

Minecraft Recovery Compass Recipe And Purpose

So you want to know about the Minecraft recovery compass? The recovery compass is one of the many many, additions to the Minecraft 1.19 The Wild update that was released just a few weeks ago. Although it's not as terrifying as The Warden and not as creepy or as creepy as the Deep Dark biome the recovery compass can be a very useful thing to have with you in case of a sudden death.

The Minecraft recovery compass serves one purpose - to help you locate your lost items. It's not exactly the same as Jack Sparrow's compass which can take you to where you want however they have the same characteristic of being ineffective for general navigation. The compass will point you to the last place you died if it fitted.

The compass is only functional only if the person who holds it has died and you have to be in the same dimension as you died. For instance, if you died in the Nether, you need to go there for it to begin working. If pharaoh's blog of these conditions aren't being met, the compass is just spinning around, never pointing to anything.

Minecraft recovery recipe for compass

To make a recovery compass for your needs, you will require the following items:

A compass 9x Echo shards

Place the compass in the middle of the grid of crafting, with nine echo shards surrounding it. Echo shards are a new resource added to the 1.19 update, and they can only be found in the new 'Ancient Cities' areas that spawn in the Deep Dark biome.

The shards can be used to create recovery charts at present. If they're hard to locate, you won't need to make a decision about which ones to prioritize. If you are worried that you could be prone to dying and you're worried about it, you can stack your recovery compasses.
