3. A scan B's QR Code or input B's account ID.
4. B accept share.

8.FAQ

- 1** Q:Failed to add during network configuration?
A:Please make sure your phone is connected to a router in the 2.4GHz band and make sure that the Wi-Fi password is correct.
- 2** Q:After scan adding is still unsuccessful?
A:Restart the device or power off the device after scan adding is still unsuccessful, and then try to add it again.
- 3** Q:The device cannot preview normally?
A:Please check if the network signal is too weak, please put the camera close to the router, if still cannot preview, reset the camera and add it again.
- 4** Q:After resetting the device, why is the camera still in the device list?
A:Resetting the device only to reset the camera's network configuration but cannot change the configuration on the APP, to delete the camera you must log in the APP to delete.
- 5** Q:How to switch the camera network to another router?
A:First remove and reset the device on the APP, and then configure the network for the device again through the APP.
- 6** Q:Why does the device can not recognize the TF card?
A:Please remove and insert the TF card after power off, please check if the TF card is working normally and whether it is in FAT32 format, when the mobile phone or the device is working in unstable network, the TF card might not be recognized.
