

XAVENGEERS

NFT

SUMMARY / INTRODUCTION

XRP Young Avengers NFT is a collection of 70 unique, hand-drawn NFTs, which will be minted on XRP Ledger. They will have different attributes and styles, each with different degrees of evolution (scarcity, exclusivity). XRP Avengers NFTs will consist of different collections. Each character will have only 10 exclusive variations so it makes them very rare. Valuation for each variation will be depending on tiers. Characters will be listed (evaluated) in tiers – starting from Metal, Bronze, Silver, Gold, Ruby, Sapphire, Pearl, Platinum, Black Diamond and finishing with the most valuable – Ultimate Gem.

New characters will be revealed on a weekly basis on our social media platforms.

GOAL FOR THE NFTS?

Exclusive NFT's collections of XRP Avengers will help to create value of XAVE token holders. These collections will be used in holders giveaways and added in open sale for the community. Income from the NFT's will be reinvested in other meaningful initiatives from the XRP Avengers with the goal to promote and thrive XRPL projects and community.

WHAT ARE NFTS?

A non-fungible token (NFT) is a digital asset that exists on a blockchain (e.g. XRP Ledger), a record of transactions kept on networked computers. The blockchain serves as a public ledger, allowing anyone to verify the NFT's authenticity and who owns it.

So unlike most digital items which can be endlessly reproduced, each NFT has a unique digital signature, meaning it is one of a kind.
