## ID's plea for Japan Empire support

---

Tuesday, January 3, 2017

Good day for a weighted Emperor Akihito and Prime Minister of the government Mr. Shinzo Abe. My opinion is, in the interest of our pride for resistance against terrorism affecting our states, by our enemy the same disaster behalf of humanity, organizing as a legal entity of the European governments and states. Terrorism and against the land of the Empire of Japan, at the level of crimes of genocide and violation of integrity. Spacetime technologies affecting our reality and an intentional, explosion of the Fukushima nuclear plant, many earthquakes and hard disasters which severely damaged the freedom of your country and state, today the worst crimes against Japan.

Your country has been damaged, as well as the countries of China, Thai Wan, Russia, Nepal, Iran, Indonesia, Philippines, Malaysia, Africa, America, many countries around the world! Damage at the level of which is becoming a new form of leadership view International politics and thus favoring cooperation strategies instead of conservation acts of resistance and opposition of another interest standard session. It is in my interests always encourage punishments everyone to criminals against our states!

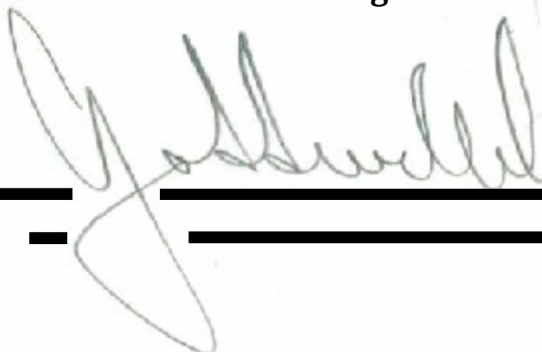

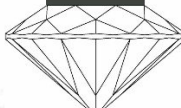

My country is also damaged. Occupation, misinformation, murder, blockades, isolation and exile, the financial losses far greater than the economy of planet Earth. Today, I need to get International support for stabilization of offices, shops and civilization of my country, but each own fear of cooperation with current blockades of European terrorism.

I therefore ask the fundamental expression, weighted Emperor Akahito, including Prime Minister Abe and the Government of Japan for mercy to the situation of crime in the Japanese country, and because of the special situation also eased opportunity to establish a relationship with a group of Yakuza, for the purpose of cooperation and stabilization, but also decriminalization. I ask for your support at least tacit character, for safety reasons. Yakuza is people who needn't have fear from terrorism.

Imperium of Diamonds is a state recognized by International law, and without regard to any crime. Yakuza is a form of political movements from the history, and today the same trend as many national movement for freedom around the world. Many nations and governments formed from groups of the military junta, also in the occupation government faces today, legitimate government and the states. Yakuza has the right to defend freedom in the country of Japan, just as it is your pride.

**Plea for Japon Empire in interest of ID's stabilization support**

---

For me, I'm the King Peter Gottwald, today Reprerent legitimate government with legal value, as well as the rights to free development with full right of integrity, therefore, in order to develop International cooperation. I confirm that the Japanese empire country for me is a beautiful country and I have respect for your own civilization and Japanese people.

My interests are to establish business cooperation with the government of the Japanese Empire, establish cooperation with banks, to expand our business relationships as well as to support the growth of our civilizations. Our states can support many common markets for modern technologies, or even open a joint industrial and mining zone. One of my deals are also building a joint Star City, one houndred civilization planets around single stars like our common civilization in the universe.

Our act of collaboration can be dedicated to the development of many forms of advanced spacecraft, as well as new military technology.

Our countries can work together to create great strides trade cooperation at the level of architecture, electronics, machinery, transport, chemicals and petrochemicals, weapons and military equipment, as well as food and other consumer goods, or development of shared services between our countries. Our joint business opportunities are synchronized at the many forms of categories, and it is true that the Japanese economy is also advantageous to support activation and ID's trade proposals for stabilizing ID Act's government and civilization.

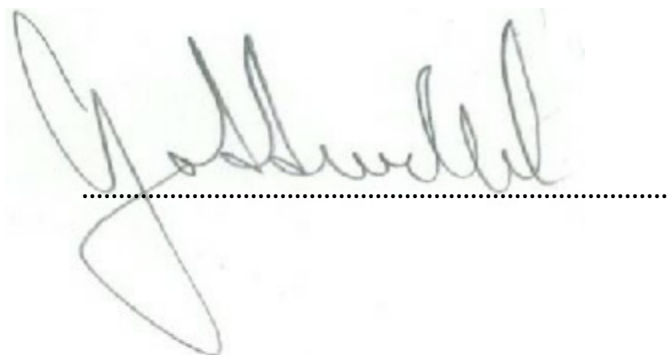

Our relationships can be political, security as well as business. I always can promote our common alliance, and I am confident that our joint relationships for us will be the first important than the interests of European relations with terrorist states that only harm our civilization, states and countries.

Today, if the European terrorism will enable any form of terrorism against your own country, I support the rights of global benefit, meaning weapons of global destruction. Therefore, I also believe that the size of today's disaster, the ratio of criminal responsibility Yakuza groups is important, much than European policy.

Thank You for your patience and pride for your country, and respect for other states and loyalty for global justice.
