

The Next Big Play for Teeka Tiwari and the Palm Beach Research Group

If you've been paying attention to Crypto for at least the past month, you've no doubt heard of the Palm Beach Research Group and their researcher named Teeka Tiawari.

His record speaks for itself with his early call on platforms like Ethereum and NEO (Antshares), among many others. You can learn more about what their group offers on their website www.palmbeachgroup.com. (Lookout! Their subscriptions are expensive).

Recently, in the September issue of the Palm Beach Confidential, Teeka hinted that he would soon be doing a writeup on a privacy coin in the upcoming October issue that he believed would be huge in 2018. A few days before that October issue was to be released, speculation ran wild and most privacy coins shot up over 25% that day. The next morning, a post on 4chan of a screen grab from a powerpoint presentation from ZENcash, indicated that they had spoken with Teeka previously and would be featured in his upcoming release. At the time of this post, the price of ZENcash was at ~100k sat. Throughout the day, ZEN climbed to 177k sat (where we bought) peaking at around 210k sat that evening.

The next day, as the internet got word of this leak and he released his write-up to his subscribers, the price of ZEN exploded to over 500k sat that afternoon (we sold throughout the 400-500 sat range! That's over 100% profit!

He hinted in the October release of another project to do with Solar energy and Blockchain and stated that he would be doing a writeup on that in the November issue. The mentioned that the team behind this coin had an MIT graduate on it. We quickly discovered that Solarcoin (SLR) fits both those criteria, and sure enough, 12hrs after we bought, SLR shot up over 100% from around ~4500sat to ~7900sat on October 21st.

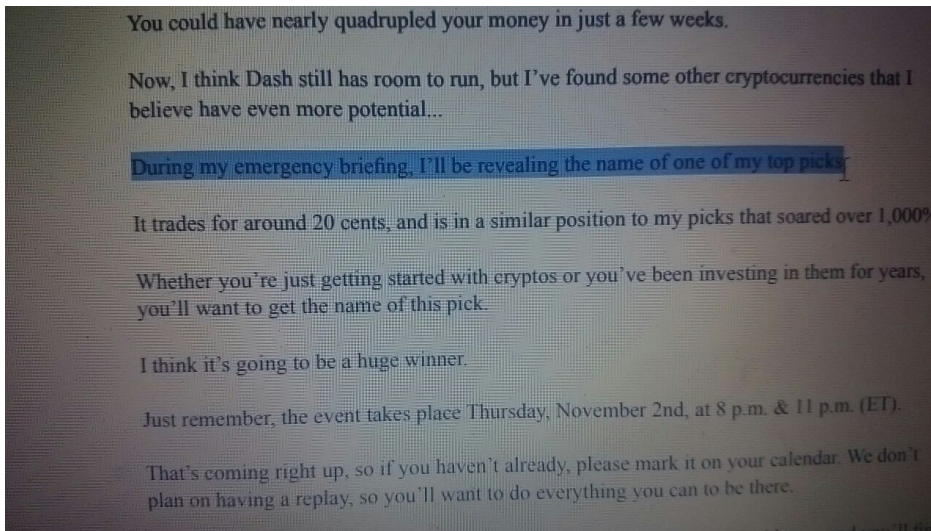

Teeka has another big event coming up this week on Nov. 2nd. see (<http://www.teekatraining.com>) for more details. He has stated numerous times that during this webinar, which will be viewed for free by over 120,000 people around the world, he will be announcing his next big pick for 2018, along with a select smaller group of cryptos that he believes will have a big year in 2018.

For over a week now we've been analyzing everything that Teeka has shared about his upcoming pick, and we believe we've found it.

Hint #1: We know the coin will be on Bittrex. It's clear from his website and training videos that Teeka is setting up this free webinar in a way that will allow for all users (particularly new users) to participate and buy his recommended coins. In his 1st of 3 training videos he posts a "how to invest in other cryptocurrencies" video where he gives explicit instructions on how to sign up to Bittrex.

http://www.teekatraining.com/video-1_mfh615.html

Hint #2: We know it was trading for around \$.20 on October 25th at time of e-mail below.

Hint #3: See the volume spike below on October 25th, the same time Teeka sent out his e-mail.

OKCash Charts

Hint #4: We know from his October write-up for Palm Beach Group that Teeka recommends coins that are **oversold on the RSI**. You can see below that this coin is oversold on the weekly charts.

Hint #5: All of Teeka’s big picks have been made on coins that have a low market cap. As of this writing, OKCash has a relatively low market cap of just \$14, 624, 421.

Hint #6: Teeka has hinted that his “mystery guest” is one of the co-founders of the 2nd largest cryptocurrencies in the world. There is no doubt that Ethereum is the clear-cut 2nd place crypto out there. OKCash has been a Part of Microsoft Azure’s BaaS ecosystem since 2016 and we know that Microsoft is a key member of the Ethereum Alliance. However, there is no mention that the mystery guest is directly involved in the coin he will mention, so we believe OKCash fits this criteria perfectly.

cryptocurrencies, even if you've never heard of Bitcoin before.

It features my "over the shoulder" video training on how to invest in any cryptocurrency... a special report on my investment strategy (the exact strategy I've used to deliver multiple 1,000%-plus winners)... and several more pieces of research.

We will be releasing a new video training tomorrow, so please [go watch Video 1 today](#).

As part of the "Crypto Academy" you are registered for my FREE emergency briefing on cryptocurrencies on November 2nd.

I urge you to ~~do~~ everything you can to be there.

I will be joined by a multimillionaire "mystery guest" – one of the co-founders of the second-most-popular cryptocurrency on the market – to discuss:

- How a **new law** (which has received almost zero press coverage **despite working its way through congress now with bipartisan support**) could send Bitcoin and several smaller cryptocurrencies into a major breakout starting this January (we reveal which ones to watch)
- 3 reasons China's recent crackdown on exchanges and ICOs could hand you triple-digit gains in the coming months
- How to claim FREE BITCOIN in our exclusive "[\\$1 Million Dollar Bitcoin Giveaway](#)"

Hint #7: Teeka suggested that this particular coin would be one of a “small group” of cryptos that are all bound to do well in 2018. We, like many others, believe that IoT projects are going to boom in 2018. So much so that even some of their biggest believers, don't realize just how BIG these projects will become. What we know about OKCash leading into 2018

1. OKCash utilizes a Unique LTSS System with Low Fees and High speed (72 Seconds) on transactions supported by a huge community worldwide.
2. The team is developing a ROKOS system, enabling cryptocurrencies to continue running seamlessly on IoT devices.
3. Secure: Private messages in wallet. (Teeka loves privacy - See ZENCash report).
4. Support: Huge number of wallets for every system, so the network is running smoothly throughout the OKCash ecosystem.
5. Origins: OkCash was founded in 2014, by Lead Dev “OKtoshi” a Bitcoin Full Node Developer.
6. The OKCash platform is both enterprise and individual friendly.
7. New and Original concept in Social Payments Networks with OKCash competing with Steemit. Another big call made by Teeka previously.
