

Minecraft NFTs Are Not Accepted Developer Says

Minecraft is among the most popular games on many platforms, and it won't have any non-fungible tokens or NFTs. Mojang, the creator announced on Wednesday on its blog that it will not allow Minecraft NFTs.

Mojang declared that blockchain technologies were not allowed to be integrated into Minecraft server and client applications as well as used to create NFTs linked to any game content, including skins and worlds.

According Mojang, there have been NFTs created by companies related to Minecraft. JACK However Mojang said that the tokens aren't all-inclusive and create an "scenario of the haves versus the have-nots." Mojang has also expressed concern about fraud and artificially high prices for NFTs.

NFTs aren't yet completely accepted by the videogame industry. However there have been a few success stories that didn't last due to the crypto winter. Experts believe that NFTs will be the norm in the gaming industry once the best method is discovered.
