

Easy Methods To Uninstall Minecraft

My kids love this recreation, however it's driving me crazy. They simply want to start out fresh from the very starting on their tablet and it doesn't matter what I do (clear cache, clear knowledge, uninstall and reinstall), the sport retains crashing. What should I do?

You merely delete it from cloud and that should do the trick. If that doesn't work, then something have to be mistaken with the tablet or with the compatibility between the pill and the game.

Thanks! Sure No
