

# Test Deca Dbol Cycle Before And After - Test E, Deca, Dbol Cycle Guidance w/ Proper Liv Support, Anti E, PCT

#1 Here are some pics from my first Test/Deca/ Dbol cycle. Went from 163 - 180!?! I am 3 weeks off and still standing strong at 180 so hopefully I can keep as much as possible. Note: All those guys saying "gain 40 lbs lean mass" before doing cycle are retarded. I did it perfectly and got the exact amount of gains I wanted.

Intermediate Dbol/Deca Cycle. The Deca Durabolin dose has doubled to 400mg per week, Dianabol has increased to 20mg per day, and the cycle has extended to 10 weeks. This is a cycle common among users who have already completed a few cycles and want further strength and muscle gains. With these higher doses, side effects are more likely to occur.
