

EVX Store – things you need to know

A variety of e-mobility and home robotics goods are offered by EVXstore.com. You will find convenient games with cleaning and lawn mowing robots and daily relief at home. We give rapid and excellent customer service to our customers constantly. The items are delivered either from our own Lahti warehouse or our partners' warehouses. Our own warehouse deliveries take about 1-3 days and from the warehouse of the supplier 3-5 days. Our objective is to make comparing items easy for consumers so that they can select the appropriate product.

Evxstore.com is a Finnish startup created in 2012 by SB Ecommerce Group Oy. Our headquarters and stores in Lahti employ around 30 permanent staff. Every year the SB Ecommerce Group has over 100,000 clients, and we dispatch tens of thousands of shipments.

Over the years, the concept of setting up an EVX Shop came to life. Jarmo, one of our founders, participated in triathlon and road cycling after a long hockey career. On the other hand, since he was little, Henrik has been a seasoned mountain cyclist. As we have offered electrical kickboards in other online stores for years, their usage and operation are known, our relationship with kicking

boards is coming back. The concept began to rise with the first test of an electric fat bike in Levi in 2018, and the decision to buy one's own electric mountain bike was made barely five minutes after driving. Henrik found the comparison of electric bikes to be quite hard following the beginning of his hunt for the right electric bike. The comparison of components demands clear hobbies and professionalism in several producers. This wasn't a simple feat even after 11 years of mountain riding, so no matter how hard it would be for beginners. We have the notion to start building an electric car specialist webshop.

Väinök was now interested in trying electric biking throughout the Corona period as well. Väinö used to be more comfortable in ball games, but Corona also forced this guy into the cool air. If visiting a store was uncomfortable in unusual circumstances, internet research was the option, and you can search on www.evxstore.com/fi/. Väinö had the same issue as Henrik had previously. Here and there, there were dozens of items and brands available. Väinö finally rented electric bikes and tested what worked best for him, but the comparison of brands amongst them was nearly difficult even then, and not every single operator could ever find all types.
