Cryptocurrencies have rapidly evolved from a disruptive concept to major financial assets within a decade.

Despite frequent fluctuations, the overall market cap for these digital assets is rising gradually and exceeds \$1.1 trillion as of March 2023.

Users can access crypto products in two main ways: crypto exchanges and (or) crypto brokers. Crypto exchanges, like OKX and Binance, are platforms that connect buyers to sellers and facilitate direct trades based on current market prices.

In contrast, a crypto broker offers a simplified way to trade digital assets via an intermediary based on prices set by the intermediary.
