Virtual Systems is professional's choice - all our solutions are widely used within most demanding overseas hosting providers. Our rates are super aggressive - hardware and bandwidth usage prices are better compared to other famous European offshore hosting destination like Netherlands, Bulgaria, Romania or Russia. Added safety available: 100% legitimate solution contrary to DMCA takedowns & illegitimate usage of copyright claims, protection against DDoS attacks, proactive service monitoring and 24/7 technical support. To assist you cover up yourself even more our services are 100% anonymous and privacy focused. More so we accept anonymous Bitcoin payments & communicate via anonymous mail.

**CUSTOMER SUPPORT AVAILABLE 24/7.** In-house technical support team operating 24/7. These same experienced tech specialists have physical access to server hardware. 15 minutes to respond in your ticket.

**99.9 PERCENT UPTIME GUARANTEE.** It's an actual warranty backed up by SLA. Redundant Infrastructure. Servers situated in European contemporary datacenters. Several uplinks and peering. Automatic route optimization program.

**OFFSHORE HOSTING BENEFITS.** Bitcoin payments accepted. Absolutely anonymous enrollment. Managing DMCA & copyright complaints more peacefully. More flexible content policy. Solid offshore hosting celebrating 10th Anniversary.

**ANTI-DDOS SERVICES.** We promise that client's projects are not affected by DDoS attacks. On request you'll be switched to enterprise grade in-line DDoS filters, which will carefully filter botnet traffic out and pass only legitimate visitors to your web site.

**BANDWIDTH EXCEED 400GBps.** Using 400+ Gbps of IP traffic and also official LIR status from RIPE NCC - we rank as one of the largest providers in UA. Video streaming is driving demand for bandwidth use and we've got it at affordable prices!

**COMPETITIVE PLANS.** We are not reselling other hosting company! Found a better deal? Let's negotiate if we can match it! We pay half less than others since we monetize the two ways, "inbound" for Ukrainian customers, "outbound" for traffic sent by our offshore clients.
