male electrical spirals and female magnetic spirals that are counter rotating to each other and fully interwoven together. The counter rotating spirals of the merkaba fields act as the natural energy circulation system between the particle and anti-particle layers that exist within all of the timeline, and parallel universes in the entire time matrix, all the way to the Godhead. Merkaba fields are actual consciousness traveling vehicles through which frequencies of electromagnetic current, such as kundalini life force waves, circulate all of the energies and thus move in and out of dimensionalized manifestation.

Every single person has a merkaba field running male and female energies that is connected into their biology, which is critical for the expansion of consciousness and for circulating life force in the bodies so that they are

energetically balanced and healthy. Through the merge of the male and female principles during spiritual ascension and the result of progressive activation of the merkaba vehicle, the biology has the ability to enter the state of building the counter rotating spirals of the merkaba field. Building the merkaba vehicle allows for time travel or to skip forward into higher dimensions, and the first stages of experience for most ascending people will happen during their dreamscapes in sleep state. The ability to enter the state of merkaba is dependent on the relative balance between the male and female principle the person has achieved in their consciousness, informing us that the merkaba field and ascension travel vehicle is also fully governed by the Law of Gender.

The diamond sun body has 12 strand DNA which allows for multiple dimensional merkaba fields to activate in the biology, which changes the birth transduction record to be able to replenish the energy supply for the body. This means that as the merkaba spirals activate, the timeline of the birth record in the current identity actually shifts into a future timeline. The timeline in which an ascending consciousness identity was born in the third dimensional timelines, is actually shifting to another location. The diamond sun body has four large counter rotating spiral merkaba fields that connect into the biology that together form into a perfect elliptical sphere of light, which rearranges the core manifestation body into an eternal light grid.

Krystallah Merkaba Fields

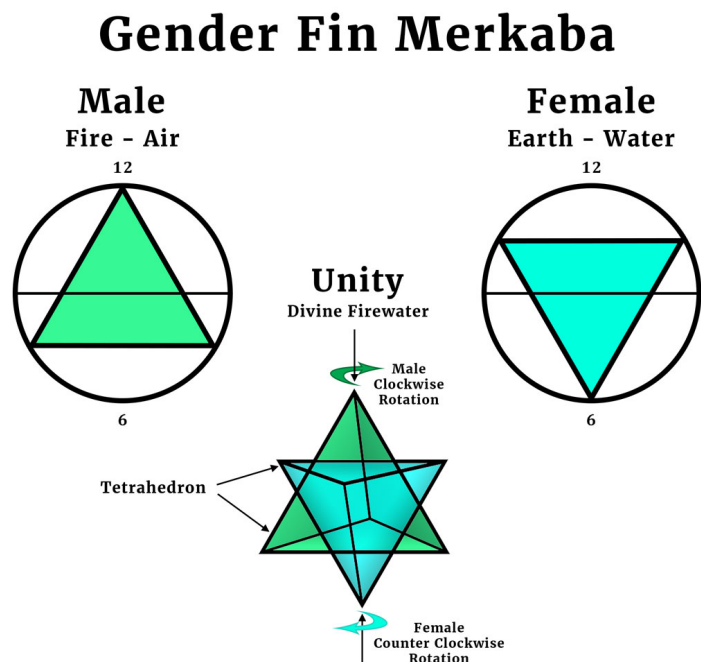

The base twelve Universal Androgynous Merkaba fields of Christ-Sophia are called Krystallah and they make up the instruction set for all merkaba fields within all the timelines and densities throughout the Universes. The twelfth dimensional merkaba field spiral is the *Krystallah male principle* that is generated on the outer fields by the internal *Krystallah female principle* spiral that is generated from the Aquamarine Holy Mother Arc principle in the 13th Gateway. The 13th Gateway is the Aqua Portal which opens the neutron window that leads into the Seven Higher Heavens through Andromeda. The Krystallah merkaba fields have a gender fin alignment that instructs the direction of the starting position for the rotational spin of the top and bottom

merkaba spirals, for the male and female that build the ascension vehicle.

The twelve dimensional Avatar Christos intelligence sets the **gender** fin orientation of the Krystallah merkaba spiral and determines the alignment for the **gender** polarity spirals in every dimension. Think of the **gender** fin as the bottom and top tetrahedron that make up the six pointed merkaba star. There is a male principle **gender** fin (tetrahedron) and female principle **gender** fin (tetrahedron) that regulates the starting spin points of our merkaba spirals, and then starts to merge and unify them into sacred union or Hieros Gamos. When we communicate with our Avatar Christos-Sophia intelligence and build our 12D shield, eventually we rebuild the mini merkaba spirals which start to align how our male and female internal energies will start to spin to help unify and build our merkaba vehicle. By uniting our inner male and female, undergoing the process of sacred marriage or hierogamic union and obeying the Law of **Gender**, the natural process of communication links with Christ Consciousness begin to build the merkaba fields.

The **gender** fin is the point where the vertical energy currents of the merkaba spiral conduct into a node within the lightbody shield that distributes the frequency current throughout the horizontal clock shield. Again, bring to mind the **gender** fin as the bottom and top triangle that make up the six pointed merkaba star.

To visualize the female spin point and the male spin point starting positions in the Krystallah merkaba spiral, first think of the two triangles merged together, the triangle pointing down is the female, and the triangle pointing up is the male principle. Now bring to mind the face of a clock with only the time on the clock in the position of 6 and 12.

For the starting point of the spin for the female merkaba spiral, place the bottom triangle point aligned with the clock face at the 6 o' clock position. This starting position is the negative polarity magnetic female principle spin, which is considered the Female **Gender** Fin Front 6 bottom orientation.

For the starting point of the spin for the male merkaba spiral, place the top triangle point aligned with the clock face at the 12 o'clock position. This starting position is the positive polarity electrical male principle spin, which is considered the Male **Gender** Fin Rear 12 top orientation.

For most earth humans the female principle base magnetic charge would spin in counterclockwise position and the male principle base electrical charge would spin in clockwise position. However, as we move into the next harmonic during the ascension cycle, this may flip into the reverse starting spin.

As we are shifting on the earth, and there are many possible configurations that may occur within the polarity and spin orientation of the male and female merkaba spirals, it is suggested to communicate directly with your Avatar Christ-Sophia intelligence to orientate to the highest expression of clockwise and counterclockwise spin that is possible now. The point of this information is to know the reality of the male and female merkaba spirals that make up the Universal Androgynous Merkaba fields of Christ-Sophia, and to better comprehend the Law of **Gender** and the Law of Polarity that is inherent in our spiritual biology and governing our highest consciousness. Obeying the natural laws through the science of right living, discerning the difference between negative ego distortions and its perception of negative and positive polarities, is what gives us the clarity to align with our Personal Christ.

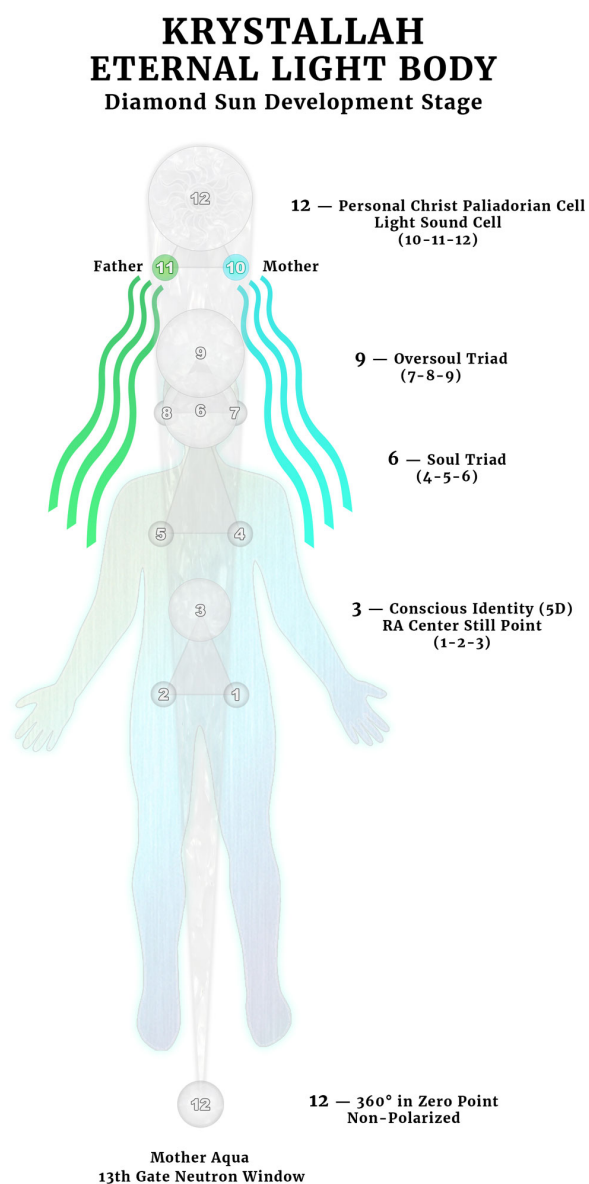

Diamond Sun Paliadorian Activation

In the process of shifting into the next harmonic universe, many in the Krystic family have been enduring an embodiment phase for the new mathematical proportions of the diamond sun 12 Tree Grid pattern for the

fifth dimensional octave. Additionally, many reclamations of identities and body parts from the parallels have been taking place, such as a return of the Adamic lines back to the rightful owner to support their current phase of embodiment. In this small group, all particle chakras have been dissolved. Many people on the earth still have lower chakras, and so they will still need the support based upon the transmutation of these lower density nets and energies as they shift. The lower subconscious fragments are problematic in generating chaotic static net fields with the AI transmission, and this has amplified symptoms of the shadow and pain body in the masses that have not cleared out these trauma aspects.

In this activation for higher embodiment, the resonance points for the main energy centers in the physical body have shifted higher, slightly changing their position and adding more lightbody architecture to the skull, head and crown. The changes to the skull and crown have resulted in cranial and sinus pressure, aches and pains in the entire bone matrix with particular emphasis on the skull, foramen magnum and sphenoid bone. The bone marrow relays intelligent information to the blood stream and throughout the central nervous system to the brain, and thus the entire bone matrix has been potentially over active with several sequential lightbody transmissions.

The third dimensional layers of the 1D and 2D frequency wave spectrums, the reversal nets and their energy centers, such as the 2D-4D split shadow body

are completely dissolved and membranes gone, leaving a solar sacrum and higher position for the still point and conscious identity above the navel. With the diamond sun body activation for the eternal light body in 5D, all separated electromagnetic fields in the lightbody release their polarization membranes and electromagnetic barriers, merging the male-female counter rotation spirals into a large orb of light surrounding the body. There are three main orb bodies nested within each other that are built on a trinity of triangles that align in the central vertical channel as the new position for the 3rd Sphere, 6th Sphere, 9th Sphere, and then the Personal Christ at the 12th Sphere. These main energy spheres are located on the central column and are merged into a tri-wave neutral charge, or non-polarized energy centers.

Each of the 3-6-9-12 positions connect to a trinity in one built for the Conscious Identity, Soul Triad, Oversoul Triad and the Personal Christ respectively. The base tones and the overtones that make up the left hand female side and the right hand male side of the eternal tree of life, also exist, but the main areas of the eternal light orb body are primarily directed in the male-female merge that occurs in the central vertical channel. It appears that the Personal Christ may choose to run many different rainbow ray assortments through the main vertical channel into the Orb body, but the current observation has been connected to transmissions sourcing from the Aqualasha diamond heart rays from Andromeda.

Also, the lightbody is no longer connected to the earth core in the same way, and hovers upon the base shield built underneath the feet. The base shield connects into the feedback loop of the 360 degrees of the zero point field or Godhead that runs from within the internal diamond pillar. This current runs from the top of the crown to under the feet, returning back to the zero point feedback loop made through the 12th Sphere Personal Christ consciousness. The 12:12 Electrical Christ pattern runs the zero point into a feedback loop between the top position of the 12th Sphere from the Paliadorian Cell, down through the central vertical channel into the base shield under the feet.

On either side of the capstone of the Personal Christ, is the Cosmic Mother

Aquamarine Ray on the left and the Cosmic Father Emerald Ray on the right, uniting a trinity of triangles that surrounds the body with a shower of oceanic waves of aquamarine and emerald rays. Many loving waves of celebration for our Krystallah families for achieving their new embodiment configuration during the Paliadorian activation for the diamond sun body in the second harmonic universe. This lightbody configuration is ongoing. It allows more of the human earth family to reclaim their Personal Christ, to build their eternal diamond sun orb body and to continue to have this choice available to them in the future.

1D 2D-4D Blockages in 3D timeline

If a being on the earth cannot activate into the fourth dimensional frequencies, which include transmission of the fourth DNA layer, it blocks the ability to replenish the body with the higher frequencies or increased life force energies. If the spiritual biology cannot receive the higher frequencies being circulated, which is being transmitted during planetary ascension, this locks down the 3D station of identity into the timeline in which that person was born. If that person remains in the same time vector in which they were born, even though the planet has shifted into higher timelines, that person will not be able to self-regenerate and will require another physical body in which to continue their evolution towards self-mastery and ascension.

When a biology is locked down in 3D timelines, the body is incapable of generating the activating sequences that allow for **gender** merge and changes in particle spin, which are what expand the consciousness bodies. As a result of the limitations of energy loss that is suffered in a biology that is locked down in the 3D timeline, some will choose to drop their current body to continue evolving without technological mind control, while others are choosing the transhumanist methods in the AI timelines in order to achieve temporary immortality.

Currently, the 1D and 2D fragmentation that produces the pain body and subconscious trauma from the Victim-Victimizer, Sexual Misery and Armageddon software programs are generating an electrical static net field

that can be sensed as energetic whiplash or crackling static fields for the sensitive empath. This can keep people stuck in the 3D timelines as the NAA are attacking these areas aggressively with technological mind control.

Six Pointed Merkaba Star

Because many earth inhabitants have reached a stage of merkaba building without understanding that is what is happening to them, the NAA are using countermeasures to prevent and disturb this natural embodiment process. Transmissions of reversal coded six pointed merkaba stars, distortions of the six pointed star that represents the unity between the male and female merkaba spiral are especially heightened now.

This geometry is connected to the Law of **Gender** and means unity, unity of the polarity coming into oneness with God. In the earlier stages of building the divine Krystic 12D Shield, the Merkaba Star or Star of David is the symbol code called upon to support the path of energetic synthesis, to bring unity within the lightbody. The Star of David means unity between male and female, the geometry directs energetic balance between the masculine and feminine energies that exist within every human being, whether in a male or female form. All humans are intrinsically made up of **gender** principle energies, masculine and feminine, which are designed to come into Sacred Union in order to communicate with the highest self, the inner Christos-Sophia light.

For every lightworker, it is critical to discern the quality of force that is behind the use of symbols, codes or geometries, as the intent infused into the symbol is energized with the quality of force that the person is applying into that symbol, as well as for what purpose they use that symbol or code. On the earth, the NAA have done everything possible to associate creation symbols, symbols that are pure consciousness energy and distort and debase that energy into reversals, in order to destroy creation and destroy life. The Imposter Spirit has purposely usurped many holy symbols and sacred geometry for the main purpose of creating confusion and fear in the average mind, and to associate negative qualities with creation symbols and holy

presence.

The main purpose of the Satanist or Luciferian is to destroy the original intent of creation codes, such as Sacred Geometry so that the human being will be so filled with fear and confusion around sacred symbolism, they will develop spiritual terror and run away from them so as to not "offend god". This is the ruse of the satanic forces who want to steal creation and life force away from humanity, and thus steal the inherent knowledge of humanities own consciousness bodies away from them. Hence, the Star of David is abused in Black Magic by people that have been taught to defile its true meaning in occult rituals by the Imposter Spirit and NAA. This is to prevent the true meaning of its use to inspire unity in human beings.

Transhumanism for Transgenderism

The fundamental basis of the Transhumanism concept is that the AI downloaded into the scientific human mind sourcing from the psychopathic Negative Aliens and Satanic Forces, serves their quest to survive and achieve immortality by hijacking human consciousness and ultimately possessing the human host body. Transhumanism is a school of thought that seeks to guide us towards a posthuman condition, which literally means to guide humanity to exist in a state beyond what is considered a human. Transhumanism enthusiasts are told they can be anything they want to be, through means technological, surgical or medical. Transhumanism and Transgenderism are used to further promote the death culture's intended agenda to destroy the heart and soul, the compassionate and empathic divine human being, through the intended annihilation of the true essence of both the Masculine and Feminine. Essentially, this is ultimately about creating artificially intelligent hybrids or cyborgs to replace the organic spiritual consciousness of humans, by those people that remain totally unaware about the reality of the NAA, soul anatomy, and multidimensional orientation.

Transgender people say they were assigned a sex that isn't true to who they are and this is based on their internal feelings, experiences and the state of their consciousness body. Of course this is very real for them. Assigning

someone's sex is based on their **gender** biology which includes chromosomes, anatomy, and hormones. But a person's **gender** identity, the inner sense of being male, female, or both doesn't always match their biology. As a result of spiritual-lightbody problems and alien machinery that are impacting the inner **gender** principle in human beings, the phenomena of **gender** reversal has been steadily increasing over the last hundred years.

Recently we can see an accelerated AI technology being used to create **gender** identity shifts almost overnight in targeted people, many of whom are public figures.

In order to disrupt or destroy the unifying potential of the androgynous lightbody in the DNA of the human being, the first directive would be to attack the inner and outer **gender** principle in all ways possible. To fully attack and confuse all matters in regards to the Law of **Gender** and Law of Polarity which governs natural creation, the NAA would need to promote counterfeit creations through inciting confusion in the death process, obliterate the knowledge of the lightbody and soul, spin confusion in sexual conduct and concepts of marriage and children, instill **gender** confusion in expected roles, and then start to blend human bodies with animals and machines. Now that everyone is made miserable through the dire problems they have created for us, they can steer our reaction into the solution they have prettily packaged and labeled as liberation. Transhumanism and Trans**gender**ism is not liberation, it is the deliberate destruction of everything that makes us a real human being, they want to annihilate our potential for multidimensional awareness and crush that which develops and expands human consciousness.

For many years now, it is evident that animal DNA has been mixed with human body parts and injected into our children's bloodstream through vaccinations, to intentionally dilute and control human genetics to be guided into the guard rails of the transhumanism movement. Injecting animal DNA into human bodies is also the result of many mutations in current human behavior digressing into a hive mind mentality, which is the type of mental body that the animal kingdom has. The next stage is to merge the human biology with machinery, which has been primed with the spraying of etheric

levels of frequency based alien implants and chemtrails that control thoughts and perceptions of the outer environment.

This is a difficult topic, but we all need to take a hard look at it in order to be informed and awake to the current agendas. As we consider more about the issues of transgenderism leading groups towards transhumanism, let's review the spiritual problems that most commonly impact gender on the earth plane.

Spiritual Problems that Impact Gender

- NAA broadcasts psychological warfare content for perpetuating sexual misery in humans at varying degrees, including gender polarity reversal, gender splitting, misogyny, sadistic sexual preferences, and sex with children. The worldwide epidemic of sex with children at the causal level is the sexual misery program targeting mind control for pedophilia into the masses. Unhealed sexual trauma in all its forms radically disturbs inner gender balance.
- Alien abductees that are inducted into hybrid breeding programs, or endure genetic experimentation, mismatched body parts, forced intercourse or harvesting of their sexual fluids, can experience severe sexual trauma and gender polarity reversal, resulting in severe confusion about their identity, gender and sexuality. Some people are forced in the astral to have sex with an alien entity, and are emotionally devastated and confused as a result.
- Targeted individuals can be attacked by anti-hierogamic technology to distort gender balance through manipulation of their sexual encounters or relationships. AI Clone bodies holding information of genetic equals are inserted in selected individuals, to put targeted people on false timelines or unite them in incompatible marriages, engineered on the astral plane, such as in the alien love bite scenario.
- Public individuals that bring unapproved topics or esoteric information to the public, are targeted intentionally to distort their gender through mutations in order to discredit them or defame their character in any way possible. Many of these people are unaware their sudden desire to be

transgender, or have a sex change is caused from targeted AI technology directed to them.

- Transhumanism leaders are directly targeted to be involved in spreading and marketing transgenderism and will continue to form alliances, in order to promote these both as the coolest, trendy and most progressive alternative lifestyle for the upwardly mobile.
- Generally, the soul is the female principle and the monad is the male. When either of these spiritual body parts are fragmented, reversed or traumatized in another timeline, this can impact the physical body in current time with sensations of gender mix-up or feeling stuck in the wrong gender body. Many times, the spiritual body is not connected properly in the physical and needs to be centered and grounded in the core of the physical body to heal gender balance.
- If a person has had strong emotional connections or trauma in another lifetime as another gender, these memories can transfer into the current incarnation into another gender body from the unresolved conflicts generated from other lifetimes.
- Spiritual attachments, entities and oppressions can also impact gender feelings and sexual preferences in an unaware human, in which the spirit attachment uses the host for experiencing certain sexual fetishes or gender preferences.
- Many religious organizations are filled with alien mind control transmissions that are designed to radically distort the gender principle, and have concealed all information that the Christ is a male and female, androgynous god human. Androgyny has been purposely corrupted and is severely misunderstood. As a result, religious programming has severe consequences in harming inner gender balance, while promoting unhealthy sexual attitudes and intolerance.
- Earth has problems with soul fragmentation from instantaneous traumatic deaths caused by assorted weaponry, from nuclear bombs to machine guns. When a person dies suddenly and tragically, and they have not been prepared for the afterlife, they can fragment and quickly attach to another incarnating baby body suddenly, without life review or conscious awareness. This has contributed to the spiritual problems that impact gender polarity in the biology at this time on ascending earth.

Psychological and emotional pain in regard to **gender** confusion, sensations of **gender**-mix up, feeling ostracized and bullied for feeling different in this way is a source of real psychological-spiritual trauma that may start in early childhood. Unfortunately, our society is not equipped to support children and adults that may suffer greatly with inner **gender** reversals and related **gender** confusion as a result of spiritual or sexual trauma. The point of this information is to be aware that there is a specific mind control agenda to spread transhumanism through surgically and medically induced trans**gender**ism in order to reverse the inner **gender** principle, which destroys the human lightbody. We have to know we have a lightbody and how it works in male and female principle, before we can accurately assess ourselves and our environment about who we really are as a human being. How can a human being that has been subjected to psychological warfare and social engineering targeting his or her **gender** and sexual beliefs throughout their lifetime, make a sound and healthy decision that impacts the state of their **gender** biology and sexual preferences? They simply cannot and are radically impaired.

Thus, as human beings we must make some effort to educate ourselves about the pitfalls of the current events happening in the ascension cycle, like transhumanism's alliance with trans**gender**ism and be willing to address the layers of spiritual trauma that damages **gender**. Sadly, religions tend to demonize others suffering with **gender** trauma and it's important to recognize the true humanity, the heart and soul that is traumatized by such spiritually abusive behaviors. Compassion and empathy for the suffering of human beings that undergo **gender** trauma is very much needed, as well as being better informed about such matters. As awake and informed parents, before allowing children to make decisions like taking hormone therapy, plastic surgery or sex change surgery, openly discussing **gender** issues and where permanent effects on the biology can potentially produce even more spiritual harm to the consciousness body is suggested.

During the ascension cycle there is a lot of confusion about **gender** as people do not take into consideration that humans inherently have both male and female characteristics and operate in **gender** principle. The human body is

designed as a **gender** biology that works in alignment to the Law of **Gender** and Law of Polarity. There is a necessity of being willing to do the inner emotional work to support our male and female to be expressed in the most energetically balanced way possible. If a male feels his feminine attributes and feminine right brain characteristics being activated in the ascension cycle, this does not mean he is trans**gender** or he is a biological woman. If a school girl feels more masculine and wants to wear what society labels as male clothes, this does not necessarily mean she is trans**gender**. Adults and children are incredibly confused about the forces they are being exposed to now. The problems with society placing demands on people to act in accordance to rigidly expected **gender** roles, shuts down their ability to explore **gender** issues openly without backlash. This sets up the problem of persecution and integration into a society that is not tolerant of flexible **gender** roles, which only increases desperation and suffering for all involved. People that feel desperate and are suffering with **gender** issues rarely make good decisions.

To better understand why trans**gender** people and **gender** reversals are radically increasing in the death culture requires reexamining the fundamentals of who we are as human beings and what makes us men or women. Also, we must acknowledge that **gender** principles and the **gender** concept is currently being greatly expanded upon in human beings during the ascension cycle. As a part of spiritual evolution, we have to inquire deeply inside and take a hard look at ourselves to give some thought to how the death culture has defined **gender** and places expectations on males and females in different ways. Before we can truly understand how someone can have a different **gender** than their assigned **gender** biology, we have to understand the Law of **Gender** and how **gender** actually translates into our body and consciousness. We must explore how the concept of **gender** was built into the NAA mind control programs, how it was used as a weapon against us and how the **gender** split has affected us all. This goes way beyond just accepting others and allowing them to be themselves, and takes us into the deeper examination of who we really are and what we are becoming.

When we are informed and aware about what we are facing on the earth, we

automatically have the personal power of choice and consent, which allows us to return back to align with the natural laws.

Please only take what is useful for your spiritual growth and discard all the rest. Thank you for your courage and bravery to be a truth seeker. I am God, Sovereign, Free!

Until next, stay in the luminosity of your Avatar Christos Sophia heart path. Please be kind to yourself and each other. GSF!

With a Loving heart, Lisa

Facing Fears

LEAVE BEHIND THE PAST AND EMPOWERING YOUR FUTURE

To move forward and evolve as human beings our fears must be challenged, demystified and dismantled. This is a huge part of the Ascension process. We are accelerating so fast in these days of huge transformation, that every fear in the human spectrum of experience is raising its head for us to face , as it wells out from deep within us.

It takes all of our inner strength and courage to face our fears. By allowing fear to control or hinder us we are giving up more than we feared losing in the first

place. When we allow fear to hinder us from being you we need to be at the authentic levels we are not disclosing who we really are to ourselves and to the world. It is like disowning a part of ourselves.

Below is a simple meditation exercise to bring fears up with clarity so you can address the root of the fear itself. Many times the fears we have are vague and not at all what we “ think” they are. Explore them, challenge them, and embrace them to move you past old patterns. Moving past fear, brings us into greater clarity and then into more personal power.

Emotional Release from Negativity

Many of our clients have come to us with their bodies, minds and emotions cluttered with all kinds of dross, miasmas and debris that have been stored for many years, if not a life time. The "cavass" of their energetic landscape is cluttered with all kinds of emotional darkness from such things as stored negative emotions, societal programming, and abuse.

Because of the dramatic frequency transformation shift, both personally and planetary, it is more pressing to be aware of one's energy bodies and especially aware of the effect upon the emotional body and resultant reactions triggered by psychological negative thought patterns. Cultivating intuition and developing better mind-body-spirit and self-awareness is the key to maintaining inner peace and serenity during such challenging times. It is important to maintain a clean and purified mental and emotional diet, creating a clear energetic landscape much like weeding and maintaining your garden.

This article will contain some suggestions for your journey of the continuing

expansion of freeing your self from limiting belief patterns and negative energy. The goal is to re-pattern and reframe your thoughts, emotions and beliefs to become magnetic to your soul's authentic purposes and maximum expression.
