

Summer Novelties 2018

FABRIC AND LEATHER PAINT

Highly flexible water-based paint suitable for fabric, leather, synthetic leather and PVC. The paint won't crack after it is dried, the fabric or leather will stay soft. Highly opaque, works on light and dark surfaces too. Great for stencil technique. After application, do not clean the decorated object for 1 week, or fix the paint with ironing (inside-out or through a baking paper using cotton grade for 30 sec) then it will be machine washable.

FABRIC MEDIUM

Medium for textile and leather to paint on top easily, to fix velvet powder or glitters or to glue fabric to fabric. It is perfect to dilute and lighten Pentart Fabric and Leather Paint. Excellent for decoupage and stencil techniques. The Medium dries completely transparent and does not leave any stain. After fixation, the decorated textile becomes machine washable (use gentle programme).

MOSS EFFECT PASTE

Water-based paste to imitate moss. Apply heat-gun to expand the paste. Mix the two paste colors and complete with different green acrylic colors (lime, olive, country-green, pine-green) for shading. Sprinkle velvet powder on top for soft touch.

GRASS EFFECT PASTE

Water-based paste to imitate grass. Apply heat-gun to expand the paste. Complete with different green acrylic colors (lime, apple-green, country-green, pine-green) for shading and sprinkle velvet powder on top for soft touch. Perfect for model tables.

VELVET POWDER

Very fine velvet powder that sticks to any paint or paste. Sprinkle on top of the still wet paste or paint for creating velvety soft touch. Apply with Fabric Medium on textile, so it will be machine washable.
