Trenbolone acetate is usually used at doses of 35-150 mg/day, and more typically 50-100 mg/day. The 35 mg figure generally is appropriate only when having high personal sensitivity to trenbolone-specific side effects.

Last night proved to be a great opportunity to meet & greet people whilst talking through the charity work and transformation- but it highlighted just how reluctant men are to engage with this issue. The aim is now to raise numbers, get a regular feel for where we can get people together, and to keep pushing forward with the transformation.

OBESITA': COME PREVENIRLA?

Obesity Day 2020

Trenbolone Acetate is a 19-nortestosterone (19-nor) anabolic androgenic steroid. The 19-nor classification refers to a structural change of the testosterone hormone in that it lacks a carbon atom at the 19th position. This puts Trenbolone Acetate in the same category as Deca Durabolin (Nandrolone Decanoate).

□ SPEND TIME WITH YOUR HOMIES: if you're spending time with family this Thanksgiving, be present. I know it's not as easy as just putting away that device, it's figuring out how everyone can enjoy being together. I'm 100% guilty of this, I always found my family just likes to sit and watch TV where I'd rather go out for a drive, a walk, or play a game. As a result of this disconnect, I'd spend time on my phone, reading, watching videos, scrolling through social media. Time with your family is precious, so figure out what works for of everyone to enjoy the time you have with each other. Compromise is key.
