Got cleared this week to start lower body exercises after a 14 week hiatus since I last worked out due to sickness/inflammation/respiratory issues. It felt good and the endorphin release was real! Worked up to a victory 85 lb squat to see where I need to start on dynamic work this next week. Also did some calves

This was my second set on bench today. First set was also 90kg for 5, although I attempted a 6th rep and just barely missed it, which took a lot out of me for the rest of my

working sets. Finished with a 3rd set @90kg x 4 reps and then did 2 back off sets @85kg/187lbs x 6 reps.
