Veronica these from are the site who did the costume. They said you will not be able to get into this yourself, and you have to have someone to help you get into this.

Veronica tell Rain what you were tossing around in chat with me, both Deborah Dutch and Deborah DePaulo. They're on Instagram and when you're ready with the photos and the youtube.com video they have a high number of followers on Instagram.

I will be doing a pdf of this and I suggest grabbing a pdf hosting website like docdroid to help you sort all your notes for your videos and then when you have everything there, you have something to study from. Then Katie you will have someone who'll be sporting your dress for her Vlog debut.

You have ample video time to work with on both YouTube.com and Vimeo.com so be sure to do this justice and go viral. Katie let me show you something she ended up getting under the radar for doing.

Have you read up on [this incident](#)? Rain you will be credited for one of the costumes as she's got one coming from Amazon.com. Katie you will see a plug in the closing credits when she introduces herself to the world for the first time. She's also on [Reddit.com](#) now too.

She did 6 months research in less than 2 hours, to get the costume and did a dry run. Didn't get the approach right as I will share her comment here then I will share a link to a larger

facebook page where I did some tweaking to her [pre-sequence photos](#).

I am sharing some of the places she can work with to get her iOS operating like a super VHS video camera, this will go with her dress that she has. I found [this program too](#) for her to work with. This is what she said in chat, "I looked thru several pics and I have an idea of what to go for in my next round of pics. Thanks for the point of reference stay turned I have a few ideas. 💡" The font change denotes her. So I am going to make this available as a url and post this to Broken Logic so they can help toss some ideas around too with this. She's going to be hanging in here and on science humor, this e-mail will be shown on [Not The Babylon Bee](#) so she can get some insight how to pull this off. **So Veronica with your WritersCafe.org account -- be ready.** Be sure to be able to employ speech to text on your word processor as you'd be working with a few small press authors to help fine tune what you're doing.

She will be even discussing [Am I Making This Up](#)... Katie the dress will be giving some face time when Veronica is filming.

Hi friend

We apologize for the confusion. Please note that without help. she can not zip it up and we do not have an idea about that either 

Best regards,

Rain Wang

Wang, I am getting you in touch with Veronica Denise Mitchell as I am giving the pdf of this e-mail to her via facebook because she's still getting her way around zoho.com and she's got a [WritersCafe.org](#), [YouTube.com](#), [Vimeo.com](#), she will be known professionally either as her married name or Veronica Glenn. On her facebook they're interchanged as she's got a dress from Unique Vintage to work with too. You will be credited as your Chinese name when she does her

9/12/2018

From the one who made this 

youtube.com videos. She will be doing this at length and will be working with a surgeons hand. She the costume on backwards; could you give her a briefing how she gets into this? Veronica they have an Instagram account with 11K followers so do these right. You want to be able to do this justice and so you're going to also be playing with your newly minted youtube channel too. Her test videos I told her she'd need some practice before she gives you the live photos. I am suggesting she works with a video ap that allows her phone to operate like video camera. Veronica the part you ziped in the front goes in the back; the way it supposed to go on is where you're not able to get out until someone let's you out. You have more research to play around with before you effectively do the photos and be able to do this in a public place.
