

THE COSIMO REPORT

“Shit! I’m in trouble!”

Larry Warren

LAEG PAGE 56

This paper is dedicated to those who seek the truth and are not afraid to speak it.

'Ab actu ad posse valet illation'

(From what has happened we may infer what will happen)

In support of Cosimo publishers decision to suspend distribution of Left at East Gate, I have compiled this information to provide supporting evidence for their decision to remove the title permanently on the basis that Warren lied about his role in the biggest UFO event on UK soil.

The multiple claims that Warren makes in Left at East Gate can easily be shown to be fraudulent and untrue as the documents presented as genuine evidence by Warren are now evidently identified as being fraudulent, created by him in order to back up his verbal claims of being a participant in the Rendlesham Forest Incident.

Points need addressed concerning the ever changing narrative of Mr Warren. There are many different individual pieces of information provided by Warren which have been examined and shown to be impossible. Other external pieces of information have also been gathered and cross referenced with the details provided by Warren in LAEG which do match his narrative within its pages.

The letter evidence

LAEG excerpts

Warrens Military Documents and other supporting information

Background Information

My name is James Welsh. I am from Glasgow, Scotland. I am the author of 'Corroborating Evidence-The UFO Investigation of the Millennium'. It is a book which covers the multi faceted investigation that I conducted into worldwide UFO encounters during December 1999.

During that time, I experienced multiple close range UFO events over five nights, all occurring within a three week period. In 2001, I contacted Ron Halliday and the late Graham Birdsall- two of the UK's leading Ufologists and came forward with my experiences. After initial encouragement from both these men, I was encouraged to investigate my own sightings and spend from 2001 to 2014 engaged in the serious study of the subject.

After finally compiling years of information, I published the results of my investigation on July 8th 2014, on the 68th anniversary of the Roswell Daily Record story reaching the public.

In 2014 I attended the Paranormal conference in Stirling, next attended the SPI Scottish UFO and Paranormal conference in July 2015 as a headline speaker. Later that September, I travelled down to the UFO Truth Magazine conference, where i met Larry Warren for the first time.

Upon discovering i was a huge Star Wars fan, Mr Warren opted to inform me that he once met Carrie Fisher in a bar in L.A. and allegedly she hold him that LAEG just happened to be George Lucas favourite book on UFOs. As far back as then, Warren was clouded in controversy as he had been under fire from someone who was drawing attention towards him. Sacha Christie. Warren and his small gathering of supporters at the conference were all very dismissive of the matter, attributing this unwanted attention to the actions of a 'crazy' woman, 'jilted groupie', 'scorned woman' etc.

I – not knowing any better at the time- lapped it all up of course.

Soon after I was connected with Warren on Facebook and was able to see that he was very agitated at the attention he was getting online from a small section of the UFO community. The following June of 2016 I was in the very blessed and fortunate position to be invited to accommodate Peter Robbins during his stay in Glasgow, as SPI had planned on reuniting both Peter Robbins and Warren on stage together for the first time in years.

After Warren issued a threat on Facebook, the matter was reported to the University of Glasgow and Warren was later barred from being a speaker at the event. Upon arriving in Glasgow on the eve of the conference, and after our prior talk about the upcoming EP7 of the Star Wars saga. I asked Warren what he had made of the movie as it had since been released prior to meeting him this second time around. Warren quickly went on to tell me that he once met some guy that worked for Industrial Light and Magic and it was that person that had informed him that LAEG

just happened to be George Lucas's favourite UFO book. The second these words left his mouth was my first indication that Warren was not to be trusted at his word.

It is impossible that anyone could mix up meeting the iconic Carrie Fisher with a random employee of ILM. So on the eve of the Scottish UFO and Paranormal conference, things with Warren weighed on my mind. I had a restless night and a long day ahead of me.

After the conference, I had to go out and physically track Warren down to a pub in Glasgow's West End, It had been arranged for him to still get the chance to meet with the conference goers and sign books at another venue afterwards. Warren told me twice to my face that he was not interested before I left in utter disgust and bewilderment as to why an author would choose not to meet his readers and fans, sign books and answer questions and interact with people eager to meet him.

Over the course of that weekend I had the responsibility of looking after Peter Robbins while he was over in Scotland and had the honour of having Peter as a house guest. Needless to say, I was extremely proud to be in the privileged position to accommodate Peter and over the course of that weekend, got to know and make good friends with him. Peter is one of the most intelligent, articulated minded people I have ever met and on top of that I would go as far as to say, when it comes to Peter's character overall, I'd call him the salt of the Earth.

During that same timeframe, Warren uploaded an image to his Facebook page which appeared to show him and John Lennon together. After the conference aftermath, I was drawn to examine the image Warren claimed was taken on November 28th 1980 in NY with Lennon.

Within 48 hours, I personally established that the image was fabricated and was actually a photo of JL which was taken on August 31st 1980. So on top of the Carrie Fisher thing, now there was even further doubt to trust Warren at face value.

Wasn't Warren a big military whistleblower? Someone who was meant to be trusted with coming forward with important UFO information? The man himself seemed to be at direct odds with the Larry Warren persona. The claims that Sacha Christie was publishing in her blog about a John Lennon cowboy shirt Warren sold at auction were also brought to my attention and soon afterwards I decided that the Beatles connection to Warren needed further investigation.

By August 2015 I had concluded that Warren was not quite as genuine as he would like people to believe. My first line of inquiry was to approach May Pang directly and ask her about the cowboy shirt that Warren claims on an etched plaque, that she gave to him.

I was further surprised to learn that May Pang had to previously get involved with the sale of sunglasses that Warren tried to sell. Then I managed to successfully request the two letters of provenance for the cowboy hat and sunglasses that Warren sold through Cameo auction house in 2011.

Because Warren released his own handwriting Published on Apr 25, 2016 and again later on Published on Aug 27, 2016, samples became available and were compared with the handwriting on the Beatles handwritten letters of provenance.

After establishing Warren fabricated these as well as the authenticity of the cowboy shirt and confirmation from May Pang of even further questionable items sold by Warren, I alerted both Peter Robbins and Gary Heseltine of my findings. It was then, in September that I opened LAEG for the first time and began to examine Warren's firsthand claims of being a participant in the RFI.

It is because of the analysis I performed on the handwriting on the Beatles letters that i became familiar with Warren's calligraphy. So when I first discovered Warrens military documents at the back of LAEG the evidence that Warren fabricated them was not just publically available on the internet, but in every printed copy of LAEG.

- As you know, Peter Robbins parted ways with Warren in November 2016
- These findings relating to Warrens documents in LAEG were published in December 2016.

Since that time, Warren has attempted a failed bogus legal gagging order, falsely claiming that the information we were publishing relating to LAEG was damaging his rock and roll memorabilia business. Warren also issued personal threats against myself and others and broke privacy laws by getting the legal letters posted online.

He has also since went on to record several videos, two of which were removed for defamation complaints and Warren has further incriminated himself by coming up with bizarre explanations to some of the major flaws he has been caught out perpetuating.

I have now personally had to involve the Scottish press about the continued threats made by Warren and the matter has also been taken up with my MP and the Chief Inspector of Police regarding the abuse that has followed as a result of helping to expose this information.

I have put this document together so that my contribution to exposing this fraud on Ufology is on record. I cannot express or extend my thanks enough to everyone involved in this matter. As a genuine close range UFO eyewitness, it has been an honour to be involved in from assisting to keep this subject from the spread of disinformation into the UFO community.

JW

The EMN video

When Sid Goldberg uploaded Larry's letter evidence, Warren's handwriting samples became publically available. I personally took the maximum number of samples that were available and then cross referenced the handwriting traits linked with the Charlie Lennon letters that accompanied the two Beatles related items Warren sold at auction in 2011. It was because I became well versed in looking at Warren's handwriting that i was later able to identify his writing traits on his military documents.

In this EMN interview with Warren, he talks about the alleged letter he allegedly sent home.

Warren states that at the time of the alleged debriefing no one in the room was made aware that the events actually took place over three nights and not just the one night as Warren initially believed.

Warren states to Sid Goldberg that he was not made aware that the activity at the base took place over three nights until two years after that debriefing took place. That would be two years after he allegedly posted the letter 'evidence.'

QUOTE:

"...In our debriefing we had all that basically outlined to us and therefore I thought this must have happened on one night and we were responding to that incident. It turned out a couple of years later- it was not the same night, but I thought, I can't get into trouble for what they are telling me cause I wasn't in that first night- wasn't n duty.....I was with them girls in Germany" .

8 minutes 40 seconds <https://www.youtube.com/watch?v=kgoi15ZuCOs>

When you add that up, it does not add up. In this same statement Warren claims he did not know it was over three nights for two years and also states he knew he was in Germany that first night. If Larry was writing home thinking that his alleged involvement happened was on the first nights events as he believed for a full two more years, then how did he know that he at the time of posting the letter that he could not get in trouble as,

"...wasn't in that first night- wasn't on duty.....I was with them girls in Germany"

How could he have known that whether he was in Germany or on duty at the time of the briefing if he didn't find out for two years that events actually occurred over the three nights?

- Warren claims on pages 55/56 of LAEG that directly after this alleged debrief took place that he made a reverse charge phone call to New York which was reciprocated by no less than three operators before he alleges he was cut off.
- After Larry allegedly made this allegedly disconnected phone call he says he then went on to write the letter he is discussing with Sid Goldberg in the video interview.

It is important to note that Mr Warren's contents within that letter detail events are also described to have taken place in the Halt Memo. Instead of discussing his own involvement of what happened on the third night – Warren describes events that transpired and involved other parties on the first night of activity near to the base, involving Jim Penniston, John Burroughs and others. Towards the end of the interview, Sid asks the all important question of why didn't Larry write about the third nights events and wrote about the first nights events instead?

Warren replies with the adlibbed answer that, he wrote about the first nights events as it didn't involve him directly and also that he was **NOT** on duty that first night as he was in Germany with them girls as alleges on page 32 of LAEG. (Left at East Gate)

And also at *8 minutes 40 seconds in the EMN video.*

<https://www.youtube.com/watch?v=kgoi15ZuCOs>

The only problem that Larry now presents himself with is how exactly he happened to know he was in Germany on the first night of events and at the time of allegedly penning this letter evidence, when he also claims he was completely unaware that the events actually spanned three nights until two years after allegedly physically posting that latter?

So Warren could not have known he was in Germany on the first night and at the time of writing the letter which indicates that Warren is being dishonest about the authenticity of the letter. Secondly, it's also important to point out that on page 58 of LAEG, Warren claims he was going to mail the letter from one of the towns off base so:

"...no one would know" and i would be free to say more about what happened" Page 58 LAEG

But once again if what he is saying is to be believed, then why would he have posted out the letter in an outdated USAF headed envelope that happens to have the address overlapping the postmark? And why didn't he use a normal looking envelope instead of a USAF headed one if his true objective was to avoid suspicion?

Further issues arise regarding Warrens alleged letter evidence as the envelope has some mathematical graffiti on the back. Warren claims that his mother would do bookkeeping and was her doing bills on the back of the envelope. One three separate occasions I have heard and listed him stating that is his mother's handwriting. Oddly enough, the stylisation of the digits also match Charlie Lennon's handwriting, adding further evidence to his fabrication the Beatles letters of provenance. The envelope itself is also highly suspicious as the stamps are American; despite it being posted from England and the costing of the stamps are insufficient to mail an overseas letter in 1981. Also the ink on the address appears to overlap the postmark making it impossibility unless the item is fraudulent. If you were to request the letter and envelope for forensic testing (even calling his bluff) it is likely he will be unwilling to submit this 'evidence'. Mr Warren debunked his own letter evidence. And in releasing this alleged letter evidence, comparisons could be matched not only with the letters of provenance for the Beatles items he sold, but also with Warren's documents in Left at East Gate.

This ill conceived stunt by Warren was done with the intention of promoting his legitimacy as a genuine eyewitness to the RFI events but in reality, the release of this letter 'evidence' would lead to the separation of his co-author and ultimately to his downfall and utter humiliation after 34 years of claiming to be a genuine eyewitness and whistleblower to the Rendlesham Forest Incident..

The Letter Evidence

*"I wrote a letter to my mother a few days later describing AMAZINGLY what happened to you guys...
errr which you would be shocked at because that whole letter has not been released and I wish
something would get done with it –and soon! !*

<https://www.youtube.com/watch?v=HsR1RiW4coM>

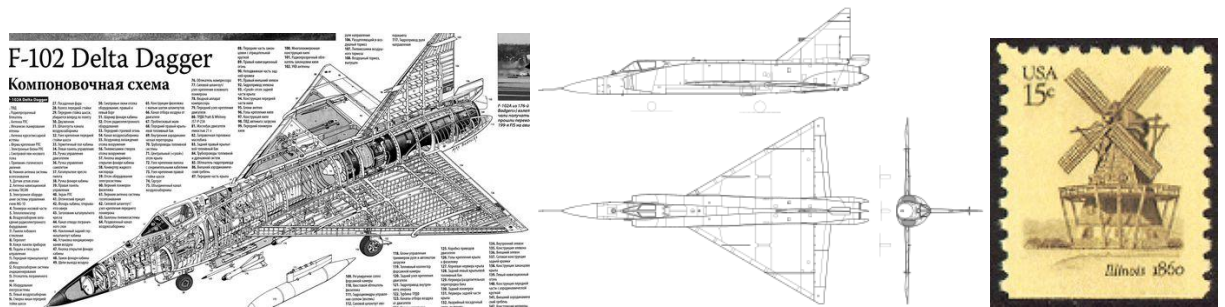

(44 minutes 10 seconds)

- The F102- Delta Dagger was out of service by 1981 and this envelope would have been outdated.
- The envelope is part of a USAF stationary set that is accompanied by matching writing paper.
- Secondly, If Warren was trying to get this letter sent out all sneaky like he claims, then the last thing he would have done would have been to use a USAF envelope.
- Thirdly, if Warren used an English civilian Post Office like he claims, then why is the envelope bearing two Illinois stamps ?
- Two Illinois stamps to the value of 30cents would have been insufficient to send an overseas letter from the UK to the USA in 1981.
- And if its not Warrens handwriting on the back of the envelope then why does the handwriting match the samples on the Lennon letters that accompanied the two items Warren sold though Cameo Auction house? And why does the handwriting on the back of the envelope also match the handwriting traits of the digits on Warrens Opti/Ret document ?
- Another good point to raise is that the cartoons as Warren calls them , has the speech bubble with the words :

“Gee who can I bullshit today!”

- The important thing is that the speech bubble contains an exclamation mark rather than a question mark, showing that Warren is not asking a question but actually making a statement. (small things like this don't tend to get by me when it comes to examining the psychology of Larry Warren.)

It should also be noted that USAF writing sets such as this are available to purchase on online auction websites like EBay where I found this example shown below.

- USAF stationary sets are collectable items and can be found online with some searching.
- Stamps are also collectable items and stampers can also be custom ordered also.
- What should be impossible however, is finding a postmarked envelope which has the address overlapping the postmark, as found on Warrens envelope. It is impossible for a letter to be postmarked before the address has been written down. Such is the case with Warrens envelope.

Above and below: Curiously, the ink appears to overlap the postmark, indicating that the envelope was postmarked before the address was even written on it. This would be impossibility if indeed the item was genuine.

Above: Ink clearly overlapping the postmark. Source::EMN

The letter ‘evidence’ and the envelope provide further doubt over Warrens claims.

On separate occasions Warren has claimed to the public that the sum on the back of the envelope is his mother doing her bills. While looking back to review this information, one of these three links is now no longer available. I have included both of the other quotes from Warren on the other two videos along with the active links and time stamps.

VIDEO REMOVED <https://www.youtube.com/watch?v=UhuhiA2yZCY> 5minutes 24 seconds --- video removed

“And errr, heres some of my mother she was a bookkepper , theres some of her eerr probably doing her bills on the back of the envelope. That’s her handwriting and that’s that.”

1 minute 46 seconds <https://www.youtube.com/watch?v=kgoi15ZuCOs>

“My mother was a book keeper in business and when she got this -she used the back of this to do her household cause my mothers very distinct excellent writing so shes even done accounting on the back – that’s the actual thing and its APO /Air Post Office. “

13 minutes 56 seconds https://www.youtube.com/watch?v=cl_hgO29vkY

The handwriting traits on the back of the envelope match not only the Lakenheath document but also with the alleged handwriting of Charlie Lennon on the two letters of provenance that accompanied the items Warren sold in 2011. This is not theory or conjecture. It is a fact.

The big problem with Warren's repeated explanation about the handwriting on the back of the envelope being attributed to his mother's and not his own is that the '60' in 360 is identical to the examples on the two Beatles letters that Warren claimed were written by Charlie Lennon. The other big problem Warren faces is just exactly how his mother- who was an experienced bookkeeper, managed to incorrectly total a simple additional maths problem. The total should read 1310.

How exactly is it possible that the handwriting on this envelope matches the medical document and the two letters Warren claims were penned by Charlie Lennon? And how is it possible that an experienced bookkeeper of many years could incorrectly total a simple additional maths problem to such a degree of inaccuracy?

Lastly it should also be pointed out that any mother would treasure an overseas letter from her son serving his country thousands of miles from home but yet this particular envelope which has the ink from the address overlapping the postmark is also littered in graffiti which Warren claims is his mother's handwriting but is a match to Larry Warrens own handwriting traits. –As well as being identical to the digits written on the two letters of provenance, allegedly signed by Charlie Lennon as sold by Warren through Cameo Auction house in 2011. And furthermore, also match the Lakenheath eye document.

- Can all of this be down to mere coincidence or is there a common factor between these four documents, asides all being linked to Warren?

Warrens envelope samples compared with the Lennon letter sample

Left: Warrens envelope sample compared with the other Lennon letter sample (65)

Right: The envelope sample overlapped with the Lennon sample 50/50% blend overlap
This identical **6** is in addition to the matching the zeros on the back of the envelope that Larry claims was the one he posted to his mother and maintains that it's her handwriting on not just one but on multiple occasions.

Never Before Revealed In Full: 1st Ever Written Evidence on RAF Bentwaters

1minute 46 seconds <https://www.youtube.com/watch?v=kgoi15ZuCOs>

Larry Warren (RFI UFO) - The Letter - The Picture - The Paintings

13minutes .56 seconds https://www.youtube.com/watch?v=cL_hgO29vkY

LAEG

Cross Examined

The following excerpts from LAEG have been highlighted to show the multiple inconsistencies made by Warren, regarding his alleged encounter and compared with other statements he has gone on to make regarding his alleged involvement in the RFI. It is by no means a page for page breakdown of LAEG in its entirety but merely serves to point out some of the multiple claims made by Warren which do not stand up to vigorous fact checking. Pure hard science is also applied to dispel some of the claims made by Warren and in other instances, common sense is applied. Warren's own documentation, presented in LAEG is also shown here alongside his own handwriting to show that not only does his account fall apart under scrutiny but to provide even further evidence that his alleged evidence is fraudulent also.

LAEG Page 29

Warren claims that he:

"...was warned about the Druids, who held ceremonies very close to the Bentwaters flight line; we were told they were harmless and not to bother them."

- Are we really to believe that the repeated illegal gathering of a bunch of druids-presumably dressed in traditional druid attire holding regular ceremonies right outside the base was not nor ever considered a security threat during the height of the cold war?
- Was the possibility of them being Russian paratroopers in disguise ready to infiltrate the base at any moment never considered in any potential risk assessment?

LAEG Page 30

Warren claims that a girl that had been writing to him came out to see him all the way from Texas. This rather long trip halfway across the world to meet Larry must have been very ill planned as upon allegedly arriving in the UK this alleged girl allegedly then informed Warren that :

"The girl I was with chose that time to tell me that she was out of money and hadn't brought her pay cheque."

- Who travels halfway across the world without funding for their overseas trip?
- Despite having allegedly written to Warren multiple times and travelling half way around the world to meet him, it would appear that Warren is incapable of remembering her name as she is only referred to as 'girl' and 'lady friend'.

Also on page 30, Warren claims that he just happened to sit up bolt upright and rudely awaken from his sleep after hearing a loud bang.

"I bolted up wide awake, thinking I'd heard a loud noise; but my roommate was asleep and all was quiet. I wrote it off as a bad dream and went back to sleep."

- Warren is trying to convey that he had a psychic connection with John Lennon and somehow like Ben Kenobi in Star Wars felt the tremor in the force, when Lennon was shot. Coincidentally the next day, allegedly some guys return to base and coincidentally they happen to have allegedly just returned from Liverpool and allegedly have brought Beatles books back. Allegedly a conversation then ensues with these alleged guys and allegedly, according to Warren, ‘Jay’, who made the alleged trip, says to Warren:

“Wouldn’t it be weird if one of the Beatles died?”

And allegedly Larry and Jay then think and wonder if there would be a big funeral and in addition the also thought about the possibility of John and Paul playing together again. When right on queue....

Enter their alleged training instructor, who allegedly walks in at this critical point and allegedly overhears the conversation. Allegedly this alleged training instructor has just happened to overhear the conversation after just allegedly hearing on the radio that one of the Beatles had been shot in NY. Although it’s been announced on the radio, the according to Warren, the radio news report preferred not to say just exactly which Beatle it was and only gave a hint for Larry and the rest of the world to figure out.

LAEG PAGE 32/33

Warren informs the readers that he obtained his Personal Reliability Pledge (PRB) on December 11th 1980. This allegedly legitimate document states that Warren was a security specialist and was allegedly signed by Thomas A Mosley.

LAEG Page 33

Warren allegedly completes the last area of security police training necessary to qualify for immediate posting to Bentwaters D-FLIGHT. His training instructors have been senior NCOs Huntzinger and Slack.

Curiously both men write at the same angle as Thomas Mosley and Larry Warren. In addition, officer Huntzinger also happens to loop his ‘g’ exactly the same length width and breadth as Larry Warren. By sheer coincidence, Lee Swain also writes at the same angle. Lee Swain funny enough, writes his ‘L’ and ‘S’ exactly like Larry Warren. (See military documentation for further info)

- That same M appears on Thomas Mosley and Warren’s handwriting. Same angled handwriting as Warren also.

Huntzinger, Slack and Mosley all write at the same inclined angle.

Huntzinger's and Warren's letter 'G' overlapped is a 100% match

Huntzinger's and Warren's letter 'G' overlapped is a 100% **match x2**.

PAGE 39

"...Early on 28th December, I got away from the base for a day with my roommate Alabama. We took a base taxi to Ipswich and did some sight seeing...I wanted to find a music store: I was in the market for a Marshall amplifier and thought I'd get a good deal as they are manufactured in England. We happened into Axe music on Christchurch Road. After unsuccessfully bargaining with the owner of the store for a few hours I left..."

So if this alleged trip to Axe music store really did occur, then this version as told by Larry in an interview with John Burroughs in 2015 must be untrue.....

"Jimmy Harper had a car."

12 minutes 45 seconds <https://www.youtube.com/watch?v=HsR1RiW4coM>

"We-I was looking for musical equipment and that's why it must have been a sigh-a sigh a -The place we went to was shut down -in Ipswich - the music store-"

13 Minutes 51 seconds <https://www.youtube.com/watch?v=HsR1RiW4coM>

Larry presents two completely different versions of the events of the day preceding his alleged involvement later that night. Once again one or the other of these statements cannot have possibly taken place, so one of these statements is an untruth? Which statement do we accept as being the legitimate one? Which one is fabricated? Who are we led to believe here?

Larry Warren's official narrative in LAEG or Larry Warren's statement in the interview with John Burroughs?

Was the store closed? Was the store open? Did Larry really haggle for a Marshall Amplifier for a total of 180 minutes? Or is that untrue because the store was closed?

Oxymoron after oxymoron.

According to what he earlier told to author Georgina Bruni, It turns out the store visit took place three days prior to this on Christmas day and the store was open because it was run by Arabs but then it was shut because it was the law but despite it being now shut and despite it being Christmas day - a delivery was allegedly in process. And it was not Jimmy Harper that Larry went to Ipswich after all but some NSA agent called Mark. Allegedly Mark took photos of a UFO in Rendlesham forest but then it wasn't Mark it was Larry. And Larry smuggled out the photographs in a mug that he purchased on the trip to Germany that he alleges that he never went on and also claims he allegedly also went on.

Source- You Can't Tell the People by Georgina Bruni, with special thanks to Sacha Christie.

- If Larry Warren did not complete his training and was not assigned to D-flight then there was simply no way that he would have been on Guard Post at the time which he alleges he was.

So if this back story to the events leading up to this point never happened in the real physical world, then Larry could not have been on guard post when the next set of alleged events took place. Therefore, if he was not there, then this next event must have also never taken place.

He then claims that he was collected just five minutes later by none other than Adrian Bustinza. Allegedly Larry was told to get on his Motorola radio and inform CSC that his post was being deactivated and even though the base was allegedly on alert status, there was now no need for this strategic 80ft guard tower to be manned with a set of eyes and ears. Somehow the need for Larry to be filling up light-alls now took priority over manning an 80ft observation post for the Weapons Storage Area on a base which allegedly housed nuclear weapons and while the base was allegedly on ALERT status and Russian paratroopers were rumoured to be dropping by at any given moment.

The six million dollar Deer

LAEG Page 41

Warren claims

“Suddenly, out of the pitch black to my right came the sound of hooves beating on the ground shot past my ears. Five panic-stricken deer were running to the fence line from a nearby field. Three deer turned left when they reached the fence and continued in a panic. The other two jumped the fence with ease, bounded across the runway past me, and disappeared into the night. It was a beautiful and unnerving sight.”

- This is scientifically possible. The minimum requirement for a USAF Airfield perimeter fence is 14ft and the maximum a deer can jump is 8ft.

Section 040108MB Military **Bases specification**

maxstop.ceshepherd.com/specs/Section_040108MB_Military_Base_spec.pdf

Deer Facts: <http://www.invisible-deer-fence.com/deer-facts/deer-behavior.htm>

LAEG Page 44 /45

Larry explains that he is now entering the area where all the activity is going on. Allegedly as Warren approaches the alleged unknown phenomena in the woods, Adrian Bustinza, allegedly leans over and informs Warren that this is exactly what allegedly happened to him in Alaska. Then Warren alleges he seen another airman crouched down and leaning against a tree with his hands over his face. This alleged airman, according to Larry, was allegedly crying and Larry alleges that he thought what the hell is going on.

- Evidence shows that this could never have occurred as Warren had not completed his training and was not cleared for duty. Therefore, it can also be concluded that this entire event is fictionalized and completely untrue.

LAEG Page 45

"I noticed a small red light. The light came closer each second. At first I thought it was an aircraft but it came in too fast and silently."

- Yet Warren goes on to claim to Gary Heseltine that this silently approaching object he describes on page 45 was now audible. He claims:

"And at that point we could hear- I thought I could hear helicopters that would have been from the Air Rescue"

1 minute 36 seconds <https://www.youtube.com/watch?v=31D2JhwqyLY>

LAEG Page 47

Warren states;

'...and I noticed something strange within its glow. I thought: 'Why are there kids here?' '

But in an interview with Gary Heseltine Warren claims:

"And Bustinza says to me- "there's kids" there's kids here, why is something that's heard often within this subject I've heard said"

Source: EMN (UFO Lands At Rendlesham Forest Bentwaters Base: Military Whistleblower Larry Warren)

6 minutes 40 seconds <https://www.youtube.com/watch?v=31D2JhwqyLY>

LAEG PAGE 48

Warren claims that he caught a bus back to the base which is once again at odds with what he later informed John Burroughs. Warren states on page 48 of LAEG that while on the bus he wondered if there were other sightings happening in other parts of the world.

"During the ride back to Bentwaters, i wondered if if similar events were happening simultaneously all over the world. I fully expected this to be all over the news the next day."

But despite Warren having this alleged deep train of thought on page 48 of LAEG, he seems to have forgotten this bus ride out of the area when interviewed by John Burroughs in 2015 He claimed,

"Someone asked me how did you deal with that in the book? And I said, jezz,,,,,,,,,,,,, I...I dunno, maybe I couldn't account and just skipped over it , like you just assumed someone said you took a bus backI said there would have been no bus to take – I just don't remember it.....there is a gap there."

So which of Warren's accounts are we to believe? The account in LAEG or the one he told John Burroughs?

Science debunks Warrens claims on pages 48/49

<https://www.esrl.noaa.gov/gmd/grad/solcalc/sunrise.html>

<http://www.sunrisesunset.com/calendar.asp>

<http://www.timeanddate.com/calendar/?year=1980&country=9>

LAEG Page 50

Another interesting point to make is that Warren claims on pages 49/50 in LAEG that he left the mess hall and returned to his dorm room and once there, then received a handwritten message that Art Henderson waved in his face. This alleged handwritten note was as Warren claims,

” ...Art said he’d taken the call in the dayroom and it sounded important. The note said I was to be at the law enforcement desk at 11am sharp, in uniform, to see Major Zickler. “

Also:

“I was late. As I joined the ranks, Major Zickler asked if I made a habit of being late for appointments. I said “no sir” and the chief let it go at that,”

But in the interview with John Burroughs in 2015 Warren informs the listeners that he was ordered to be in Zickler’s office at 2pm. So if the appointment was at 2pm as Warren claims in this interview, Then in LAEG you would think that Larry would have put that upon arriving at the Law Enforcement Office Major Zickler said to Larry,

“Your three hours early. Do you always make a point of being early for appointments? I said “yes sir” and the chief let it go at that,”

- But he told John Burroughs that it was 2pm that he had to meet the Major. And in the same interview with Burroughs, Warren claims he left the mess hall and then telephoned his mother prior to the meeting.

Yet in LAEG, Warren claims he never made that phone call until after he had the meeting with the Major at 11am sharp.

Which is at direct odds with what he told Burroughs. So what version is correct?

41 minutes 08 seconds <https://www.youtube.com/watch?v=HsR1RiW4coM>

What’s also highly unlikely is the alleged Geiger counter scenario which Warren then also claims happened in the office that morning...or afternoon- depending of course which version of Warrens you choose to believe. Apparently, and allegedly a tech officer from Disaster Preparedness then walked around the gathered airmen with a Geiger counter to check the men out for radiation exposure. Anyway, allegedly the disaster preparedness guy did his thing and then suddenly and allegedly his Geiger counter reacted.

Warren states:

“...I don’t know if we made the device react, but this one (nameless guy) did seem to cause some interest. He took what looked like a small rock out of his jacket pocket and showed it to the tech sergeant. The sergeant placed it in a small plastic bag and dropped it into a metal box outside the building.”

- It is extremely unlikely that the Air Force would decide to wait ten to twelve hours before checking the men over for radiation exposure.
- Within that time period any airmen exposed to high doses of radiation would have had ten to twelve hours extra exposure time and the consequences of this delayed time could have resulted in fatalities and a plethora of lawsuits for the Air Force.
- In that time, any airman heavily irradiated by the alleged event that Warren claims took place would have had ten to twelve hours additional exposure time before any essential life saving anti radiation treatment could be administered if necessary.

After the alleged debriefing Warren alleges that he was then joined by Steve Longero who allegedly abruptly informed him that Penniston was among the airmen who were sent out on a secret mission to create a false landing site. Larry informs the readers that apparently the Air Force expected the media in some form or another. So Larry is implying that Longero has informed him that because the Air Force expected the media, it was of the utmost importance and in the interests of National security for the USAF to get some airmen out into the woods to dig a few holes.

Warren claims that this reverse charge phone call was put through a UK based operator who put him onto an international operator who then put the call through to an operator in New York.

A former British Telecom Disclosure Manager informed me that this would have been impossible as there was no way in which BT could have reciprocated the cost of the call. – It is an impossibility for the sequence of events to have occurred the way Warren alleges.

LAEG Page 58/59

Warren claims that he gets a phone call. He states,

“ Hello Airman Warren?” Yes this is Warren, I didn’t know the male voice on the other end. The call sounded as if it were a long distance connection, as if the caller’s voice were in a vacuum. “Airman Warren could you meet a car in the dorm parking lot in twenty minutes?” I asked, Who are you?”The voice responded that it wasn’t important, “Please meet the car in twenty minutes” I asked how would I recognise the car? The voice said, “It will be a dark blue Sedan, upscale, you’ll know it when you see it” I asked if this request concerned the UFO incident. “Yes” the voice responded. “Am I in trouble? Will I be late for my shift? I have to work tonight” “The answer to both questions was “no”. He continued “You do not have to be in uniform, And Warren, remember twenty minutes OK? Another airman will be with you. You won’t miss the car will you?” “No Sir” the man hung up. While staring at some pro IRA graffiti on the wall in front of me, I hesitantly did the same.”

Warren then goes on to talk about meeting the car and informs the readers that,

“...The front doors opened. Two men got out of the car; they were dressed in civilian clothes. I can't remember the details of their faces. They opened the doors to the backseat...”

- What Warren claims here, is once again at odds with what he later informed John Burroughs about the alleged abduction.

He tells Burroughs that the two Men in Black ambushed them from behind stacks of construction materials.

- What is also interesting about this passage is that although Warren clearly remembers details like the voice being in a vacuum and sounding long distance, the pro IRA graffiti and the voice on the phone telling him to be outside in twenty minutes, Warren completely seems to forget under hypnosis that the voice stressed twenty minutes. Because on page 378 of LAEG Warren , allegedly under hypnosis then says he was to meet the car straight away. Not in twenty minutes like he claims on page 59.

- The other important aspect of this alleged phone call is that Warren later went on to inform John Burroughs that he NEVER got the phone call he informed the readers of LAEG occurred on page 59.

Here on radio Warren clearly states that no phone call was ever received, which means that all these details on page 59 regarding the voice in the vacuum and the IRA graffiti could never have occurred as he never got a phone call whatsoever and it was actually a note which popped up from under the door.

1 hour 8 minutes <https://www.youtube.com/watch?v=HsR1RiW4coM>

LAEG Page 71

“...My eyesight had been impaired since that explosion of light before the UFO appeared. Sunlight burned my eyes, and what appeared to be seahorses floated in my line of sight. I had gone to the clinic at Bentwaters for an exam: a doctor told me I might have burns to my retinas. He sent me to RAF Lakenheath for a more in depth eye exam in early February. It was later confirmed that I had been exposed to a light source of high intensity light that caused a degree of damage to my vision. The ranking doctor explained it was as if I had looked directly at a welder's torch for twenty minutes without blinking. “

Warren presents a document in the Appendix of LAEG to back up this passage and repeated claims of getting damage to his retinas as a result of his alleged encounter.

Close encounters of the Warren kind

LAEG Page 91

Here Larry informs the reader that the following morning after five aliens allegedly show up in his bedroom, his seven year out brother allegedly informs him that,

“The next night at dinner, my seven year old brother, Bill announced that he hadn’t slept very well the night before because an aeroplane had come to the window and “sang to him”. Dad Sandy and Scott contributed it to a dream.”

- Well if I was seven years old I would know the difference between a UFO and an aeroplane for starters. Second of all I would have awakened the entire house if that had occurred and thirdly, what Warren has just informed the reader is a direct cut and paste from one of the opening scenes from Close Encounters of the Third Kind.

“He says the sun came out last night.....he says it sang to him.”

- Given that this is a direct quote from the 1977 blockbuster, Warren has attempted to lift this line from the movie which completely forgetting to remember that the movie is on general release.

pt.php?movie=close-encounters-of-the-third-kind

Close Encounters of the Thi... x Criteo Banners Information Page

Close Encounters of the Third Kind (1977) Movie Script

Number 445529, check.
Approximately 46 gallons
in the right tank!
Tell me something.
What's happening here?
-It's flight number 1 9!
-1 9 what?
It's that training mission from the
naval air station at Fort Lauderdale.
They were doing target runs
on an old hulk.
Who flies crates like these anymore?
No one! These planes were reported
missing in 1 945.
But it looks brand-new!
Where's the pilot?
I don't understand!
Where's the crew?!
How the hell did it get here?!
He says this guy's local.
He was here last night.
He saw it happen.
Sunburn?
He says the sun came out last night.
He says it sang to him.
Ernie, keep an eye on that point-out.
He's on 1 22.5.
I'll be right back.

https://www.springfieldspringfield.co.uk/movie_script.php?movie=close-encounters-of-the-third-kind

Now it could simply be a coincidence of course- a matter of life imitating art so to speak. So let's give Warren the benefit of the doubt on this occasion and move on to what Warren says on page 96.

LAEG Page 96

“...I told him after the UFO appeared in the field, I’d blacked out and remembered nothing until I woke up in my room.”

This is in direct odds with what Warren states occurred back on page 48 He states,

“During the walk back to the trucks we were quiet.Ours was first to leave the area. Later I heard some amazing things had gone on in the parking area as well”

If this is the case, then what exactly is Warren going on about on page 48?

Warren claims that he caught a bus back to the base which is once again at odds with what he later informed John Burroughs about there being no bus to take.

36 minutes 10 seconds <https://www.youtube.com/watch?v=HsR1RiW4coM>

LAEG Page 127

Warren claims he visited the hospital as his back was leaking. Warren further claims the doctor asked *“Were you in Vietnam?”*

- This didn’t happen as just a glance at Warrens Date of Birth on his medical records would show that he would have been just twelve years old when the conflict finished.
- The Paris Peace Accords were signed in January 1973.

LAEG Page 128

Warren claims that he got a call at work by an NSA agent called Jim Greenfield. Allegedly Greenfield wanted to meet with Warren and so they allegedly meet up. Allegedly the NSA agent wanted to show Warren some photographs – simply to see the reaction in his face. And then left. Allegedly Warren was on his third beer when the NSA agent allegedly arrived.

- This event most likely never occurred never as the documents within LAEG show that Warren was not a participant in the RFI events as he had NOT passed basis training and was NOT cleared for duty at the time.

LAEG Page 279

Warren claims that he became suicidal as a result of his experiences. After allegedly drinking a bottle of Jack Daniels and taking an overdose of medication, considering that he explains to the reader that the hospital were then able to explain to him that the pills he took were *‘out of date’* This takes the miracles of modern medical science to a whole new level.

- Warren did not attempt to kill himself as a result of his alleged encounters –As the evidence shows he fabricated his documentation in order to write himself into the events which did occur at RAF Bentwaters. This passage is untrue and did not occur.

LAEG Page 302

These were the records that Warren claims he took when he left the air force. According to Warren,

“They confirmed my presence on D-flight at the time in question. There were also some medical records that confirmed the damage id suffered to my eyes in the flash before the UFO had appeared in Rendlesham Forest”

The same records Warren presents in Left at East Gate and informed Doctor Stephen Greer that was advised to steal. Warren also found the letter that he allegedly sent to his mother. The same letter which was contained inside an envelope which has the exact same 'E' as Doctor Echol.

Warren finding the letter.

“This was great” I thought. In the past some critics of Bentwaters claimed I hadn't even been there. This would shut them up for good”

LAEG Page 325

Charles Halt informs Peter Robbins the reality of the claims being made by Warren:

“What I'm trying to tell you is he's a fraud , Yeah you've got a problem, I'm telling you that right up front.” **Charles Halt**

LAEG Page 346

LW: *“Halt said, “How did you get your records? ... I said I will tell you when i see you. I stole them. I thought there would be a time. I have medical records that are definitely from eye damage...”*

LAEG Page 352

Larry speaking to Colonel Halt.

LW: *“....my military recordshow I got them? ...I didn't tell you on the phone-but i took em. I had to hand carry them from one place to another and after all this happened, i said “I'm gonni take em because they are not going to be there eventually, and i was right. I don't have them all but I have enough of them. I have records.”*

LAEG Page 359

Larry Warren talks to Charles Halt

“I had eye problems anyway within days. I went to the Bentwaters clinic, my eyes hurt.”

- All of these claims made by Warren regarding the documentation he provides as being authentic are completely false.
- The documentation that Warren provides within the pages of Left at East Gate has been shown to be fabricated and the only reason he would need to do so is if he was not being truthful about his involvement.

Warren discusses the records that he presents in Left at East Gate with Dr Stephen Greer.

In an interview with him, Warren goes on to say,

“I and others suffered –and I have documents of this cause I stole them cause from Bentwaters an officer advised me to. He said Larry, your military record is gonni vaporise as soon as your gone....AAA-my eyes were damaged –flash burns to the retinas and all that –THIS is established –as if i had stared at an arc welders torch for about nineteen minutes- which is unadvisable.”
15 minutes 57 seconds https://www.youtube.com/watch?v=tYU_tr5K5ws

And here 29.05 on Phenomenon Radio

When Warren spoke with John Burroughs on radio show uploaded on 10th August 2015 Warren goes on to discuss the alleged letter that he allegedly sent home.

At 1 hr 11 minutes Warren discusses the letter and says:

“I hope they release it –And soon!”

- Important Point: It was Warren’s letter so he could have published it any given point in time.

Page 378

Warren allegedly under hypnosis by Bud Hopkins asks Warren to recall what he heard on the alleged phone call he got to meet the Men in Black allegedly abducted him and allegedly took him to an underground base to meet another alien. Bud Hopkins asks Warren ,

B.H. “... speak whenever you like. I want you to tell me what you hear when your called on the phone.”

L.W. “Airman Warren leave your dormitory right now and meet the black car in the parking lot. You’ll recognise it”

Bud asks Warren, “What are your feelings about this call as you’re getting ready?”

Warren replies, “I’m in trouble”

As pointed out earlier, this is at direct odds with what Warren claimed on page 58 of LAEG about meeting the car in 20 minutes. Warren has never mentioned standing around for twenty minutes before the car showed up nor mentioned that he was twenty minutes late in turning up to meet the car. And both of these accounts in LAEG are also at direct odds with what he told John Burroughs in 2015 that

“No-one told me- got a note”

1 hour 8 minutes <https://www.youtube.com/watch?v=HsR1RiW4coM>

- So on page 58 according to Warren he got a call to be outside in 20 minutes time.
- According to Warren on page 358 he got a call to be outside right away.
- According to Warren in an interview with John Burroughs in 2015 there was no phone call whatsoever and it was a note which he got telling him to meet the car.

So three conflicting accounts from Warren regarding the same event.

Warrens claims of having documentation to back up his alleged involvement in the RFI.

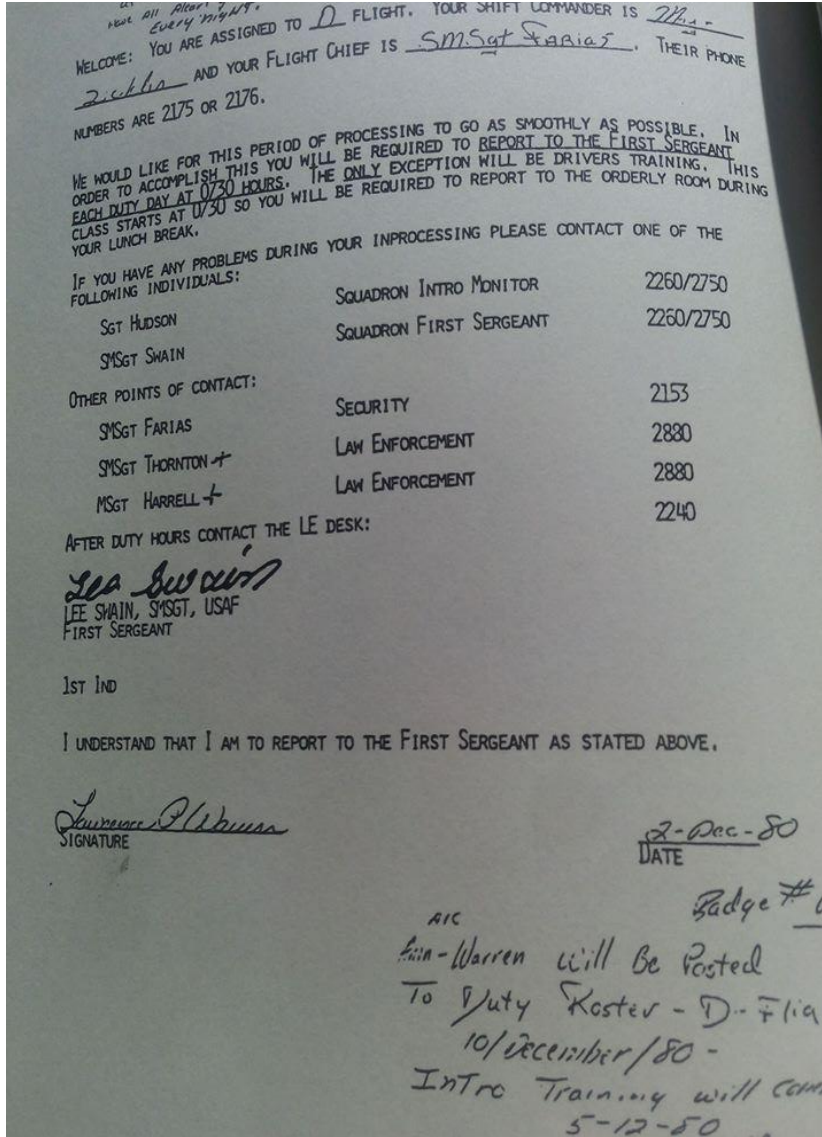

“I and others suffered –and I have documents of this cause I stole them cause from Bentwaters an officer advised me to. He said Larry, your military record is gonni vaporise as soon as your gone....AAA-my eyes were damaged –flash burns to the retinas and all that –THIS is established.....”

15 minutes 57 seconds https://www.youtube.com/watch?v=tYU_tr5K5ws

The Documentation presented in LAEG

Warrens service records

In Processing Sheet/Assignment to D-flight

All of the handwriting on this document belongs to Warren.

Above Left : Document sample and Right Warrens sample. Both incomplete loop

APPENDIX 4

... at 4:35-PM
 Have All Aleart gear! Every night.
 WELCOME: YOU ARE ASSIGNED TO
Dickles AND YOUR FLIGHT
 NUMBERS ARE 2175 OR 2176.

WE WOULD LIKE FOR THIS PERIOD
 ORDER TO ACCOMPLISH THIS YOU W
 EACH DUTY DAY AT 0730 HOURS

... 10/10/10
 4:35-PM
 All Aleart gear! Every night.
 YOU ARE ASSIGNED

This is Warrens handwriting. The classic 'a' is an indicator as well as 'ALEART GEAR'

Sample 1 from the letter on page 356 **Sample 2** from the Lennon letter, **Sample 3** from the envelope

Shown below are some examples of the letter 'a' found on the Beatles items Warren sold.

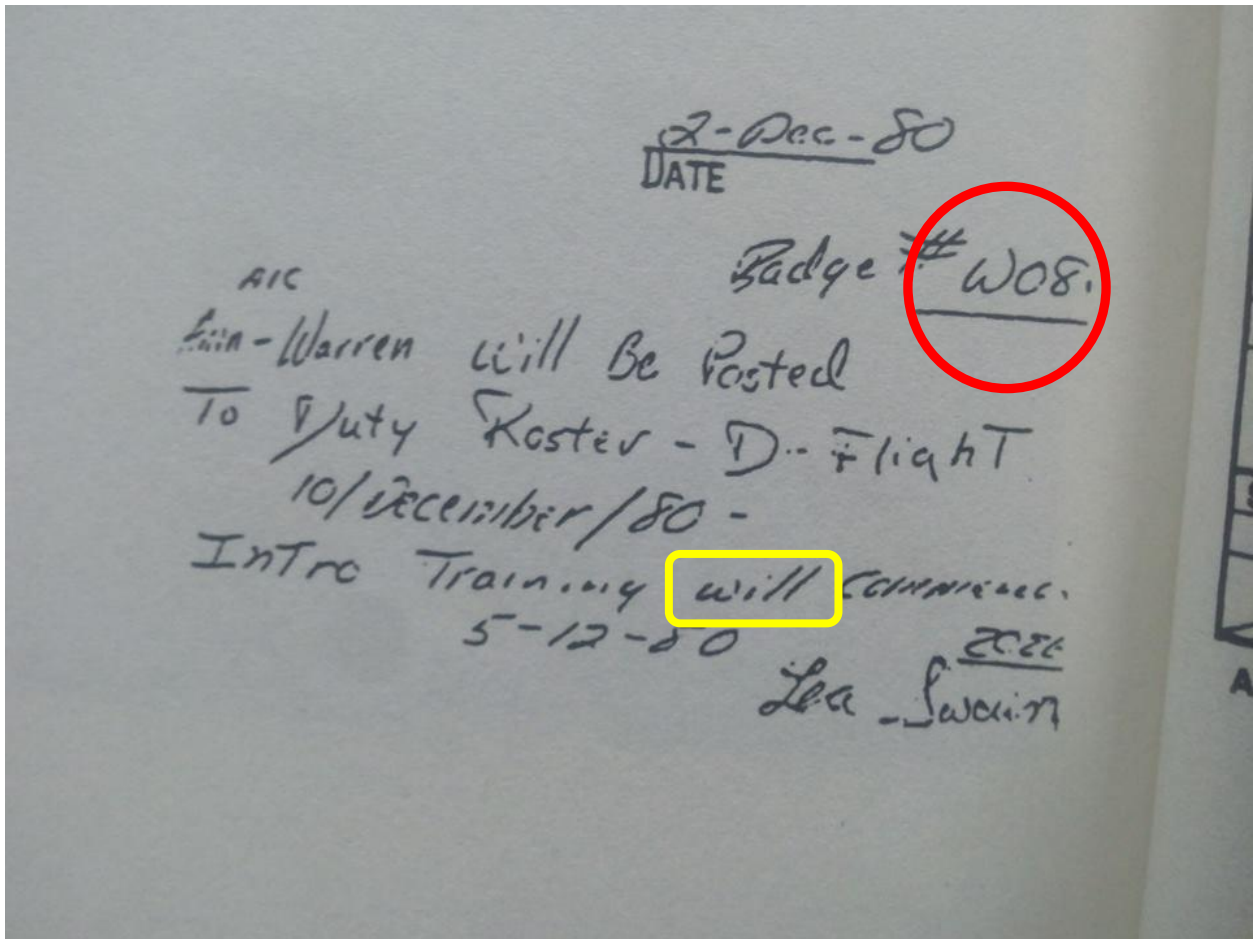

Below is the sample from the document for comparison.

OF WOULD BY 200 F
C
DER IS W. J. M.
25, THEIR PHONE
AS POSSIBLE. IN
E FIRST SERGEANT

Above: The sample from the document alongside three of Warrens samples.

Below are Warrens handwriting (overlapped). When this was published, Warren then went on to claim that this was his handwriting after all- although he stresses that Lee Swains signature at the bottom was written by Lee Swain on the **Warren Perspective 3** At 5 minutes <https://www.youtube.com/watch?v=7nkn-J00JGs>

He claims that both of Lee Swains signatures are legit.
07 minutes 38 seconds. <https://www.youtube.com/watch?v=7nkn-J00JGs>

Below: Warrens and allegedly Charlie Lennons 'L' samples for comparison against Lee Swains 'L'.

The sketch below was allegedly sold to Russ Kellett for a reported 10K by a mystery seller. Warren had also happened to have a copy of this sketch in his laptop files- connecting the sketch to him as far back as 2011. May Pang had even had to denounce it as a fabrication in the press. This was not the first time she had dealings with Mr Warren. The reason why I have included it here is because the W in 'white lights' was taken and compared with the 'W' on the in processing sheet.

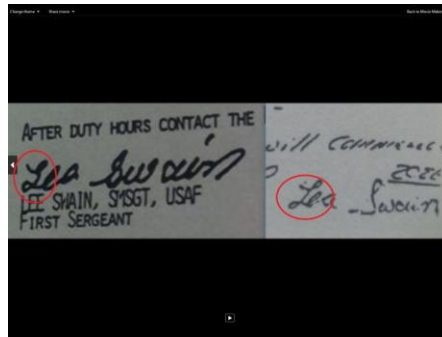

The 'W' The sketch above which Warren had a digital copy of as far back as 2011 was taken and overlapped with the D on the document. The result is shown below. It is a match in height stroke and

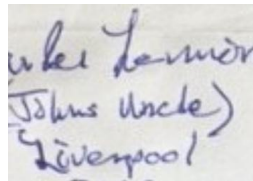

width. So the 'W' is a perfect match with the sketch that Warren had on his laptop. What are the coincidences of John Lennon and Larry Warren having identically matching 'W's?

Above left: The in processing sheet **Above right :** The Lennon sketch sample overlapped 50/50 transparency.

Curiously, Lee Swain writes both his 'L' and 'S' exactly like Charlie Lennon and Larry Warren.

Allegedly Lennons

Above: three of Warrens samples of the letter 'L'. Warren writes his L exactly like Charlie Lennon and Lee Swain

Above: Also identical are Warrens and 'Lee Swains 'S'' shown side by side.

Warrens samples with 'Lee Swains' 2nd in row.

Conclusion:

It is absolutley clear that Mr Warrens handwriting traits are to be found on every sample of handwriting on this document. While he maintains both Lee Swains signatures are legitimate, Warrens own handwriting samples show otherwize.

CERTIFICATION OF TRAINING

Above: Warren's envelope and Lakenheath samples

Below: Overlapped, Warrens 'g' is a match in length depth and width as the certificate of training sample.

The signatures of the instructors –First thing I noticed was that same angle of writing style that Warren uses. Here you can clearly see that not just the one but both of them lean off to the right at the exact same angle. The other noticeable elements in both signatures asides this, is that both instructors also have the same looping style letters as the individual that presented them. Larry Warren.

Below: Note how the angle of the T in Huntzinger matches the K in Slack.

I then compared a sample of Larry Warren's looping **G** found in the word **England** on his letter evidence and overlaid it with both of the loops in the Huntzinger signature

Above: As you can see, the G from Warren's handwriting sample sits perfectly in both loops in the signature. The spacing length and fit is identical on both loops. Whats also interesting is that both instructors also write at the same angle as Larry Warren.

Above: Warren and Huntzinger write at the same angle.

There is enough evidence here to come to the logical conclusion that Larry Warren fabricated his certificate of Training. What would be the objective in doing so?

This document would have been required by Larry in order to show that his training was completed and therefore would have been eligible to have been assigned to D-flight just in time for him to see the aliens. So if Larry fabricated his certificate of Training, then that can only leave any logical person to conclude that Larry did not complete his basic training and therefore faked the document in order to make it appear as if he did and this would assist him in writing himself into the Rendlesham Forest narrative.

The eye damage document

Appointment(s) made for you promptly. You and give it to the appointment clerk. To keep this appointment, cancel it at least 24 hours in advance.

2/3 Feb 81
VIP

AF FORM 490 FEB 70 PREVIOUS EDITION WILL BE USED.

Firstly note the first 0 in 1300. The zero runs at the same angle as the sample from Warren's envelope and also from the Charlie Lennon letter.

Above Left: Charlie Lennon letter sample and **above right,** the sample from Warren's envelope.

The Warren Perspective... Part 3

On the Warren Perspective Part 3 Warren claims that this is not his handwriting Warren can be heard stating that the handwriting at the bottom of the document was written by "...some enlisted guy- I can't remember his name..."

11 minutes 43 seconds <https://www.youtube.com/watch?v=7nkn-J0OJGs>

"None of this is my handwriting"

10 minutes 50 seconds <https://www.youtube.com/watch?v=7nkn-J0OJGs>

"...that not my handwriting..."

11 minutes 30 Seconds <https://www.youtube.com/watch?v=7nkn-J0OJGs>

"I wish I had handwriting that good"

11 minutes 35 seconds <https://www.youtube.com/watch?v=7nkn-J0OJGs>

Regarding the handwriting at the bottom of the document Warren claims:

'...it says - a note here- not my handwriting- there was an enlisted guy that wrote that, that worked at the clinic- i don't remember his name -bring all records something's redacted full exam Lakenheath err USAF ear Eye EAR Clinic and then threes all sorts of kugaroo stuff- letters'

11 minutes 43 seconds <https://www.youtube.com/watch?v=7nkn-J0OJGs>

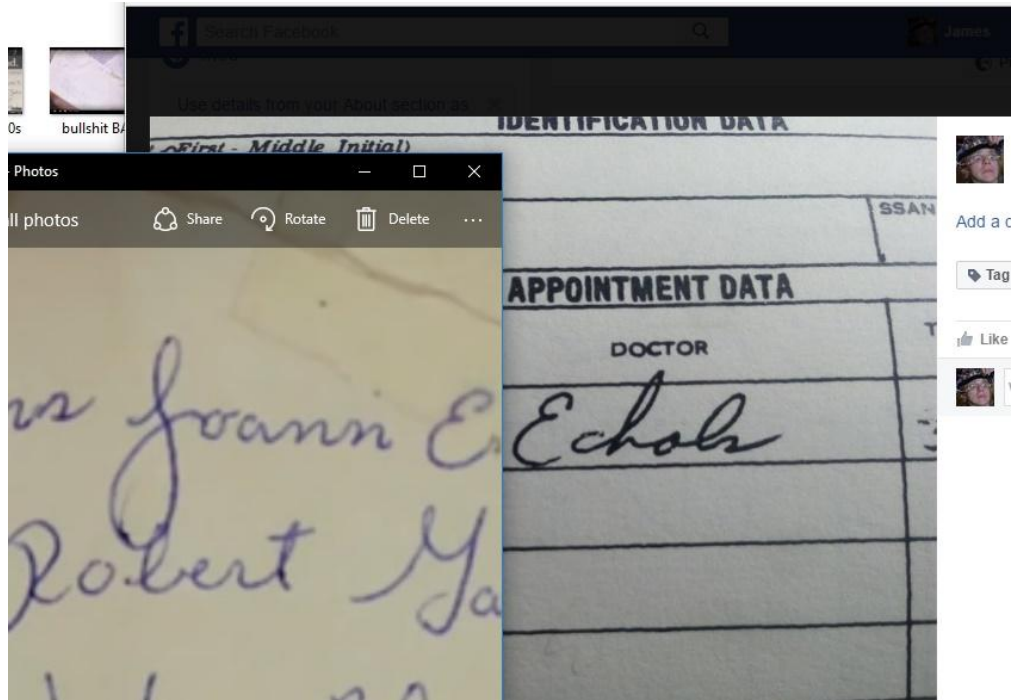

Warren also says he wishes he could write as good as the handwriting of the Doctors signature. Warren claims that all the handwriting at the top of the document is NOT his. This is very interesting as the signature on the top left of the document is a perfect match to the way Warren happened to sign his signature on the front of the envelope. So despite Warren claiming that the handwriting on this document does not belong to him His own handwriting samples go against what he is claiming.

The flow on both of the words 'Warren' and 'Lawrence' are identical in both samples. Take the 'ren' in Warren or the 'nce' in Lawrence for example.

Above: Warrens own handwritten 'E overlapped with the medical document.

Below: Both samples shown side by side.

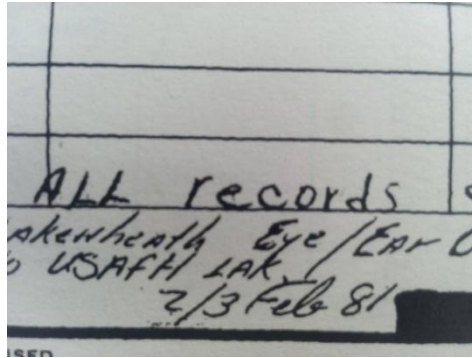

Above: The same angle as the digits run on the eye document and handwriting on the back of the envelope. What are the chances of this being down to sheer coincidence?

Despite Warren claiming that these samples are NOT his own., they also match the angled handwriting style on the Chalie Lennon letters that were sold by Warren through Cameo Auction House in 2011.

Above Left: The envelope sample and **middle and right:** the Lennon samples.

Curiously the handwriting Warren claims is that belonging to some enlisted airman at the bottom of the document is written at the same angle that Warrens uses.

Here are two of Warrens samples which are written at the same forward angle as the handwriting at the bottom of the medical document.

Conclusion:

- Warren fabricated this medical document in order to reenforce his verbal claims of allegedly getting damage done to his eyes as a result of allegedly being present on the third night of events at Rendlesham. By examining the in processing sheet, it is clear that the only reason Warren would need to fabricate the document is if he was not cleared for duty at the time in question and not a participant in the events. By fabricating the date, Warren was able to create the illusion that he was indeed trained and on D Flight. The document is a fabrication created to back up Warrens claims. Warren was obviously not cleared for duty on D flight at the time and therefore could NEVER have been standing in Capel Green when the alleged explosion of light occurred.
- But to further back up his claims of being present when this alleged event occurred, Warren further alleges that damage was done to his eyes as a result of being a close range participant. So he presents this medical document to reinforce the belief that he became injured as a result.
- Despite Warren claiming that none of the handwriting on this document is his own- his other samples prove time and time again that Warren is lying about these documents.
- This medical document was further debunked as being fabricated when it was established that Dr Echols was actually an ortopedic doctor and was not an eye specialist as Warren claims.

- It is my personal conclusion that Warren fabricated this medical document to reinforce the claim that he was present when the alleged events transpired. By producing this document Warren is attempting to back up his verbal claims of being present by claiming to have received damage to his eyes.
- It is clear from the fabricated In Processing sheet that Warren was not cleared for duty at the time of these incidents and that this alleged incident, allegedly causing damage to his eyes simply never took place.
- The excerpts I have highlighted on the numerous pages within LAEG therefore are fictional accounts of fictitious events.
- Mr Warren was not involved in the Rendlesham Forest Incidents whatsoever and fabricated his account based on known facts and other eyewitness testimony.
- It is impossible therefore that Warren could have ever been a genuine eyewitness and Whistleblower to these events if he was not cleared for duty. These documents have been established to be fraudulent and the only motivation that Warren could have had for their creation was to back up his verbal claims of being an alleged participant in the Rendlesham Forest Incident.
- He cannot be a genuine eyewitness or whistleblower if he was not involved.

I hope this information is of assistance to anyone with a desire to know the truth regarding this matter. This is by no means a complete review of the evidence gathered but should serve enough to point out that Warrens account in LAEG is a complete work of fiction.

My extended thanks to Sacha Christie, Alyson Dunlop, David Young and also to Nick Pope, Colonel Charles Halt and John and Dawn Hanson for their continued support during this investigation.
