Nevertheless, until just recently, scientists were confused.

In the lab Aloe [Whitefish Glickman](#)

vera was often of no value because the primary recovery ingredient in Aloe vera deteriorates quickly after it is

harvested.

Within simply a few hours, unless correctly protected, the critical compound of Aloe vera breaks down.

Not a great deal of individuals know that.

Beta-mannan□ combines the best protected, organic, Aloe vera offered in an appropriate combination with natural Vitamin E to guarantee that all the recovery benefits of Aloe vera are retained.

Beta-mannan□ provides exceptional assistance for your immune system and boosts your energy level without stimulants.

What makes Beta-mannan□ separate from all the other Aloe vera dietary supplements?

The response is easy.

In the fresh Aloe vera plant there are more than two hundred different compounds.

A few of these compounds have strong laxative impacts.

Other compounds may trigger allergies.

Appropriately drawn out, the healing compounds of Aloe vera are totally free of these laxative impacts and without the allergies that can accompany fresh Aloe vera gel and other incorrectly prepared Aloe supplements.

Beta-mannan□ consists of just the extracted beta-mannans and beta-glucans which have actually been shown to possess the healing benefits credited to Aloe vera with not one of the prospective negative impacts.

These pure beta compounds are in the carbohydrate group.

Only protein substances, not carbohydrates, are understood to trigger allergic reactions.

Therefore an allergic reaction to these beta extracts is probably impossible.

And the beta substances in Beta-mannan□ have actually been used by tens of thousands of people exceeding 20 years without any instance of allergic reaction or negative result ever reported.
