

Press Release

April 9, 2019

Iowa Food Group (IFG) is proud to have taken the Cherokee plant from shut down for four years to completely operational with full USDA approval within 120 days. The plant passed its GMP Food Safety Audit (Good Manufacturing Practices) with an A+ score on April 4, 2019.

Having now achieved each of these milestones and readied the plant to scale up production, IFG will be pausing production temporarily in order to recapitalize the company in preparation for the next stage of operations and growth.
