## ID's Actual plan for Global Peace

---

Sunday, January 22, 2017

In each case, WD Alliance becomes truly international activity becomes subject much more rewarding and meaningful than the perspective of justice unstable format UNSC, and therefore the full capabilities also provide immediate creation of dominance against all threats, conflicts and wars around the world.

Therefore, WD Alliance becomes subject as the most important partner for all countries in the world, and ensure our collective ability to secure peace and development for the session.

The only act that we therefore need is only a declaration of your states to ensure our cooperation on behalf of WD Alliance, and therefore creating a national team to represent the WD office for your state, and thus launching an autonomous function of rapid development of global forces with large civilization and economic benefits for the your country.

# Description of the International situation

---

The main problem of global security becomes the policy of the European states that after acts of genocide of 340 million people is transformed into a form of fascist dictatorship led by the terrorist organized network of politicians and government services and in cooperation with civilians as well as to the opposition to the cardinal points of the legal status of International law, this is an act of European policy for the creation of the **First Global War** risks the extinction of all humanity.

The main problem and the strength of European terrorism is the USA Alliance in NATO and the main force support for the development of the European Security fascist terrorism. USA thus becomes simultaneously the first to fourth or problem to world peace.

The second problem against the security, the Russian Federation looming new Cold War, when the opposition especially against sanctions from Europe and the US, and therefore breaches the principles of the peace process secure justice in accordance with International rules. The main problem of the threat from the Russian Federation, is the only one that the Russian Federation refuses to apply the procedure according to legal courts.

A third problem is security against China PR trying to occupy Chinese territory seas, without respect for International obligations and national security.

If the cardinal chooses a strategy for security cooperation against European states, the USA must first stop cooperation with European states.

Europe soundly losing military strength and International support for stabilization. European terrorist organizations will soon defeat, not victory. This creates a threat to the Russian Federation can use contacts with China PR and thus create dominance against global security, in order to defend their own crimes. Therefore, Any State from around the world can use the document WD International Alliance, and because of US cooperation NATO is this necessary for the US responsible to launch full operation of International diplomatic organization form a stable form of WD International Alliance, in order to create a global force of armies and security that the USA will replace the NATO force and at the same time can create sufficient opposition against threats from Russia and China.

The world is therefore well advanced toward developing and gaining the ability to secure stable growth in a situation of International politics. In the event of further conflicts and war risks due to the activities of Russia and China, it will be sufficient WD Alliance as the entity responsible for stopping the crimes and the threat of war immediately.

If the cardinal chooses an obligation to cooperate in order to eliminate the threat of the Russian Federation, it is therefore necessary to realize the facts threat of war from European countries, and that means a much bigger problem than the force of the threat from China and Russia. Therefore, it is now convenient, safety and much more needed to ensure the use of the situation hostility of the Russian Federation for the purpose of the European alliance against terrorism. The Russian Federation is therefore much more important ally!

The Russian Federation must therefore only be forced to step only, meaning the peace process and the initiation of legal proceedings which will decide on the Rights of the Russian Federation for Peninsula Crimea, as population strength and view dozens of years responsible for self-determination. Therefore, it is confirmed that the sanctions from the US and the EU against the Russian Federation are net necessary, but the Russian Federation must start to move in peace processes.

This conflict can be ended with the Russian Federation and the European terrorism is stopped. The Russian Federation currently losing needs to seek cooperation with China conflict, or military gain much greater opposition than the USA and Europe. Therefore, there is much less risk of conflict at the International level which automatically mean stopping of Chinese threaten of conflict too.

If the cardinal chooses an obligation to cooperate in order to eliminate the threat of China, it is preferable to use a particular strategy WD International Alliance shall therefore be developed to the level of global power capable opposition against China, but it is therefore necessary to ensure the removal of the first European terrorist policies. The interest of Chinese threats, it is necessary to use steps, meaning the application of conflict prevention, and that means full performance WD Alliance forces means that our ability to immediately dispose of all the values of civilization terrorist. That is an achievement that blocks all the conflicting states in the intentions that mean the ability to make any crime.

Current development policy, Europe has used support from the USA, so there is stability

of European terrorism as a subject of European policy which creates its own steps to reduce sanctions against Russia, and the creation of a joint agreement with Russia and China on cooperation for the joint protection of terrorist regimes of these states, if it is need.

Therefore, the best strategy is to force the USA to stop cooperation with the European countries, as well as for the purpose of the act of liquidation of the European countries which are therefore actor in a new direction for the unification of the terrorist forces of Russia, China and the US as a global opposition against the peace and in order to create the First Global War.

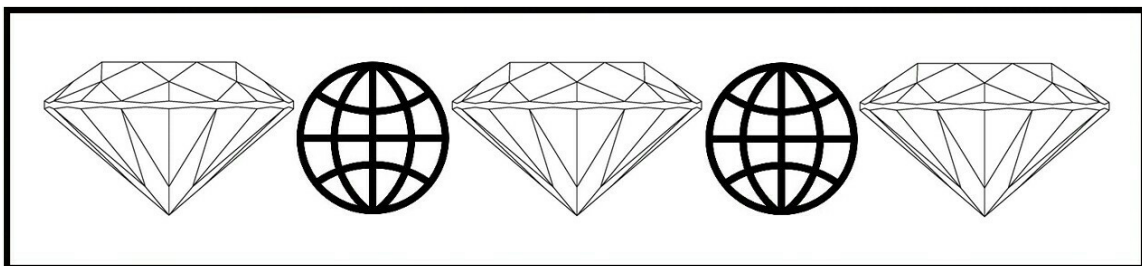

In the case of unification of terrorist states, therefore, in order to prevent bankruptcy and the emergence of the global economic crisis, then other states will be forced to seek cooperation with the ID's government as an act of common trading session that immediately replaces the dimension of world markets and therefore stabilize.

If this format is applied, it is therefore necessary to use a strategy WD which is intended for the use of weapons of mass destruction for destruction capitals of some countries terrorism, and that it may legitimately be also named WD Alliance to internationalizing territory such terrorist nature, USA, Russia or China, it means instant ability to obtain full rights of sovereignty and jurisdiction of the state and development of International relations of such a country, and therefore in our cooperation, this means the ability to determine the security of International relations at the strategic handling with a new power that will be reused as opposition to other entities terrorism. WD Act authorization for the internationalization of terrorism territories is dramatically greater success for all governments around the world and the opportunity to strengthen the value of a global alliance of civilizations of mankind, the emergence of a common economy and ensure a much better feature of our cooperation WD Alliance which strategically brings much greater peace for your future states and nations and civilization favor.

It is true that every terrorist state alone is a risk that extends to the level of a really big threat worldwide nature, and therefore it is necessary to carry out the act immediately to prevent the development of terrorist policies at International level, thereby ensuring the act of disposal of rogue states with weapons of mass destruction. That other terrorist states have a position which is not anyone able to extend the step of the new terrorism, and also because these countries as the first act for determining to use weapons of mass destruction, that such states are increasingly gaining responsibility for the act of using guns of mass destruction against them or another state.

Terrorist states have the right to speak publicly about stopping terrorism, and thereby ensure full stability to global security without further conflicts, the use of this law to stop the destruction of their country.
