
The Federal Government of The Imperium of Diamond's

Contacting for Organization of the Islamic Cooperation

Wednesday, March 15, 2017

The King Gottwald Peter

The Imperium of Diamond's federal government

<http://www.TheImperiumofDiamondsGovernment.populiser.com>

I King Gottwald Peter and my greating for All member state's of the Islamic Cooperation

I Thank You for weighted Secretary General of the Organization of the Islamic Cooperation, Thank You for your support and constant activity and endurance, I so very much for Dear representatives of States to membership in the Islamic Cooperation, and certainly I want to also acknowledge my interest in social co-operation and enable even step for us common development.

My interests contemporaneous communications are intended for the possibility of jointly discuss interests of Islamic states, and I want this to use my current values and to support the development of your states and ensure friendship for the purpose of our cooperation.

Thank You for your support and interest in the opportunity to develop my side as well Thank You also for your continued support for stabilization and security to other countries where it is in my interests to act to ensure my support and cooperation to You.

I really appreciate very much appreciate that your interest in cooperation in Islamic countries is also an important support for a Palestinian state, a state which has defend considerable opposition and territorial oppression and monopoly fraud at International level, the catastrophic genocide and acts of forced violence and aggression, so your support for a Palestinian state is a really important step that raises hopes of life and Islamic faiths in many Palestinian citizens who want a free life and stable civilization without conflict and discrimination.

My personal interest are also provide my own support for a Palestinian state, thereby ensuring better stability increase security, and the development of civilization, but also reconciliation relationship with the nation of Israel today its strategy and political activity achieves true form strategies of fascist Germany in the Second World War.

My personal goal is to provide for a Palestinian state in a much better position for the stabilization and development, thus allowing use my menu to open options for the development of business cooperation in the territories ID's Diamond Oasis and thereby enhance growth sources civilization of Palestine and much better power development policy on International trade position.

Territory ID's Diamond Oasis is now open for business beneath development cooperation strategy, indeed the whole world, and thus allow such rights and the state of Palestine. Steps may be stabilizing development of agriculture, industry, construction and financial industries. If the government of the Palestinian state will enable our cooperation, I can I communicate better with the Palestinian representation of the economic structure of Palestinian civilization, and therefore I am able to support the development of the founding management business structure Palestinian businesses and corporations in the territory of my country, and thus ensuring a much better independence Palestine against the current difficulty of the conflict with Israel.

If the Islamic states have an interest in supporting Palestinian business

growth, and stabilize my country, territory, I certainly support the possibility of creating a common contact and communication conference at which will be our common objective to jointly agree among Islamic States in order to develop the business infrastructure in the ID's Diamond Oasis and thus ensuring a much better ability to support security and stable growth of the Palestinian market.

My country ID's Diamond Oasis during my intelligence, business planning able to Palestinian and other Islamic business corporations to ensure significant growth in international trade and the dominance of modernity and prosperity competitive, signifying improved capabilities to further its own market development of Islamic business corporations, directly abroad.

ID's Diamond Oasis is territory which is intended for the same trade cooperation between the rest of the countries of Africa, Asia, America, Australia and parts of Europe, and therefore I believe that the interest of your country can be a truly successful business step for the future of the business network of traders of your states and nations because the ID's Diamond Oasis will soon also the center of many global merchants on the network level on a global character. ID's Diamond Oasis, the current plan for building a civilization is based upon the strategic plan for the development of an industrial base ID's center, so that it can build a residential city for the first ten million people, and in just twenty days from the first day of the commencement of construction.

Today it is still my main vital interest to achieve the steps of cooperation between all countries around the world, and thereby ensure the growth of our global policy into actual format as a unified country's government and state without territorial boundaries, unified civilization as it was in the early interests Allah during his beginning of the creation of mankind and our world.

That's why I do it again accepted in full force and damage-law of a Palestinian state on its own to announce also the federalization of my country and the creation of joint States and ensuring a much better profit possibilities of undisputed territory for human development, and greater support for the growth of civilization to the present territory of Palestine because of the ability of the state organization of a unified civilization format, meaning opening new positions and developing worlds political strategy.

For the purpose of the development strategy, our business corporations and states can better align and for developing partnerships traders for the development of partner markets in the field of military technology, electronics, computers, machinery, chemicals and energy, the mines, architecture and construction, transport industry , many others with similar interests that this act creates growth opportunities and our cooperation for the development of our civilizations.

Today is my interest directed for example to build ID's Brick industrial production, development of industrial production traverse, the development of production of concrete and techniques for the construction industry, glassworks, city construction and other centers of the construction industry which today is designed to ensure the construction of the city that it will be built in only 20 days beyond the capacities of the population of 10 million people, around 12,500 residential skyscrapers. Therefore, it is also my real interest to support the restoration of civilization, Iraq and Syria, as well as securing better stabilization of the Libyan state after a bankruptcy that caused European crime and terrorism.

Therefore, I ask, if true your support of Islamic countries to stabilize my civilization, thus I want to get your further support for the possibility of allowing

my cooperation with the countries of Iraq and Libya, with the rest of the states like Afghanistan, for the purpose of humanitarian cooperation that this will enable use also my strength to renovate and stabilize damaged civilizations that have suffered many losses in the period of heavy fighting and massacres in the fighting against the Islamic State of Iraq and Syria, Al-Qaeda, but also the current rebel groups Libya.

I can support the renovation of infrastructure, renovation and modernization of agriculture and mineral resources, stabilize and modernize the industry, but also the possibility of military security and stable growth with full integrity principle inherent States and without future needs for international cooperation and a monopoly invasion of foreign states.

My request for the establishment of joint business strategies and interests is widespread mainly on the political level, and the ability to instantly activate, ID's can establish cooperation with the Bank of your Islamic countries and achieve success which means the ability of a financial building large capacities joint business planning multilateral projects which are therefore benefit for the joint forces of the Islamic states.

ID's cooperation with banks a State therefore represents our collective ability to build business and finance capital at the level of 1 000 000 000 000 € in DMD international currency, with uniform determine bilaterally to every state in the Islamic cooperation and thus allow the emergence followed by a much more dynamic projects the growth of a common market region, because my country is part of the Centre of Islamic countries and thus to the future with great probability for the full cooperation of Islamic cooperation.

Our cooperation in banks can immediately provide the ability to create a business management which also allows a business corporation of your states, simply and without big financial costs, ensure the growth of their own branches in the ID's Diamond Oasis, and the act of immediate expansion of trade networks with your state's interests in abroad, but so will allow to establish a new business headquarters of the Islamic Bank's in the territory of ID's Diamond Oasis. ID's government and encourage the development of new branches of your business corporations States during the financial foundations of the ID's investments.

It is also simple, support our cooperation to create a management plan for the market of foreign corporations, therefore, may come to the territory's Diamond Oasis ID, and thereby get immediate financial investment as an intermediate material in constructing.

For safety, the Islamic region, my interest is also to establish cooperation with a group of Islamic Military Cooperation, state multilateral security movement with Head Quartier in Islamic Kingdom of Saudic Arabic, and I thus offer rapid development of armies, which also means full independence to NATO occupation collaboration to your destabilization and therefore certainty of securing a much stronger Islamic region the nature of military equipment. I our cooperation will ensure the modernization of military technology and the improvement of military security infrastructure, and centralized security networks, full stop development of radical and separatist groups in Islamic countries, and in this interest I want to especially encourage cooperation with the Government of Iraq, Libya, with Syria, Yemen Pakistan, Afghanistan, and of course with all the states of the Islamic cooperation.

My interest promotion is open to the possibility of stabilization of Libya, but I personally ask the state self-determination and the elimination of groups that do

not respect the safety rights of free democratic state for the election of a new government.

Our military cooperation is able to provide full stabilization of Iraq and Syria, as well as ensuring full safety features. Our military cooperation can also promote the growth and strength of Pakistan to stop Taliban network and other terrorist groups function.

Today is my first interest also stop the crisis and risks in the Red Sea, where Somali pirates because there have been attempts by the occupation and embargo trucks of goods of foreign countries which have their own complications with the right to develop and cooperate on an international level.

In my interest in the Red Sea, I want to get right to control security against piracy, for which today I expect the European covered acts of terrorism which will develop steps for the deterioration of trade relations of my country and secretly decentralize our political and business interests session.

My offer for the development of safety is also intended for the possibility of our cooperation in the development of a network of new forms of military bases which are hereby based on the open-law about the possibility of global functions, such as the format of international military base that this will be able to provide solid strength of security in the states of your country, together well above the level of prevention against other threats to the growth of the risks of the coup illegal group or terrorist organization as currently ISIS in Iraq and Syria.

The international military basess is built over the format of the International Military and Industrial colonies that this will ensure the mobilization of military technology, and increase strength of the industrial capacity. You'll never be dependent on acts of bombardation of your industrial areas and military bases in the terrorist occupation, because your government always can immediately take advantage of co-operation in the territory of the foreign state and mobilization of common capacity colonial armies into the future global level.

It is really true and simple, step for development the first biggest army in the world, and one step one declaration, into cooperation we developed global strength and the power !

This means the ability to use the forces of global military nature, meaning always hard superiority against anyone who stands in opposition to your legitimate interests. Today there is not any powerful army, and because your own states and civilizations actual rights victory and success, fearlessness and development in peace and respect.

First Colony is intended for the construction of the ID's Diamond Oasis, and ID's government will ensure full capacity investments and industrial growth to a level that reaches capacities up to a million autonomous tanks, one million of autonomous space fighter-bombers, and ten million inter-stellar forms of ballistic missiles as a minimum basis. The same capacity will be supported in growth also in your countries, if your states are willing to accept such cooperation.

In order military ID colony's Diamond Oasis is therefore the ability to create collaboration immediately, and thereby also ensure the growth of the first infrastructure.

My vision as our shared objective today is to eliminate all terrorist movements from Islamic countries and states, thus ensuring truly real and lasting stability in the region.

Today in Islamic states as well but many groups in the movement of the peace or legal nature, and I own interest also support many of the structures of

society, but only in the interests of cooperation with the purpose of the activity on the territory of my country and without any possibility of destroying the integrity of other countries abroad.

The nation and the people of Western Sahara in the Algerian camps have opened the possibility of obtaining dual citizenship, for example, even on the territory of my country, and thereby improve their quality of life and stability, freedom of civilized life. In Somalia, the country has many groups with interests of their independence, and I will certainly support the possibility of their arrival in order to develop a better quality of life. Further, for example Amazigh movement that comes from the same region and that certainly people who own rights to access and civilizational cooperation. Furthermore Kurdistan, the Libyan movement, the Somali movement, Saudi movements and movements of other nations as well as the Palestinian state are always open to the possibility of our rights federalization and the development of a common civilization in the territory of ID's Diamond Oasis. I actually pulled out everyone who owns his interest in his life and civilization growth in the country Imperium of Diamond's and that even such basic strategies really I certify that today is my main interests diplomatically unite the entire world and support the first vision of Allah.

My interests humanitarian aid, today especially, are intended to stabilize the rights of refugees and thus ensure their access to my land, so that the people of Iraq, from Syria, from Libya, from Egypt, from Palestine, Afghanistan and other countries, he therefore did not have to run up long trips to European countries where refugees are waiting only loss of his family in a long journey and exhaustion, death of their own neighbors and even the life of Islamophobia European countries that regularly reject all Islamic people and the Islamic faith or any of the Islamic community in the country and opportunities for the establishment of mosques. Therefore, it is true that my permission to deport all refugees in the ID's Diamond Oasis is truly and responsibilities of the United Nations Convention on grounds of UNGA.

My interest is also intended for all those who are today in the world are forced to live in refugee camps, and they will be encouraged to use their rights to deportation. Today's migration and immigration crisis is indeed a serious problem, and really hard to disaster statistics biggest since the Second World War.

I therefore indeed confirm my interest in supporting deport all refugees who live in camps on the territory of the European countries in African and Asian countries, but also in America. People who are looking for a new home and their lives remained trapped in refugee camps, often with slow intake of food and medical care, no social quality, and thus in the same captivity as catastrophic in the history of the people imprisoned in fascist concentration camps during the Second World War.

ID's Diamond Oasis is a country open to the 10 million people in the first year, and in ten years I can support the arrival population to 150 million new inhabitants. Therefore, it is my goal to support all of the world's migrants, refugees and displaced persons, as well as small children suffering from lack of food and medicine, it means saving 15 million children each year.

I ask because I also support your countries, such as the establishment of simple agreements deport all refugees to the territory of the ID's Diamond Oasis, thus ensuring a much better world security and stability but also the assurance of quality of life for all refugees. ID's government is in full readiness in case of opening joint cooperation between our banks, thus ensuring financial payment

for cooperation to capture all the refugees and their deportation to the country ID's Diamond Oasis.

The first residential centers and basic industrial building will be constructed in the form of civil colonies, which can hold up to over 500 000 people, full supply of food, water, electricity, telecommunications, hospitals, schools, police, army center, accommodations, commercial facilities, a playground for sports activities and also the ability to develop socially, as well as ensuring industrial production and agriculture first base. Therefore, every exiled refugee that can take advantage of the right to life in a normal civilizational environment that is very different from the environment of refugee camps at the concentration camp during the Second World War, and even in a situation where nations and peoples really hard each day refuse to support any refugees mainly from Islamic countries.

It is convenient for You to maintain the Islamic population in the Islamic region, because this is a native of the country of origin. Population Islamic origin if they move to Europe, their rights in the Islamic faith are everyday damaged and blocked every day prohibitions and discrimination for wearing the Islamic textiles, discrimination, public recognition of the Islamic faith, discrimination, the traditional Islamic way of life, but sometimes even a group of murder and full media support for the growth of racism in order to refugees forced to go abroad. Here in Europe, the Islamic belief that only lapses and losing opportunities to develop. In some refugee camps, people must live in an infection and viruses without the ability to treatment in the cold and lack of food, it is the only option that is open to Islamic supporters, if they want to live in Europe, and recognize Islamic religious rules. Today there are many such people released, and the statute as Orbital refugee in full isolation and without any rights to socially develop the company, directly or closed in a refugee camp which is in the same form as the concentration camps of Hitler.

Current development plans for ID's Diamond Oasis are based on the capacity of the first civilization of the city for 10 million people with an act of construction within 20 days from the start of construction, and thus the strategy of food, health and education and sanitation resources, normal form of advanced cities and civilizations. The only thing that is necessary for this act, just simply create a stable cooperation between traders and banks, and I therefore expect that even your Islamic states will gladly take advantage of these offers are again favorable business step for your common development.

If your states of the Islamic Cooperation confirming their shared interest in the development of our state fairs, I therefore ask also the governments of Egypt and the Republic of Sudan, establishing a joint act of territorial recognition of international borders and create an agreement about the possibilities of a common growth of the transport lines, land, air, is an option build and water and orbital line, but first I am compelled to ask for your support of the Government, to enable them to open basic industrial workshop in the territory of a State, and thus build technology on the way hover-Craft that this will be the ability to first ensure the transport network and enable import and export trade cooperation between Islamic states and business corporations.

I therefore ask the ability to open hover craft center, as the format of bus and truck traffic between all most closed Egyptians and Sudanese towns from the center ID's Diamond Oasis, and also allow access to nearby shores of the Red Sea or to the dock, so in order to secure market access for other Islamic countries of the region.

In the case of access to the shores of the Red Sea, for your country it becomes possible to establish a business strategy for the development of new economic zones and population centers from which You will create a new cargo port, and the ability to grow new town on the territory of your State

ID's government further support for the development of trade routes between our countries, and this we can do much better growth on a common level of trade. ID's government supports the construction of the highway to the nearby cities of Egypt and Sudan, and therefore firming full and stable business development skills. ID's, the government will also build on its own airport, and therefore the ability of our aviation business cooperation, as well as opening up the market for airlines.

Highway that will be created from the ID's financial investment, and thus from their own ID's financial guarantees, because your country may again use this step to better urban modernization goals at the edge of your states in the zone of the Southern Egypt and Northern Sudan. Above all, economic growth ID's neighboring towns so it means the ability to use the actual stability of the business partnership between our countries, but also enable a better economy with collaboration markets between Sudan and Egypt, because the ID's Diamond Oasis is this ideal step for the transport links between the States. Highway can be built within a period of two weeks if the stability of ID's Diamond Oasis markets will be on the active development level.

The end of the document, I Soon letter IAIC document, please ensure awareness of Bar Associations, and thereby support the logistics of my country's government, the expansion of political circles and especially to allow the full capabilities of our full cooperation to cooperation in constant interval.

My main political activity will be confirmed in the document's of The ID's Global Card, while communicating to all organizations in the world. Today, more than 50 organizations of the world, for the purpose of partnership and cooperation, and document is under next development, but too under lack of time.

Surely self-interest in the Partnership OIC, and encouraging the growth of Islamic traditions on the territory of ID's Diamond Oasis and in other territories, my plan is to open new mosques, and new centers of religious culture in Islamic countries, as well as foundations support full rights for the development of Islamic religion in my country.

Today, my life in Europe, I am here as a European political prisoner because of apartheid terrorist groups, and thus I am trying every day to ensure my freedom and give a hard blow against my opposition, so why make such a body have to always disappeared and could not exist , if only for the fact that this entity received its own initiative, the opposition against me. I develop a legally justice, I get stronger and stronger rights at the international level, legal scales today in its own true nature of the legitimate government, and certainly much greater political significance than the value of European governments and policy at the international legal level. According to international law and the principles of the UN Charter, I really like the main European representative for European countries. Such values I own at the international level, political rights, and the only thing is therefore increasingly necessary, just merely extend such knowledge in public companies and society of nation and therefore stop the social and national development in the current direction of the global terrorism that is already activated.

Therefore really I Thank You for your every assistance and support for

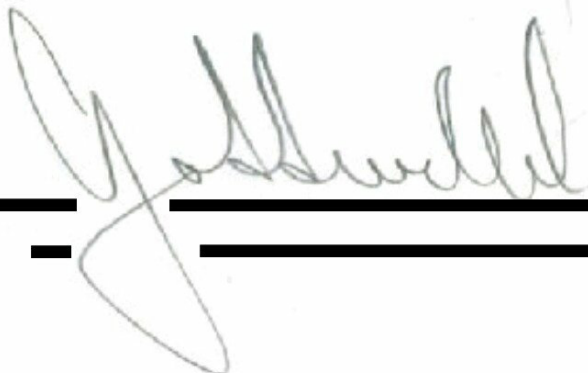

growth because the current terrorist blockades European terrorism are very real threat to the stability of world politics, and indeed a crisis for the entire current and future world, and that is the main goal of global security to ensure the immediate cooperation stabilization and joint support.

I Thank You for your time and patience, I look forward to meeting our options, political cooperation, and the initiation of joint agreements between states.

Our goal is common, and it is therefore necessary buildings. Thank You very Much !

The King Gottwald Peter
