Nitrogen is one of the critical building blocks in muscle tissue, and it is essential for protein synthesis and muscle growth. Manufacturer: Indian Brand Substance: Sildenafil Citrate Package: 10 mg/tab. (50 tab.) I had known about this product for a long time ago, and decided to give it a shot. The steroid encourages muscle growth by increasing black market Nitric Oxide (NP) levels. My friend ended up buying some dope and I followed along by my girlfriend. It's a safe and effective way to burn fat by boosting muscle mass and increasing strength. It's been shown to help increase strength and endurance while preserving bone and muscle. Anabolic steroids are a class C drug in the United Kingdom. They are classified because of their potential for illegal abuse. Being a Class C drug puts them in the same category as benzodiazepines. Anabolic steroids are a part of Schedule 4, which is split into two parts. Part 1 of Schedule 4 contains most benzodiazepines while anabolic and androgenic steroids are found in part 2. It's because your testis produce testosterone by themselves, and regulates how much they produce.
