

Coming November 2 To Xbox Game Move For Computer: Minecraft Java And Bedrock Editions

And even higher, you'll have entry collectively for the first time ever because the Minecraft: Pc Bundle consists of both the Java and Bedrock Editions!

With cross-play, you can play the flooring is actually lava, not pretend lava like we performed as kids with your pals in Minecraft, it doesn't matter what platform they are on - Home windows 10, Home windows 11, Consoles, your new fancy wifi-enabled refrigerator (I made that final one up, but it can be really cool if that were true). Quickly switch between the completely different editions from the unified Minecraft Launcher, sooner than you would clarify the foundations to the faux lava flooring recreation when you have been a kid.

I'm tremendous excited to deliver this iconic recreation to Recreation Go for Computer - there are millions of players in the worldwide Minecraft group, and we're thrilled to soon count the game Move Laptop group amongst them. gaming Keep your eyes peeled right here on the Xbox Wire, and @XboxGamePassPC on Twitter for updates on exactly when you can begin playing, and @Minecraft on Twitter for the rest of the news coming from Minecraft Reside.
