

Core Teaching Site Quality Improvement Approval Form

Resident Name(s): _____

Project Title: _____

A quality improvement (QI) project should bring a clinic/microsystem/module together to address a problem identified by the group. A project based on teamwork and shared concern makes for a better QI project because it addresses the group's needs and uses clinical resources appropriately. Therefore, to ensure QI projects embody these ideals, all resident QI projects completed to fulfill program requirements must be approved by their clinic.

Instructions: Please select your clinic type in the boxes below, answer the questions, and sign to approve the residents' QI project.

Community Clinics – since there are various types of clinic leadership, this form can be signed by an individual who oversees and manages clinic affairs.

Clinic Name: _____

Name: _____ **Date:** _____

DFM Core Teaching Sites – residents must seek approval from their clinic managers and site medical leads.

Core Teaching Site: CTC SHC FMTC

Clinical Manager Signature: _____ **Date:** _____

Site Medical Lead: _____ **Date:** _____

Residents, please note: QI projects must receive this approval before they commence and projects will not be considered resident scholarly deliverables unless they obtain approval.

Upon receiving clinic approval, scan and send signed copies of this form to Nathan Turley at rrtc@ucalgary.ca or, if you do not have access to a scanner, take a photo of the signed form and send it to this address.
