

Commercial Payments Exchange (CPX)

Turn Expense into Revenue

The Priority Commercial Payments Solution Suite can
turn a cost center on your balance sheet into a profit center.

We use a turnkey platform that leverages your existing AP/ERP system to eliminate costly checks at no cost to you

A single pay file submission that allows you to use our complete solution suite with one output file from you

Plus an industry leading supplier enablement team that signs billions of dollars per year in commercial spend

Priority CPX partners with large- to middle-market organizations to automate supplier spend, eliminate paper checks, and create a revenue stream through that automation.

Today's payment environment is still heavily reliant on the use of checks to pay suppliers. Priority offers an integrated payables solution that can automate 100% of your AP file with multiple forms of electronic payments.

As your potential partner, **we'll conduct an analysis of your vendor AP file and present our findings, showing the cost savings and revenue projections.** These are real solutions with real results!

Priority delivers:

- Solution-driven culture
- Consultative approach
- Sophisticated Commercial Payments Solution Suite that maximizes supplier participation
- Seamless integration into existing payment process
- Expert pre-sales support for spend analytics
- Proven supplier enablement program
