HI9814 pH/EC/TDS/ Temperature Meter

with Multiparameter Probe

The HI9814 is a slim, lightweight, and waterproof portable meter that measures pH, conductivity (EC), total dissolved solids (TDS) and temperature with a single amplified probe. All operations and settings, including calibration buffers and temperature scale selections, are made through only two buttons. The housing is waterproof and rated for IP67 conditions.

- Waterproof
- 3 in 1 amplified probe with pH, EC/TDS and temperature sensors
- Quick Cal mode to calibrate pH and EC/TDS with one solution
- EC to TDS conversion factor selectable between 0.5 (500 ppm) and 0.7 (700 ppm)
- HI1294 pH/temperature probe for direct soil available

Shown with optional HI710025
shockproof rubber boot

HI98131 pH/EC/TDS/ Temperature Tester

*with Replaceable pH Electrode
Cartridge*

The HI98131 is a slim, lightweight, and waterproof pocket sized meter that measures pH, conductivity (EC), total dissolved solids (TDS) and temperature. All operations and settings, including calibration buffers and temperature scale selections are made using two buttons.

- Waterproof
- Quick Cal mode to calibrate pH and EC/TDS with one solution
- TDS conversion factor selectable between 0.5 (500 ppm) and 0.7 (700 ppm)

Compatible

HI98118 pH/Temperature Tester

*with Extractable pH Electrode
Junction*

The HI98118 pH/temperature tester is ideal for measuring the pH of a hydroponic nutrient solution. This meter is only 0.7" thick and extremely ergonomic, fitting comfortably in your hand. The HI98118 has a very large easy to read LCD display that shows both pH and temperature along with calibration, stability and low battery indicators. All operations are simplified to just two buttons. One is for turning the meter on/off and the other for automatic one or two-point calibration.

- Waterproof
- Two-button operation
- Quick calibration mode using Hanna Quick Cal pH/EC calibration solution
- 1,000 hour battery life

pH

HI98115 pH Tester

with Replaceable Electrode

The HI98115 pH tester offers advanced features for the measurement of pH in hydroponic nutrient solutions. The HI98115 is a very simple meter to operate with all functions including turning on/off and calibration are performed with a single button. The HI98115 features a replaceable HI1271 pH electrode that can be changed when needed without having to buy a new meter.

- One-Button operation
- Replaceable pH electrode
- 1,000 hour battery life

HI98331 Soil Test™

Direct Soil EC Tester

with Built-in Stainless Steel Penetration Probe

The HI98331 Soil Test™ is a rugged and reliable pocket-sized tester that offers quick and accurate readings. This direct soil EC tester features a stainless steel penetration probe for direct measurement of conductivity. With a compact size, single button operation, and automatic calibration, Soil Test is an excellent choice for taking direct conductivity measurements in soil.

- One-Button operation
- 4.5" stainless steel penetration probe
- Automatic Temperature Compensation

HI98318

EC/TDS (ppm) Temperature Tester

with Graphite Sensor

The HI98318 is ideal for measuring the EC/TDS of a hydroponic nutrient solution. This meter is only 0.7" thick and extremely ergonomic, fitting comfortably in your hand. The HI98318 has a very large easy to read LCD display that shows both EC or TDS and temperature along with calibration, stability and low battery indicators. All operations are simplified to just two buttons. One is for turning the meter on/off and the other for automatic one or two-point calibration.

- Waterproof
- Two-button operation
- Quick calibration mode using Hanna Quick Cal pH/EC calibration solution
