Exactly what makes Vera-mannan separate from all the other Aloe vera dietary supplements?

The response is simple.

In the fresh Aloe vera plant there are more than 200 different substances.

A few of these compounds have strong laxative effects.

Other compounds may cause allergies.

Properly extracted, the healing compounds of Aloe vera are devoid of these laxative impacts and totally free of the allergic reactions that can accompany fresh Aloe vera gel and other improperly prepared Aloe supplements.

Vera-mannan includes only the extracted beta-mannans and beta-glucans which have been shown to possess the healing advantages credited to Aloe vera with not one of the prospective bad results.

These pure beta substances are in the carb group.

Just protein substances, not carbs, are understood to trigger allergic reactions.

Therefore an allergy to these beta extracts is probably difficult.

And the beta compounds in Vera-mannan have actually been used by countless individuals for well over 20 years with no circumstances of allergic reaction or side effect ever reported.
