All I want to do is look after my dad, so when I land the job of a lifetime that will take care of our expenses, I grab at the chance with both hands. Little do I know, the impossible will be expected of me.

Slowly my smile fades, and my laughter dies until all that's left is the broken puppet my personal hell created.

Liam Byrne, the head of the Irish mafia, returns from a business trip, and I expect my hellish nightmare to increase ten-fold.

Brutal, merciless, and dangerous, Liam is feared by all - even the monster intent on killing my soul.

Turns out I was wrong.

The instant Liam notices what's happening, he takes me under his wing, and even though he's all sharp edges and threatening growls, I feel safe with him.

Little by little, my sunshine creeps through the cracks, and my laughter returns.

*But can one monster really defeat another, or am I just a girl dreaming about the impossible?*
