# IAIC Invitation for Japan Imperial family

---

Hello to His Majesty The Emperor Akihito, and with my request to support the awareness of the Japanese Empire Chamber of Justice about the open possibility to use the IAIC Authority for ID's stabilization, activation and application but also by agreeing to promote the growth of friendly use of common options.

I have recently noticed the interests of Your granddaughter, the Princess Mako of Akishino,, and the devotion of a new man, Dear Kej Komuro, with a generous advocacy and social respect, but without the family's noble family, so I also support men Your granddaughter of Princess Her Imperial Highness and Dear Kea Komura, the opportunity to get a better title in society and thus to establish his own status on the political level of the prosperous meaning of the Japanese Empire family, so I propose the possibility of creating our cooperation at the IAIC department which brings many new things for Your country Opportunities for development, business and the chances of linking to other international partnership networks.

I would certainly be pleased to see our states connect ourselves with a new way of building friendship and I guarantee my respect for this relationship, which is also a step towards extending our civilizations to a more advanced level, giving our countries a more dominant and stronger position at the international level.

The IAIC document offers You the opportunity to give a better place for Your princess and her future line of the new family in the succession of Your Imperial Family, thereby enabling You to create a better value for Your own family, which will better represent Your Imperial Family internationally.

Your Imperial Family has a much stronger power of growth at international level and in the structure of politics and business networks that, because of the distribution of Your imperial family, creates the strength of the international level of one family clan, in future generations giving better chances for the territorial development of Your country, A better position in world policy structures.

That is why I also support other members of Your family in the possibility of creating interest for the purpose of our cooperation to use the ID's document on the rights of aristocratic families for the purpose of joint mobilization, which gives the same rights to other members of Your Imperial family and thus also the ability to expand to a significant proportion of organized Forces that in future generations can also be a significant progressive change for our Japanese and ID's nations.

The cooperation under this document gives great rights to Your family in organizing cooperation at the level of a global network of aristocratic families and monarchies, growing together for the purpose of partnership and mutual

support, and the use of joint forces for joint success.

Today's documentation is based on a view of the rights of the aristocratic families from the relationship of the loss of property rights, and today is an effort to bring about a fair return, but also to build a new beginning and growth of the joint forces in the form of a globally organized network of business associations and consortia with cultural traditions Followed by a development plan into a new monarchy using natural rights and principles to increase the stability of the state and the national movement.

Each member of the association has the right to base on joint steps to develop the legal text and the function of the joint association and the function of the internal rules of the association. For the possibility of joint assets, the territory of ID's territories is now available in a process designed to reconstruct and defend the legitimacy and strength of terrorist oppression, but also the territory of space law to allow for large-scale development. If the government of Your empire will be able to use Your country to establish business contracts and increase joint developmental interactivity on this issue.

In order to best implement the growth strategy of the true majority of the value and the importance of this plan, therefore, it is my goals to use the offer of cooperation to stabilize my country, but also to support the growth of Your civilization in Japan. The ID's Consumer and Development Fund for Your country is a plan where the ID's government asks the Banks of Your countries to create a common fund over a function without a co-deposit system, but with the logistic board's duty of reviewing the opportunity to spend on strategic development resources and the use of investment in development Countries and economic productivity gains. ID's government puts € 1,000,000,000,000 in DMD for the purpose of our first business cooperation and growth of civilizations, the budget of the first year.

In the second year, the fund will be put on a budget of € 10,000,000,000,000 in the DMD currency and thus also with the ability to establish a stable function of our common markets among states and therefore also a significant force for implementing the capacity of our joint development planning.

It is certain that in the first year I am able to repay all Japanese debts, and I do not have difficulty with this report, it is a natural task for me to pursue international peace cooperation for all countries of the world.

The ID's Collaboration System, in cooperation with Your country's banks, uses the crowd and new logistics units for untapped use to rationalize the ID's real value of the economy, and hence the strength of the coin, which enables confidence to fit its own values and the right to international recognition. Therefore, Your Banks can use this position to create full confidence in ID's economy and the full stability of such commitments without risk in the possibility of international non-recognition.

In cooperation with ID's, and together with Your country's Banks, the goal is to create global business partnership conferences with all bank representatives around the world, as well as representatives of multinational business institutions, as well as representatives of corporate networks and associations of foreign countries; Therefore, for the purpose of jointly discussing

the commercial interest and growth of the common markets as well as planning global business development.

That is why I guarantee that in the case of peaceful development, this will be ensured by the ability to build prestigious forces and significant family values which can be achieved in the form of the main centers of today's world of politics and business, and I am therefore prepared to offer the steps of this development to the cooperation of Your Imperial Family, with full respect.

I would also welcome Your support for stopping CLR relations with the European states. But so is Your relationship with the European nations. I know that for Your party it can be decentralized to a security strategy towards Japan's relations with the Russian Federation, which today reacts to friendly relations with the European states, but I also confirm that I am patient to You and, with the same interest, recognize the rights of the UN Charter which allow states To take care of their own dependency principles.

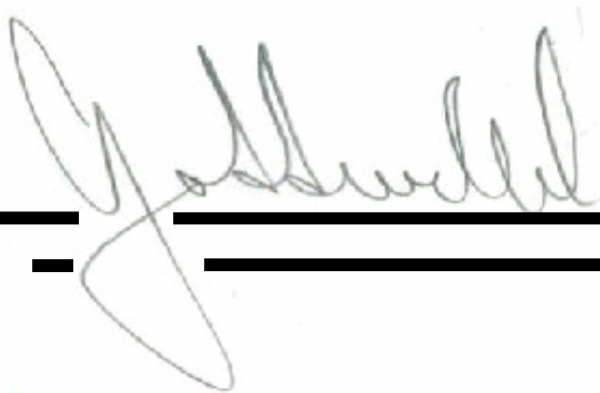

That is why I am asking You for a strategy to prevent the growth of the European dominance against Your Japanese country, thereby enabling You to assure full independence for You, which is a good step and a goal today for more than 100 countries around the world.

Such relations with European countries just rob Your country and damage the security of its future, and it is confirmed that Your contacts with European countries are also blocking the interests of many other politicians around the world because of their own concerns about legal cooperation and the application of legal principles to Common interest, and in this case, it means without the European Terrorist States.

**Thank You, in a reall, and I wish You a Good Day full of successes and good use of new oppourtunities that give You many important steps for the future of Your state as well as of the Emperor's family.**
